You have a point, Len. There is an amateur radio clique. Those who are
radio amateurs are a part of it. You aren't.

That description would certainly apply to you, Leonard. There are
plenty of others here who have a view of amateur radio which is entirely
at odds with yours. The big difference is that they *are* radio
amateurs. Your view is that of a total outsider. For years you have
attempted battering the different to the floor tile. Go figure.

A fellow about your age, Len? In another place, the tale could have
been something about your having worked 24/7 at ADA in Japan a
half-century ago.

> The young women were polite, smiled, but clearly
> didn't find any interest or amusement at this.

Perhaps now you understand the reaction to the continual retelling of
your ADA tale.

> Eventually the
> old geezer wound down and all left. In one way that's the way

Amateur radio? It sounds like you're working on a story about life itself.

Some live in a very different fairyland, one where the unlicensed in amateur radio can make believe that they are a part of the game. They could, for example, haunt an amateur radio newsgroup for nearly a decade and attempt impressing *mere radio amateurs* with tales of their exploits in commercial radio or in the military of decades and decades back.

> I look forward to a FUTURE, not a past.

Well, OT, the odds are that it will be a fairly short one. Best hustle or be forever something less than a footnote in amateur radio.

> I was in the past and
> all wasn't as good as it is now.

Some things were better then. Some things are better now.

> The future looks like a better
> place, something to enjoy, to have fun in, free of the ties to
> old standards and practices that are out of place now.

I beat you to it. I thought of that forty years back. It was sometimes a better place. I enjoyed some things but there were problems and there were things which I didn't enjoy. Some new standards and practices were introduced. Some of them worked out well. Others were scrapped and we saw people doing the things the old way, because those ways are better. It doesn't really matter now. It is all in the past.
>
> out old
> LenAnderson@ieee.org

I love the words over your sig. You're out and you're old.

By the way, didn't "John" say that you're dead but animated?

Len:

You might have said, I missed it if that is the case, when/if CW is dead,
are you going to grab your extra ticket?

If so, ya wanna meet down on 3.840 and give art a run for his money--in a
gentlemanly way of course. Don't go with disruptive actions myself...
debate and argument yes, trouble no... suspect you might be the same...
could be fun, ya never know... <grin>

Flunked badly enough to be terminated without prejudice.

I loved that "Colonel Vinson" sentence of yours and was getting
tired waiting for Stebie's bluffing reply to show up. :-)
Stebie was bluffing along, trying to take advantage of so very
few in here knowing anything about military electronics or
practices.

He's failed to respond to "KIR" and "KIT" that I mentioned a few
years ago...apparently NOT knowing that they set the codes for
the common IFF transponder on nearly all military aircraft.

>And BTW, the info above isn't much of a secret since Time magazine put
>a picture of a KY-57 on the front cover back in '83 -- nice pic of a
>Beirut Marine next to a jeep with a VRC-12.

VERY little of the outside of those "K" boxes have been "secret"
nor have the names. Some of the insides are, obviously, but
not names or contract numbers for production nor contract monies
for those contracts. All public knowledge.

Back around 1996 (?) the Army released for PUBLIC DISSEMINATION
the "catalog" of land-forces Signal equipment, FM 24-24. It is
open for public viewing at the Army's Training and Doctrine
Command Digital Library. At least two ham websites have links

to those PDF chapters for free downloads. Nearly ALL signal
equipment is described in there with pictures and all that. :-)

Nowadays, though, COMSEC is being built-in such as in the SIP
version of SINCGARS ground-air transceivers and the new
AN/PRC-150 IHFR (Improved HF Radio) now under contract to Harris.
See AN/ARC-210 for the SIP (SINCGARS Improvement Program)
version of that for aircraft.

>> Again...colorful. Clancyesque.
>
>You and fiction seem to get along quite well.

Stebie just doesn't know what he thinks he is talking about. :-)

He once tried to spew insults about my "not knowing civilian
avionics" (despite my having been IN that line of work) and
took to task my "faulty" description of civilian VOR. Never
mind that VOR (I consider elegant in simplicity for the tube
era) was conceived, tested, and found acceptible for the
international air community in the 1950s. Likewise, he
didn't speak out when I mentioned "Mode 4" for IFF transponders.

He just doesn't mention ANYTHING in regards to military radio-
electronics systems, no details, no names of any kind. At best
he once talked about two civilian radios supposedly at the
Okinawa MARS location where he claimed to be "Assistant NCOIC"
(as if they had so many that they needed "assistant" titles).

>> That you attempt to diminish my military service simply because I
>>do not wish to discuss it in this forum like Lennie's rantings, or like

>
>Blah, blah, blah. You've been both outed and spanked. Either fess up
>or shut up.

I predict Stebie will do neither. He can't admit to duplicity
(he is too deep now to have any chance of backing out) and he
doesn't ever admit to any wrongdoing (his duplicity depends on
him giving the impression he is always right).

If Stebie LIES about his military "radio experience" then it is
almost a sure bet he LIES about amateur radio experience.

What we CAN bank on is a series of personal insults directed at
his "opponents" that challenge him. Standard Operating Procedure.

>and some soft music... more than likely, takes a lifetime to explore
>fully... <grin>

Ackshully, the industry acronym of TWT (Travelling Wave Tube) is for a very interesting late-era vacuum tube, a very broadband amplifier (at least an octave of bandwidth) having low internal noise and many milliWatts of output, low (around 50 Ohms) In/Out impedance and good from L-Band (1 to 2 GHz) on up to X-Band (8 to 12 GHz). The Quail decoy missle used them in several applications, one as a five-octave mixer (!). The Quail was made by MacDonnell (before the amalgamation with Douglas) and carried on the BUFFs. It could fly out along a predetermined course and act like one to three BUFFs to Soviet radar. Good insurance for SAC.

The Electronic Warfare Labs at Ramo-Wooldridge Corporation made the avionics package. I tested those cylindrical tubes in the summer of '58, the same summer I decided on a major switch of majors into electronics engineering.

TWTs are still being used in communications satellites as the octave bandwidth final amplifiers, ideal since many, many transponder channels can be amplified together, with very little intermodulation distortion. TWTs are one of the last family types of vacuum tube devices still useful and being used...the others are CRTs (becoming scarcer and scarcer), photo mulitpliers in optical instrumentation, the heart of Night Vision devices, microwave oven magnetrons, and high-power VHF-and-up transmitters.

Oh, and, in a few rare cases, vacuum tubes are used by beepers in "state-of-the-art" vacuum tube transmitters they "designed" in the 1990s... <BSEG>

I'm not going to touch the "other" acronym...would upset Kim and Dee too much...not to mention certain pansy posters in here. :-)

It's so quiet you can almost hear Steve pouting in the corner of his
mommy's basement.

BTW, it's getting close to my off-season so that means vacation time.
I make my way to Jacksonville (NC) every now and then. I haven't taken
I-40 for almost 20 years -- I really hated Knoxville. Has it changed
since then? Anyone taken that drive recently? And isn't that part of
the old Route 66?

Any suggestions would be helpful.

sure it is, they just have to know how to use their 'split' button. of
course now some europeans can go up to 7200, so that is a bit of a help.

Actually, quite a few of the EU countries have opened 7100-7200 to their
hams as a result of the outcome of WRC-03.

About 2 weeks ago, I worked G0EVY, Dave, in central UK, on about 7195 SSB
from my mobile at around 11:00 pm EDT while driving back from a ham club
meeting in New Jersey. Dave was a solid S9+ and indicated that he's on that
part of the band practically every night for several hours.

A-yup...My FT-757 isn't the most luxurious rig on the market, but
that split feature works well...Use it lots for the DX tests...Even for
routine calls...I've made a lot of "random" QSOs by tuning 7050 to 7100
then transmitting where they indicate they are listening.

not at all just the fact you can't tell the turth

Posibily becuase you can't face the truth but you certainly can't tell
the truth

You were disabled out... fact

You deny it was physcial...fact

therefore it is was mental... simple logic

you were paid..fact

you are therefore drawing a disablity pension...fact

when are you going to stop with the bullshit?

when you going to admit you can't affect me with claims of reporting me?

How long is long enough before you will admit the state will do nothing?

when you going to stop lying about your license in the medcial field?

just a simply when is all that is needed.

yes this is an attack thread

# 2756. Stevie admitts to lying to the NG and to the state of Michigan

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-23 15:48:48 UTC
From: an_old_friend <konstans@hotmail.com>

Stevie yesterday admitt hat he has been lying in claiming that lying is
a sign of mental illiness and so admits that many of his rants over the
years have been lies

It isn't Dr Robeson, but Rev. Robeson that has been speaking, preaching
and trying to force his morality down everyone's throat

Source record: 117108

on 22 aug stevie did number of things

He admitted to receivng a mental discharge

He admited then deined, then admited to it again, receiving a disablity pension, just as a lump sum payment

he got caught not knowing the mahor peice of equipment he would have been working with as a marine (prehaps an understandable lapse in view of the mental discharge)

He admitted to lying to NG about his rants over the years about lying

he therefore also admitted to lying and/or decieving the state of Michigan

he tired dening making his death threats

He got found out on his libel issues, (he still denies then but admitted to geting his access terminated)

a Busy day for stevie boy

Here in 3 land the activity is both diurnal and seasonal. During the
day 80/75 is very quiet - in part because of propagation, in part
because of people not
being near a rig, and in part because other bands are "more open".
Winter is more active than summer, sunspot minimum more active than
sunspot maximum.

> when they hear activity...to their credit.

But in general there isn't much digital going on either.

Some years back, a small PSK31 rig called the "Warbler" made the
3579.545 colorburst frequency popular among PSK31 folks. Although the
Warbler only covered about 2 kHz of the band there, folks with other
rigs flocked around.

Is 3575 to 3675 full of digital signals? I don't think so!

There's another effect going on, too:

Good 80 meter antennas are pretty big to folks used to VHF and 10 meter type stuff. The popular G5RV is a compromise antenna on 80, at best. The band doesn't really come into its own until after dark. Etc.

How many folks on rrap have an 80 meter setup? As in "at least a G5RV that works on 80, 35 feet up at least") There's W4NTI, N2EY, K8MN, K0HB, and probably W3RV.

Out of how many?

> the way.

Not just on the way - they're here, and growing every day as SWBC folks move out and more countries allow their hams to use 7100-7200. Soon there will be no good reason for SSB below 7100 at all.

> Perhaps when it is a exclusive Amateur allocation (at least for
> Region 1 and 2) things will improve. But for now it is a complete mess.

The rules take so long to change that the time to ask is now. Look to the future, when 7000-7200 or even 7000-7300 will be worldwide exclusive amateur.
>
> It is indeed a active band, for all modes. In reality it needs expanded to
> 7.5 or so. But that will never happen.

It won't happen if we say "never". Look how long the band stopped at 7100 outside Region 2. But the rules *did* change.

I think what is best for amateur radio is for the bottom 15% or so of each HF/MF ham band to be Morse Code only. If that is done, and at least some of it is open to all license classes, hams who are interested in Morse Code can and will flock there. The problems of incompatible modes will be greatly reduced.

> >> >> I still like my suggestion......bottom 25 of ALL HF bands....CW

> Then only extra's do CW. I have no solution for that. If the FCC don't
> want it, it won't happen.

The trick is to offer the FCC something that doesn't contradict the way they think. Telling them to dump the Extra is a nonstarter because they're convinced it's a good thing. The idea of devoting 15% of each band to be Morse Code only hasn't been presented to them. They might go for it as a way to eliminate QRM complaints. "Here's a Morse-Code-only preserve, folks the only QRM you'll have is from each other!".

Other modes have similar protection. Look at the 'phone subbands - data modes are not allowed there! Morse Code ops avoid the 'phone subbands - when't the last time you heard real Morse Code operation in a 'phone subband?

All you hear in the 'phone subbands are SSB, a bit of AM, some SSTV, and maybe some digital voice and narrow FM. Some might even say those rules are 'welfare' for analog voice modes.

If those modes can be protected from digital/data QRM, why can't a much smaller part of each band be set up as a Morse Code preserve?
>
> > They also said that more frequencies was the best incentive.

> The FCC has NO IDEA what is good for Ham radio. Nor do they give a RIP.
>
Doesn't matter - they make the rules. If we ask for something that goes along with their mindset we just might get it. Asking for something they
have already said is not on their agenda has little or no chance or success.

It was that way back in those days too. I was there.

Some of the SSB folks thought they were better than the AM gang. Some
folks with Collins looked down on others with less-expensive rigs. Some
of those with Drake looked down on others, yet considered the Collins
folks to be snobs. Some with 1x3 calls looked down on those with 2x3
calls.

Etc. You get the drift. Key word is "some".

> Were there only *one* class of ham,

Of course. The lines would be drawn another way. Equipment, modes, etc.

Shall I post the Smith Chart piece again?

"Everything old is new again"

It's really funny to see the neophiles ignore history and what has
already
been learned as "old stuff", then go out and try to solve the same
problems all over again.

Then when you try to Elmer them, you get called a dinosaur.

> covered.

Except that's not the whole story. I've had this discussion with W1RFI
both
online and in person. There's a lot more to the old vs. new exams.

First off, the "3-1/2 page study guide" refers to the part of the old
ARRL License Manual that had the sample questions. These were
essay-type questions
meant to indicate subject areas that would be on the test. The old LM
was *not*
meant to be a stand-alone study guide, nor did it contain the exact
Q&A. One or two essay questions could cover an enormous amount of
ground, yet take up a small part of one page.

In addition, the prospective ham had to know the rules and regulations
(not part of those 3-1/2 pages) plus Morse Code sending and receiving.

Most of all, the old 1963 Novice was an extremely limited license. Good
for one
year, small parts of 4 bands bands, two modes and low power with
crystal control. Every US ham had a year to pass at least the General
written (same exam was used for Technician, General and Conditional) or
leave the ham bands.

> The point is that things have NOT been "dumbed down" ... there is more to
> study and learn than ever before - just to become a "beginner."

Yes and no.

If someone wants to really *understand* the material, there's lots to
learn. If they want to be able to practically apply it, there's even
more.

But if all they want to do is pass the test, all they need is to get
enough multiple choices right and the license is theirs. FCC doesn't
care if someone understands the material or not, or if they got a
perfect score or just enough for a passing mark. Same license is issued

either way.

This isn't meant as a put-down of newer hams - they don't control the
testing process or requirements!

> I was
> licensed long enough ago to have been a member of QCWA for some time, and I
> am FIRMLY convinced that those who complain about "dumbing down" of the
> testing are either being disingenuous, or more likely simply remember the
> tests that they took many years ago as being MUCH harder than they actually
> were.

Or maybe they're using a poor choice of words.

The old tests required some understanding and detailed knowledge in a
few well-defined areas. The new tests are more amenable to memorization
without much understanding, and treat a wide variety of subjects in a
very basic manner.

On top of all this is the fact that in the bad old days just getting to
an exam was a major effort for a lot of prospective hams. So we tended
to overprepare just to be sure.

> Besides, the test isn't a proof that you "know all there is to know,"
> nor SHOULD it be.

Of course not! At the same time, if the test is "too easy", the
newcomer has so much to learn that they can be frustrated to the point
of giving up.

> I'd ask older hams with higher class licenses to think back to the mistakes
> that they made when they first went on the air many years ago - and how the
> more experienced hams of the time (generally) were patient, tolerant, and
> helpful. Show the newcomers the way in polite, respectful, and constructive
> ways, rather than slamming them and telling them they're no good!

Of course - but that's a two-way street! Being called "olde fartz",
"obsolete", "dinosaurs", "beepers", "key tappers", "elitists",
"one-by-twos who need a whack from a two-by-four" and such doesn't make
an experienced ham - *any* experienced ham - want to Elmer the name
caller.

Look at KB3EIA's experiences - see the problem? I had a similar one
here on rrap when I tried to help someone with an HF antenna problem,
then realized the person expected me to completely solve his problem
with incomplete information and a barrage of put-downs. Eventually I
realized it was a waste of my time - the person involved would not
accept any solution provided.

Of course a lot of Elmering *does* go on - via reflectors, in person,
on the air, with books, websites, etc. I've done a bit of that
myself....

I, for one, do NOT support more bandspace for SSB ... I think it's
unnecessary.
The main problems are on contest weekends and a lot of those problems are
caused by too much testosterone and not enough operating courtesy from
*some( but not all) contesters and the "retaliations" from some equally
discourteous non-contesters.

>> >
>> > Is that what is best? More room for SSB and AM, less for

becuase enough morse code users don't respect those "preserves" Nor do
I BTW support the existance of the current mandated bandplan either so
why should I support making it worse

But the FCC has rejuected micromanaging spectrum further

I wanted to say thanks to all who responded and to provide an update in case
anyone else has a similar problem.

My VEC contacted the ARRL VEC office and they corrected the error. A new
Amateur Extra callsign was issued along with the status change, and
presumably a new operator's license certificate will arrive in the mail.

Unless you're willing to arrange your travel times through
Knoxville to miss "rush hours" by a good margin, plan on getting jammed
up in K-Ville...The usual traffic is bad enough, but the construction
zones and other hazards make it absolutley horrific.

Steve, K4YZ

## 2780. Stevie lies again

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-23 19:54:32 UTC
From: an_old_friend <konstans@hotmail.com>
Message-ID: <1124826872.679053.56160@o13g2000cwo.googlegroups.com>
Source record: 117131

quoting from Stevie "Markie confesses to lying about mental dischage from Marines (if he could SPELL "discharge"...)"

Here we have it again another lie from the man that does not tolerate lying

Since Of Course I have not confessed to lying about Stevies mental discharge, Stevie has lied about the facts. Even if I were lying I have not confessed to it. and I am not lying I believe based on Stevie own words that Stevie has received a mental discharge once known formaly as a section 8 now with some other name, but still often called a section 8

If Stevie had said "Mark is lying..." then he could claim with some basis to be stating an opinion or he could claim he was stating fact, but in stating "Markie confesses to lying about mental dischage from Marines (if he could SPELL "discharge"...)" he lies on the basis of fact

How you do tolerate yourself.

Liar

Fraud.

Coward.

Probably never. After so many years of rationalizing his lies I'm sure
he actually believes that they are justified. I effectively nuked him
with the facts and his response was avoidance. It's been a few years,
but if I remember my Psych 101 correctly he has what you would call
"Narcissistic Personality Disorder"; his false sense of superiority
will never let him fess up, and his need for attention will never let
him shut up. Too bad cause he's obviously a smart guy -- just really
screwed up.

You are more than likely right

OTOH I have found over the years if you keep pressing him on his faults
he tends to be quieter and better behaved

> He isn't playing dumb, he is dumb

There you have it. But he really is wiley about coming just a short hair shy of making threats. He wants you to think that you've been threatened, but he's too chickenexcrement to actually do it. He's very, very practiced in that art.

> sort of result.

With all due respect, that's what everybody says. The trouble is with
the specifics. You've given us some good specifics, like support of a
'reasonable' subband for Morse Code only, and a similar 'reasonable'
subband for 'robots'.
The devil is in "what's reasonable"?

> In addition to significantly improving the general level of technical

> constructively going forward into the future on the truly important issues
> facing ham radio and the ARRL.

The trouble is that ham radio covers such a wide range of activities
that
there's trouble finding common ground in some cases.

For example, you have folks who want to use equipment and modes that
are
decades old, and folks who think anything less than their concept of
SOTA is "obsolete". Folks who want more room for SSB (and even "hi-fi
SSB") and folks who want more room for digital. Folks who don't even
have a computer in the shack and folks who never actually listen to a
signal (they watch it on the waterfall display).

Appliance ops and homebrew-from-scratch folks. DXers, contesters,
ragchewers, emcomm folks. Those who are stuck with compromise and
stealth antennas and those with tons of aluminum aloft.

How do you get all those folks to see that there is value in what each
of them brings to the table?

> ALL hams should treat each other with
> respect and courtesy, regardless of license class or operating preferences.
> Experienced hams need to welcome new hams with the spirit of patience and
> helpfulness that "Elmering" embodies, rather than treating them as some
> inferior form of life.

As mentioned before - that goes both ways.

I think this "protect their self esteem at all costs" approach was badly mishandled. While one should never put down a person, they do need guidance and it has to be pointed out that mistakes are mistakes. Because these students were protected from their mistakes and told it was OK, in the end, I believe that they end up with lower self-esteem. They do often realize that they've made a mistake but the fact that no one points it out or helps them correct it transfroms in their minds into the concept that they are so lowly that they aren't worth helping. This is a bigger hit on their self esteem than anything I can think of.

N2EY@AOL.COM wrote:
> Carl R. Stevenson wrote:
> > As far as "dumbing down" goes - I don't buy it -

OK, here's some sample test questions:

>From the 1976 ARRL License Manual:

Study Question #31:
Draw a schematic diagram of a circuit having the following components:
(a) battery with internal resistance,
(b) resistive load,
(c) voltmeter,
(d) ammeter.

Study Question #32:
>From the values indicated by the meters in the above circuit, how can the value of the resistive load be determined? How can the power consumed
by the load be determined?

Study Question #33:
In the above circuit, what must the value of the resistive load be in order for the maximum power to be delivered from the battery?

Study Question #34:
Draw the schematic diagram of an RF power amplifier circuit having the following components:
(a) triode vacuum tube,
(b) pi-network output tank,
(c) high voltage source,
(d) plate-current meter,
(e) plate-voltage meter,
(f) rf chokes,
(g) bypass capacitors, coupling capacitor.

Study Question #35:
What is the proper tune-up procedure for the above circuit?

Of course those questions seem simple if someone has reasonable knowledge and experience with the radio technology of the times. The last two questions are
still arguably somewhat relevant because there are still vacuum-tube based amplifiers on the market and in wide use by hams.

But the most interesting thing about those questions is that they are just *some* of the study questions for the *Novice* exam of 1976. Took

up less
than a page. How many pages of explanation would it take to
teach the above material in detail?

The actual exam did not use these questions. Instead, it might show,
for
example, a schematic of the amplifier circuit similar to, but not
exactly like
the one shown in the license manual, with 5 of the components labeled
"a" thru "e". The question would be something like, "which is the
coupling
capacitor?" "which is an rf chokes?" "what is function of the capacitor

labelled ''d' in the circuit above?"

And that's at the *Novice* level. The raw beginner, with limited
privileges.

Does anyone think that the current entry-level exams are tougher than
that?

The breadth of material has increased but the depth has decreased. The
number of questions has decreased and the nature of the test has
changed.

Here's proof:

Written test requirements before April 15, 2000:

Novice: 1 test, 30 questions
Tech/Tech Plus: 2 tests, 30/35 questions (65 total)
General: 3 tests, 30/35/35 questions (100 total)
Advanced: 4 tests, 30/35/35/50 questions (150 total)
Extra: 5 tests, 30/35/35/50/40 questions (190 total)

Written test requirements after April 15, 2000:
Tech: 1 test, 35 questions
General: 2 tests, 35/35 questions (70 total)
Extra: 3 tests, 35/35/50 questions (120 total)

I did this from memory so the number of questions may not be perfect,
but the trend is very clear. Fewer tests and fewer questions across
the board.

Back when I took the exams (1967-1970) the Novice was about 20
questions, and all of the other classes about 50 questions each. About
170 total questions. The exact number of questions on the test was not
known in advance back then, nor were the exact Q&A.

Of course we're not going to see a return to 'secret' tests, because
FCC doesn't have the resources, nor do they see the need. And tests
alone are not the only indicator of knowledge and skill, of course.
There were folks who "tightened all the loose screws" in those days,
too.

# 2793. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-23 23:29:03 UTC
From: LenAnderson@ieee.org
Message-ID: <1124839743.462663.199070@g43g2000cwa.googlegroups.com>
Source record: 117144

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

22 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1866

Indeterminate/duplicates (note 1) 92

Unambiguously Against NPRM (note 2) 497 28.02%
Unambiguously For NPRM (note 3) 1020 57.50%
Code test ONLY for Extras (note 4) 257 14.49%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and three who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 22 Aug 05 that would be 1774.

As of 23 Aug 05, there still hasn't been any notice in the
Federal Register under Federal Communications Commission on
the NPRM FCC 05-143.

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

>Len:
>
>You might have said, I missed it if that is the case, when/if CW is dead,
>are you going to grab your extra ticket?

Maybe, maybe not. That's MY option, not based on the puerile taunts of middle-schoolers who are of middle age going "nyah, nyah, can't get a ticket, can't get a ticket!!!" :-)

Hmmm...I started out in HF communications with much more "action" than the average, doing 24/7 comms with high-power (up to 40 KW) transmitters shooting across the Pacific, plus doing VHF, UHF, and - finally - multi-channel microwave radio relay over a half century ago...winding up as an operations and maintenance supervisor NCO. Then, on release from active duty, getting a First 'Phone at an FCC field office (no COLEMs then) and working four broadcast stations as vacation relief or on weekends or full time for WREX-TV to gain enough money to come out west...having already interviewed for and secured a job at Hughes Aircraft. That led to a whole career, major major change to electronics engineering winding up as senior staff in design. I'm supposed to get a ham license to "prove I know something about radio?!?!?"

I don't have anything to "prove" to a bunch of yokels who want to recreate the 1930s and 1940s in radiotelegraphy! Geezus, gimme a break from those neanderthallers! What the fork do think a ham license IS...some kind of Nobel Award for Science?!? :-)

Amateur radio is fun, a recreational avocation done not for money but for personal pleasure. It involves NO different radio physics than any other radio service but it allows all the choice of buying state-of-the-art radios to use or in building them from their own designs. It requires a license to transmit RF due to a federal law (an act of Congress) that created a federal regulatory agency for ALL civil radio. The mindset of many hase been "conditioned" by a certain membership organization to be much, much more, a virtual lifestyle that has gotten too deep into the myth and fantasy of long-ago times and dreams of glory and heroism that never happened.

One argument is that "a ham can have their OWN station." Yes, I've had "my own station" or properly, one-third of it in a business partnership with two others. I've built/converted three "stations" and checked them thoroughly befoe selling them, never once "using" them or caring to use them. I've designed and built two other

transceivers for CB, one a prototype for a CB company in Burbank
that went bankrupt when faced with off-shore CB products cut them
out of profit action.

"I can work the world on radio with an amateur license!!!" Yes,
and I could pick up a handset in Tokyo, at ADA Control, and talk
to Seattle, Anchorage, San Francisco, Hawaii, or Okinawa any time
of the day or night, as I did for a while in 1955...without any
"license" or even any specific HF with/without SSB schooling of
any kind. I can "talk" to the rest of the world any time I want
to on the Internet, and have, plus being able to share images
with dozens of long-time friends (from pre-Internet days) faster
than by surface mail, uninterrupted by vagaries of the ionosphere.

"I can explore new radio territory and advance the state of the
radio art" with a ham license. What the fork do some of these
cretins think I was DOING FOR A LIVING since 1956? Without a ham
license I've legally transmitted RF on frequencies ranging through
EM bands from LF into EHF, on up to 4mm wavelengths. Gotten one
patent as sole inventor, had a terrific time in the labs and in the
field, still do it once in a while.

I once "worked a station" ON the moon. No moonbounce stuff. I
have to learn morse code in order to do THAT as an amateur?!?
(I don't have to test for morse code at VHF and up, just for
frequencies below 30 MHz...where I began doing HF communications
a half century before...without having to know or use morse code
then or any time afterwards)

>If so, ya wanna meet down on 3.840 and give art a run for his money--in a
>gentlemanly way of course. Don't go with disruptive actions myself...
>debate and argument yes, trouble no... suspect you might be the same...
>could be fun, ya never know... <grin>

No. If anyplace on ham bands, it would be on 20m where a bunch
of ex-RCA Corporation folks hang out on Saturday mornings. Talk
there is shared-interest stuff, not the personal polemics of
self-propelled radio potentates. Listen for KD6JG and W6MJN,
among others. I know them by their real names, not callsigns.

"I can be FEDERALLY-AUTHORIZED with MY OWN CALLSIGN if I get a
ham license!!!" Wow, ain't that something (like I've already
done that, but not with a ham license). I know where to get a
good ham sandwich nearby, the vendors needing only a Health
Department license to operate. [great pastrami at one place]

I DO need to renew my Poetic License. Time to study for Mores
Goad. :-)

buy buy

>resistance.

Mark, that happened when you were away from the newsgroup for
a while. Leading up to this posting was Stebie "challenging"
me to provide "proof" of my First "Phone license. No problem,
I scanned it in color with enough resolution to make even the
filligree on the edges nicely visible. I labeled that scanned
image "Attachment."

At about the same time, a hometown (and school days) friend
sent me some images in e-mail and one was labeled "Attach."
That image was a high-quality image of an airborne B-26
converted to firebomber, good shot of the forward part from
above. In the plexiglas nose, one crewmember was "mooning"
the photo plane and camera. Funny!

So, when I got back on line later, I sent Stebie an e-mail
with an attachment. On AOL that I was using then, one can
select attachments from a series of overlay menus. I grabbed
the file "Attach" with the mouse, saw it got attached, and
sent the e-mail. Very quickly (I was still on line) Stebie
sent me a nice e-mail in return thanking me and saying "he
knew he could count on me..." :-)

Obviously, I didn't check file names, separating "Attach"
from "Attachment." You can guess which one got sent the
first time. :-)

A day went by till I got on-line again, only to find a TOTALLY BERSERK Stebie going absolutely ballistic, cussing me out, and saying he made a denunciatory Home Page on AOL to show what a terrible person I am. In the newsgroup I posted my error explanation but that was NOT ENOUGH. Stebie wanted more than a "pound of flesh," he wanted a whole meat market full. :-)

The new Home Page created by Stebie under some alternate screen name of "NeverTrustLennie" or something like that was pure, utter LIBEL, so much that it could be spelled out all-caps. Geezus, Stebie had gone NUTS with all that libelous snit.

I messaged AOL Member Services after making a copy of that page and had to wait another day for a reply. I let AOL know that I was considering retaining a lawyer on that matter. No sweat, I could pay retainer and court cost fees for civil court action on that. It would have been a sure winner for me had it come to that. No problem. AOL simply erased that Home Page, notified Stebie, and erased his new alternate screen name. OK, that was fair and I said so to AOL Member Services.

During the three days for all that to happen, I re-checked my directory used for In/Out files, renamed them after making sure which one was which, and RESENT in e-mail the proper scanned image of my first First 'Phone (front and back, the back having had four signatures from the Chief Engineers of WBEL, WRRR, WREX-TV, and WMCW, all indicating "satisfactory service"). Stebie replied in both e-mail and newsgroup posting that he "refused to look at it." It was a good scan...I have a good one ...and Adobe PhotoShop made it easy enough to scratch out enough of my signature to prevent forgery of that yet remain legible (my name was typed in on the certificate by the FCC).

I sent copies of that scan to some others, the "air moon" image to some others (Brian Burke thought it was funny). Stebie stayed ballistic, perhaps in orbit, and has yet to re-enter the atmosphere of reality.

>>>You DID misrepresent your intentions with an e-mail that
>>>contained OTHER than what you attested to it being.
>> Poor baby. A simple mistake and you go BALLISTIC!

That Stebie did. Surprising outburst of total ANGER and un-thinking clearly-libelous prose on that Home Page. Stebie is an uncontrolled volatile emotionally-driven sociopath when he doesn't get his way OR if he perceives he was "deceived." He hasn't changed one bit since...

> The devil is in "what's reasonable"?

The way I see it there's probably no way to please everyone 100%.

Therefore, I think the solution is to work with all of the interested
"camps" to forge a compromise that at least a significant majority can
accept.
The optimum balance is probably something that will result in all of the
"camps" being able to say "It's not perfect in my ideal world, but I can
accept it and 'sign up' to support it."

I think the suggestion from the CW folks for a modest "CW only" segement at
the bottom of the band is reasonable and would ease a lot of concerns about
getting "squeezed out of existence."
I think that the proposal that some have made to "repurpose" the "refarming"
of the novice bands to provide a "digital playground" for the experimenters
who want to develop, test, and operate the higher speed, more robust digital
modes that the emergency management agencies want is also something that
merits consideration.

I agree that "robots" should not be allowed to take over the bands at the
expense of all of the other modes.

All of this would require some degree of compromise, but I think that's what will be required to formulate something that gains widespread acceptance instead of massive resistance.

>> In addition to significantly improving the general level of technical
>> knowledge and skill of hams,
>
> That was a prime reason for "incentive licensing" 40 years ago!

I'm talking about improved educational programs ... it's clear that "incentive licensing" created a huge schysm in the amateur community and hasn't really worked. (I think part of the problem was linking increased voice frequency privileges to the totally unrelated Morse test and the other part was that it created in too many people's minds the idea that the license meant you "knew all there was to know" - thereby removing the motivation to progress even further.)

>> growing our numbers (both licensees and ARRL

The common ground should be that we're all hams - with recognition that different people have different operating interests and cooperating instead of always being so defensive and turf-war oriented.

> For example, you have folks who want to use equipment and modes that

No he isn't very practiced He forgets that at some points it is his
victum that decides what is a threat

# 2798. Re: EXTRA, EXTRA, EXTRA...

Newsgroup: rec.radio.amateur.policy

No John,

I do not believe having an Extra Amateur Radio License should, or does make the holder somehow superior. All it tells me is that they followed to rules to get what privileges are available, in a legal manner. It shows dedication and perseverance. Not superiority.

As I stated before, I believe incentive licensing is the scourge of Amateur Radio, and is directly related to all this "in fighting" we have these days.

For what it's worth.

It must have been. The FCC is going back to it. Modern version of 3 license structure.

I should have been a bit more clear. I was referening to the period from 1961 on. However I do have some gaps. Especially from 64 to 68, I was busy elsewhere.

To help you out 'old friend'....."attitude adjustment" = Leaving all the CB bullcrap where it belongs and pay attention to what is going on with HAM RADIO. They are NOT THE SAME.

And instead of trying to change the world of Ham Radio, learn something from those that have been there and done it.

SEE?

Dan/W4NTI

I get a real "kick" out of Lennie calling me those things. When all one has to do is put his name in place and you have a perfect picture of Len Anderson.

Amazing.

There are plenty of 20WPM Code-Tape Extras out there who've earned it
but don't use the mode.

Conversely, there are plenty of 5-wpm Extras who "earned" it and discovered
that CW is actually quite fun, not to mention a seriously "bitchin'" (Pardon
my French.) mode for snagging the DX that rarely, if ever, shows up on
phone.

Oops gotta run... Toly, 4L1MA just showed up on the bottom of 20. <hihi>

I am presently QRV from 160 to 2 meters.

I am in the process of putting up my beam on my recently installed tower and hazer. This will be for 20/15/10, and six meters.

Nope.

I said I never sent a threat, public or private.

> > > try google search in this group on erlpn and organ 3 entiries found one

No, Markie...It's a court of law that decides what a "threat" is.
Otherwise you could tell me the sky is blue and, if I deemed it so,
could say that's a "threat"

> You're right! And those were his very words.

Sure is fun watching the two of you pat each other on the back!
Haven't seen so much self-congratulation for nothing at all since
Clinton's book came out...

nope the court makes a final judgement but for example as long as
someone could reasonably take something as a threat like one shot one
kill.. then the intent of the speacker doesn't matter

Here's YOUR post, intact, Markie.

YOU said that I "admit(ed)" that AOL "found (my) stuff libelous".

WHERE in that post, Markie, did I "admit" that AOL found my stuff
libelous?

AOL's letter to me only stated that there was a "complaint" and
they removed the page due to "controversy".

LENNIE said it was libelous...but then Lennie also chides others
for being "thin skinned", but clearly can't stand having his own deciet
and misdeeds fed back to him.

MY comment was that AOL took the path of least resistance. No
more...no less...

Re: OK Markie...You Said I Admitted Libel...Now Show us WHERE...

another lie stevie I never said you admitted to libel I said you
admitted to getting you access cut becuase of libel. I also said youd
deny it was libel

so buzz another lie on your part

You didn't "flumox" anyone, Markie...If you THINK you did and it
makes you feel better to think you did something, that's one thing.

> > I sent copies of that scan to some others, the "air moon" image

Absolutely not.

I'd never be allowed to be a licensed healthcare person if I was
even remotely like you.

The "air moon" was sent under false colors.

A "lie".

> > >>>You DID misrepresent your intentions with an e-mail that

Hello? Is Dee talking about the Public School System now?

Where is amateur radio taught in public schools?

> While one should never put down a person, they do need guidance
>and it has to be pointed out that mistakes are mistakes.

It MUST be the public school system. Sure as "heck" that doesn't
apply in HERE. :-)

> Because these
>students were protected from their mistakes and told it was OK, in the end,
>I believe that they end up with lower self-esteem.

Sounds like what happened to all them olde-tyme hammes trying to
perpetuate the ARS (Archaic Radiotelegraphy Society) & morsemanship.

> They do often realize
>that they've made a mistake but the fact that no one points it out or helps
>them correct it transfroms in their minds into the concept that they are so
>lowly that they aren't worth helping.

Yup, that's what all them olde-tyme hamme morsemen are doing
with all the NCTA (lowly beyond belief, not having the "proper
attitude" and worshiping these mighty masters of radio).

> This is a bigger hit on their self esteem than anything I can think of.

Except in some females' cases where their remarks are, well, it
can't be said in here... :-)

OKAY, all you ESTEEMED ELMERS...GET OUT THERE and Win One for Hiram!

ADJUST THOSE ATTITUDES! STAND AT ATTENTION WHEN AN ELMER TALKS
TO YOU!

Proper psych name or not, that's IT. [my formal psych two
semesters were in 1959...all the rest of the time in the
Great School of Life with PLENTY of examples to study...:-)]

Author and screenwriter Ernest K. Gann's semi-autobiography
"Fate Is The Hunter" described how a guy faked his way into
being #3 (seniority) pilot on a new airline starting up between
San Francisco and Hawaii around the 1950s (Gann was #2 and an
airline pilot since before WW2).* This fake had "self-taught"
himself how to fly while in the State Department during WW2
going to and from South America. He's faked his way into
this new airline but had NO time on four-motor aircraft nor
could he fly well with the autopilot off. After an FAA
check-ride resulted in such a poor demo, the FAA found out
he had NEVER gotten an Air Transport rating! Fake went bye-
bye but later got onto another beginning airline doing the
same thing...but killing himself and passengers.

* In the book, not in the shortened black-and-white movie of
the same title name. It's in Chapter 16 (or "XVI" as typeset),
character name given as "Dudley."

> Too bad cause he's obviously a smart guy -- just really
>screwed up.

Stebie has an Extra. He's also said his nine-year-old can
pass it. Doesn't say much about the mentality or maturity
required to pass an amateur test.

Amateur radio is NOT on par with aircraft flying, not in any
respect. The "Dudley" of Gann's book was real and, as aircraft
can be deadly when mishandled by fakers, resulted in the
ultimate penalty. The penalty is less severe in this radio
hobby but the fakery there is more widespread...by example.

Definition of "consensus".

However the specifics are where the arguing will be.

> I think the suggestion from the CW folks for a modest
> "CW only" segement at
> the bottom of the band is reasonable and would ease a lot of
> concerns about getting "squeezed out of existence."

Yup.

Would also tend to gather up the activity rather than spread it out.

> I think that the proposal that some have made to "repurpose"
> the "refarming"
> of the novice bands to provide a "digital playground" for the
> experimenters
> who want to develop, test, and operate the higher speed, more
> robust digital
> modes that the emergency management agencies want is also
> something that merits consideration.

There was an ARRL proposal some time back to "refarm" the Novice bands
- which was just a slick way of saying "use them for SSB". Some of us
(including both you and me, IIRC) commented that a better use would be
to create that "digital playground", where all modes except analog
voice/image would be allowed - with primary priority to digital modes
not allowed elsewhere.

> I agree that "robots" should not be allowed to take over the
> bands at the expense of all of the other modes.

Or even *any* other modes.
>
> All of this would require some degree of compromise, but I
> think that's what
> will be required to formulate something that gains widespread
> acceptance instead of massive resistance.

Key question: Will the digital playground include the robots?

Biggest problem: Convincing FCC to accept moving the Novices and Tech
Pluses down into the "General" part of the band.

For example, suppose 80 were "refarmed" like this:

3500-3575: Morse Code only
3575-3675: Digital and Morse Code, bandwidth less than 1000 Hz
3675-3725: "Digital playground" - all documented digital modes
(including Morse Code) regardless of bandwidth.

Extras have the whole band
Generals and Advanceds have all but 3500-3525
Novices and Tech Pluses have 3525-3575
>

> > 40 years ago!
>
> I'm talking about improved educational programs ...
> it's clear that
> "incentive licensing" created a huge schysm in
> the amateur community and
> hasn't really worked.

I think the big problem was that the causes of the apparent
problems were misunderstood.

There was a time when, to be a ham with an effective station, you
needed to a pretty good mix of technical knowledge, skill, and other
resources. There wasn't much manufactured equipment for hams, and what
did exist was very expensive by the average incomes of the day.

And what hams used not only had to be inexpensive, it had to be usable
without a lot of test equipment.

Then as technology, manufacturing and affluence advanced, more and more
hams simply bought their equipment. And as the reliability improved,
and operation simplified, the need to know how it all worked went down.
And those who were less technically inclined found it easier to be
hams.

For quite some years now we've had rigs that require almost no
technical knowledge to operate. No tune-up, no critical adjustments,
self-protected against many operating errors. And so complex that most
*professionals* wouldn't try to build one or even fix one without a lot
of specialized test gear and information.

Incentive licensing couldn't reverse that trend. How will voluntary
education programs do it if the hams themselves don't want it?

And remember all those arguments used against the Morse Code test? Most
of them can be used against the written tests as well, particularly the
General and Extra writtens.

>(I think part of the
> problem was linking increased
> voice frequency privileges to the totally unrelated Morse test

The original ARRL proposal would have only required a written test.

Remember too that at the time (1960s) there was a real need for Morse
Code proficient radio operators.

But most of all, consider that for the unrelated privileges of the
bottom of four HF bands, Generals had to pass *two* written exams.

> and the other
> part was that it created in too many people's minds the idea
> that the

> license meant you "knew all there was to know" - thereby
> removing the
> motivation to progress even further.)

Nope.

Long before incentive licensing, there were hams who thought that
because they passed the test they were fully qualified. I recall hams
who, when they passed the General, would sell their Novice setup, buy a
manufactured transceiver, give away their Handbooks and other
materials, and consider themselves "done" with the serious learning of
radio.

VINSON! I remember those. The 2ID provided us with aviation,
mobile/tactical radios. The kick13 was on a sweatty piece of parachute
cord that got passed from shift to shift; had to wear it on my neck.
The QRCT HF system also required a ky58, though the depot was Ft Gillem
(brac?).

What were the little tear-off code pages called?

KAC? Authenticate.

Haven't thought about that stuff in years.

> Blah, blah, blah. You've been both outed and spanked. Either fess up

Dee:

There are naturally gifted teachers, but they are not all that common place, the rest need some formal training, and some will never be teachers. From personal experience, I have grown to think the very worst--think themselves the very best--with some, no amount of real world proof will get the point across that they need to adjust their teaching method, for this reason, some should NOT have tenure.

What is true knowledge and what is just personal dislikes, opinions and beliefs is a real problem to, unless you have a strong ability to keep the two separated, science and religion, you are going to have great difficulty with any but avg and below avg students--they know the difference.

There are bandwidth allocations, math formulas dealing with electronic circuits, regulations in the FCC rules, etc.--and then there is "style." If you attempt to teach your "style", be prepared to be frustrated--some will accept it to be nice--then go about their business, others will need religion and are searching for purpose and acceptance and will adopt it--and, yet again, others may think you a control freak... but you have seen this in the real world about you and I waste both our time reiterating such...

Dan:

The only difference between cb and amateur is megacycles and "church doctrines." Of course, if you can BS those without a ticket and who do not "CB", then anything you are capable of convincing them of will most likely float--but don't BS a BS'er, it don't work...

N2EY:

I like to think I gauge each and every man and woman on their merits. How broadminded they are, how current they are, how adaptive they are, if their pursuits are near mine, if they don't take themselves too seriously, if they can communicate on the complex, the unique, if they are not hampered by too many preconceived notions, if they are interesting, if they are fun, if they are educated (and a few have done a darn good job of educating themselves with little formal education--and a discussion with them quickly will disclose that), etc, etc...

I have found about 3-5 out of a hundred are worth a persons time, out in the general world--usually, at work that ratio comes close to a 50-50%.

I think that is a fairly accurate take on it--a person mileage may vary with location and type of employment, of course in heaven I suspect this ratio would be much higher, and in hell it would drop to zero...

Sorry, John, but encouragment requires much training into
being a human modem working with a 161-year-old code set.
Further, I would have to go into detoxification of ANY THOUGHT
of CHANGING AMATEUR RADIO FROM WHAT IT IS! Dan da Morse Man
has SPOKEN! Change is NOT allowed.

Dan da Macho Morse Man speaks in FIFTY CALIBER forbidding ALL
change.

Dan is a hidebound, set-in-concrete-with-armor-plate traditionalist
conservative ready to go into combat with Weapons of Morse
Dedication to rid the world of upstart, liberal (euywww, spit)
thoughts of EVER removing the morse code test!

Dan is in his command track right now directing traffic (through
the nearest 2m repeater of course), ready to Flash Fire any
least sign of disturbance of his thoughts. Meanwhile, from an
undisclosed location, I am silently watching, monitoring all this
from a high UAV loaded with missles...taking aim... :-)

This is NOT about having fun with amateur radio, doing hobby
things for personal pleasure. This is WAR to Dan da Morse Man.
All do as HE SAY!

Don't y'all LOVE it when Dannie do his George C. Scott imitation from the movie "Patton?" Gotta love that Amateur Radio Service Uniform, the shiny helmet, polished riding boots (no mud from the Fulda Gap on them, nossir!), all those Medals of glorious ham service, the chrome-plated morse key in its holster at his side!

The huge American flag behind him on the stage is quite effective. However, the equally huge banner saying DEATH TO NO-CODERS! is a bit tacky.

Here's some recruits to "be taught a lesson through military service...they haven't served yet:"

James Miccolis
Brian Kelly
Michael Coslo
Dee Flint

Tension-hutt! Keep a straight line! Eyes front! No talking in ranks! You OBEY DAN, do whatever he say! He be da new Dill Sergeant! He God!

What makes you think he's even a ham? It's clear that the person
claiming to be K4YZ in this newsgroup isn't Gunny Robeson. If the
-real- Gunny Robeson is K4YZ then this imposter is stealing both his
military history -and- his amateur status. From now on I'm going to
call him "Dudly" just to make the distinction between the real K4YZ
and the newsgroup imposter. (The NIS should have fun with this guy!)

That's exactly the problem. Until each country gets the additional 7100-
7200 spectrum, truly random phone QSOs remain impossible. If someone over
there calls CQ and doesn't listen up, they get to work any country they
want bar one, the USA, so why should 90% of them listen up? Ergo, most of
them don't.

I confess I am using a random end fed wire (270 feet long, I have a 2 acre lot, heavily wooded) admittedly far too low off the ground. However, it does get out on 80 well enough to work some DX, or at least Europe anyway, and I've worked VK6 on it on 40 (split). OTOH, on 160 it doesn't work worth a d*mn, no doubt due to the low height. It also doesn't tune well on 15, but is OK on the other high bands.

One day I'll get my tower up, but that'll mostly help me on the high bands. I have a tribander and beams for 6m and 70cm to go up there. I also do some mobile and portable HF, although I haven't yet got the current car set up.

Why "impossible"?

More and more countries are opening 7100-7200 to their hams. In less than 5 years the SWBC will all be gone. Non-split 'phone DX QSOs on 40 are becoming more and more common.

> If someone over
> there calls CQ and doesn't listen up, they get to work any

> Ergo, most of them don't.

Here's a clue: Many of them don't want just another Yank QSL. There are so many US hams that if they don't "listen up", there's probably a very good reason.

A lot of DX 'phones work split almost as a rule - not just on 40 but on every band, as a way of thinning out the QRM and keeping their own QRG clear.

Yhr FCC has already agreed to let the Novices and Tech plusses use the
General frequencies for CW. It's mentionned in passing in the NPRM.
However, I think they do envisage simply turning over an equivalent amount
of spectrum to phone, that is to say equivalent to the size of the current
Novice CW subbands.

Not only that, but for many of us "listening up" is worthless. 7100 up
and 3850 up are full of broadcast stations, often several on the same
frequency. There is no place to listen up.

The only chance I have of a voice QSO with the U.S. is on 20m just before
and after sunset. Since that's currently around noon on the east coast,
there aren't a lot of people listening.

When the sunspots are with me, I can pick up 10m repeaters with an
HT. I've never been able to work one with it.

73,

Geoff.

Not in NPRM 05-235. I just reread it - they specifically deny almost everything that is mentioned. Changes to the test process, new license classes, more license classes, fewer license classes, more privileges, free upgrades, and much more, are all discussed and specifically *denied* by FCC. FCC mentions several times that if Novices, Technicians, and Technician Pluses want more privileges, all they will have to do is pass one or two written tests. They even mention that all Tech Pluses and Novices have to do *right now* to get lots more privileges is to take those written tests.

After all the discussion, the *only* proposed change is to eliminate Element 1. No other changes are proposed by FCC.

No that is not what the FCC has agreed to as of yet. They mention that there is another proposal out there to do this but they have not acted on it. There wording does seem to indicate that they favor the change though. It's not a really hot issue as there are very few active Novices and Tech Plus amateurs out there. Most of the active ones have upgraded and it's irrelevant to the inactive ones. Hopefully it will encourage them to become more active since there is much more activity in the General portion of the band.

I "get it" just fine, Alun. I just don't agree with it. I'm quite aware that you're already an Extra and passed Element 1C, however, there is plenty of spectrum where one can "talk."

The bottom of the bands is a place to "beep" and is quite often the only place where some pretty rare DX shows up. It's sad enough that the FCC

appears willing to acquiesce to the spirit of underachievement. I certainly don't want to have the bottom of the bands QRM'd with phone transmissions just because those who celebrate this underachievement want more RF real estate to "talk."

Those who have had a phone QSO pop up on top of their CW QSO on or about 7040 late at night may understand this a little better.

I found the transcript:

Analyis: Utilities look to new broadband over power lines

16 August 2005
NPR: Morning Edition

STEVE INSKEEP, host:

There's a new broadband technology spreading across the United States called broadband over power lines or BPL. It uses the utility's electric power lines to deliver a high-speed Internet access into a home or business. And because your house is already wired for electricity, it turns every outlet into a connection point. NPR's Wade Goodwyn traveled to one small town that's betting on that technology's future.

WADE GOODWYN reporting:

Halfway between Houston, San Antonio and Austin is the town of Flatonia. Population: 1,400.

(Soundbite of train)

GOODWYN: Flatonia happens to be where the Union Pacific's north-south line crosses the railroad company's east-west line. A lot of trains come through Flatonia, and to its amazement, train buffs have started showing up to watch. So the town built a covered observation platform.

(Soundbite of train)

GOODWYN: Flatonia's got many things. There's a huge kitty litter factory, an even bigger cow main egg processing plant(ph), but one thing it could not seem to get no matter how it begged was broadband service.

Mayor LORI BERGER (Flatonia, Texas): We want to offer our citizens--just because we're rural doesn't mean they're not entitled to the same thing everybody has in Austin, Houston and San Antonio.

GOODWYN: Lori Berger grew up in Flatonia and now she's the mayor. Berger says that having high-speed Internet is critical to the town's future and she's betting $200,000 of taxpayer money on

broadband over power lines technology. And a big bonus comes with her purchase because, in addition to high-speed Internet access, BPL will give a municipal-owned utility powerful new capabilities.

Mayor BERGER: We would be able to read meters, water meters and electric meters, through the system, and we'd know if there was a power outage exactly where it was.

GOODWYN: Broadband over power lines technology turns the utility's electric lines into a data network. So say if a transformer explodes during a lightning storm, instead of sending trucks out into the dark in a search mission, BPL software can pinpoint the blown transformer. The utility operator can see on a computer screen precisely how many customers lost service and who exactly those customers are. Berger says this will be a major improvement over the way Flatonia used to operate.

Mayor BERGER: We had a power outage about three months ago in the evening, and I realized it was going on. So I came up to City Hall to answer phones. So we sat here for two hours and answered phones, trying to figure out exactly what line was down.

GOODWYN: Although city officials are excited about remote meter reading and fantasizing how fast their reaction is going to be the next time a big thunderstorm knocks out the electricity, it's the new broadband connections that Flatonians are happy about.

Ms. CARLENE CARLOCK(ph): It's new for me.

GOODWYN: Carlene Carlock doesn't look like a great-grandmother as she spritely moves around her antique shop, but her granddaughters have been getting busy, sending her pictures of her new great-grandchildren from locations far and wide.

Ms. CARLOCK: They're in Germany, in California, and my granddaughters, they e-mail me pictures of them. She was just born, my last. And within a day, I had pictures of her. So, you know, it's pretty important when your great-grandchildren are that far away, and I get pictures every week.

GOODWYN: Until two weeks ago, Carlock had to endure up to two hours of frustration on her dial-up connection every time she'd download a picture file.

Ms. CARLOCK: It was horrible. That doesn't happen anymore. I mean, it just comes through real fast. Just blip, blip and it's there.

GOODWYN: BPL is pretty fast, four megabytes, comparable to cable broadband. But the new generation of BPL equipment, just now coming out, will boost speeds up to 90 megabytes, capable of video on demand. Mike Bates is the co-founder of Broadband Horizons, which is setting up the system in Flatonia. Bates says that BPL is perfect for small-town America, especially towns which own their own

utilities.

Mr. MIKE BATES (Co-Founder, Broadband Horizons): With broadband over power line, the real benefit is that they then can control their own destiny. They can use what they already own, this utility asset, and transform the asset and provide broadband in every home via their electric outlets. So it's--that's what the promise is for these communities.

GOODWYN: Bates sells the town the equipment, maintains it and then splits the $25 monthly service fee each customer pays. It's all pretty new. Word is just getting out in Texas, but there's one groups that wary, and that's ham radio operators. Ed Hare is the laboratory manager at the American Radio Relay League, the national organization of ham radio operators.

Mr. ED HARE (Laboratory Manager, American Radio Relay League): BPL that operates at the FCC limits can and does cause strong local interference problems on any spectrum it's using.

GOODWYN: But BPL operators say they've come up with a technological fix. It's called notching, and it notches out of the BPL signal that part of the spectrum that amateur radio operators use. Mike Bates says he's currently working with a dozen Texas small towns and one rural electric cooperative in Kentucky, setting up their new BPL systems. Like Wal-Mart before him, Bates is betting small-town America is hungry for what he's selling. Only this time it's broadband over power lines at everyday low prices.

Wade Goodwyn, NPR News.

"speaker"

Sure the intent matters. That's why there are courts, Markie.

And remember...they are going to have to consider whether or not
you were a "mutual combatant" by inviting such comments with your
"...is that your best shot" comment.

Good luck.

nobodys_old_friend wrote:
> on 22 aug stevie did number of things

Nope. One Mark Morgan lie after another.

Mark, I guess you think this stuff happens in a vaccuum and that
no one else but you and I read it (although I doubt many do...)

WHY do you insist on publishing not one but SEVEN absolutely
UNTRUE and DECEITFUL comments in ONE post...?!?!

> He admitted to receivng a mental discharge

Nope. Not a single word from me of any such.

Please show the post where I "admitted" such a thing.

> He admited then deined, then admited to it again, receiving a disablity
> pension, just as a lump sum payment

I never "admitted" any such thing.

Please show the post where I "admitted" such a thing.

> he got caught not knowing the mahor peice of equipment he would have
> been working with as a marine (prehaps an understandable lapse in view
> of the mental discharge)

"major" "piece" "Marine"

"...got caught not knowing the "mahor peice" of equipment..."

There's a blatant lie.

Please show the post where I "admitted" such a thing.

> He admitted to lying to NG about his rants over the years about lying

"He admitted to lying..."

A Mark Morgan lie in and of itself. You've outdone yourself this
time, Markie!

Please show the post where I "admitted" such a thing.

> he therefore also admitted to lying and/or decieving the state of
> Michigan

And yet ANOTHER out-and-out bit of Mark Morgan deceit!

I've "admitted" no such thing!

Please show the post where I "admitted" such a thing.

> he tired dening making his death threats

"tried" "denying"

I haven't made any death threats to "deny".

> He got found out on his libel issues, (he still denies then but
> admitted to geting his access terminated)

"getting"

Had WHAT "access terminated", Markie? AOL took a webpage down.
They didn't sanction so much as one second of my access to the web.

> a Busy day for stevie boy

Lie upon lie from Mark Morgan. I'd dare you to actually PROVE any
of those "admissions", however we both know they are NOT there.

You really ARE the creep I claim!

I was a tad surprised to see his candidacy announced, based on his somewhat negative casting of ARRL in the past. As, when I was ARRL Dakota Division Vice Director, and he sent this request to me..... "Now why don't you do us all a favor and take your lying, stagnated, ARRL apologist ass out of here ..."

Perhaps a leopard can change his spots.

By the way, Markie...

I find it more than a bit amusing that you have, on numerous occassions, "accused" me of "hanging on (your) every word", ready to "pounce" at each and every post.

However at each and every time I have demonstrated that I DON'T hang on your "every word", you "show out" like a three year old that can't get daddy's attention to buy him a candy bar at the five-and-dime.

There's a distinct possibility that Carl is a new person. We'll find out through the passage of the time leading up to the election. All it would take to sink his boat would be a single "Howard Dean Moment" in responding to a hot button issue.

I was referred to as a jackbooted thug, a Nazi and worse by him in the past. We were all treated to "beeper", "jumping through hoops", "hazing ritual", "electronic paintball wars" and the like. I have to admit though, that Carl's response to my recent posting of a few of his past quotes was quite diplomatic in tone. I understand that Carl is actively campaigning by visiting Atlantic Division clubs. If the leopard hasn't changed his spots, it would be nearly impossible for him to keep up a false front under, what is certain to be, intense questioning from some.

The membership of the Atlantic Division will have a chance to learn about the views of the three candidates and that they'll make the best choice from the information available to them.

When I was living in Ramat Gan, that was the schedule that I maintained, two sunspot cycles ago (38 years or so). 15 and 20 meters. The US was a double hop away, and the Tel Aviv - NY commercial HF radiotelephone circuit (pre-underseas cable, pre-satellite) was the worst one we had. We had a better chance Tel Aviv - Paris or Tel Aviv - London and then on TAT-5 to New York. I was involved in the upgrade negotiations, but the Tel Aviv - Marseilles cable and eventually the IntelSat circuits came on line several years after I left.

No sweat - the folks whom I communicated with on 20 and 15 meters were available. I made the first legal ham phone patch between 4X4 and the US in 1965, and had to beat the Germans and Russian stations off with a stick!!

# 2865. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-24 21:39:35 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1124919575.298712.79380@g43g2000cwa.googlegroups.com>
Source record: 117316

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

As of 23 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1885

Indeterminate/duplicates (note 1) 94

Unambiguously Against NPRM (note 2) 507 28.31%
Unambiguously For NPRM (note 3) 1025 57.23%
Code test ONLY for Extras (note 4) 259 14.46%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and six who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 23 Aug 05 that would be 1791.

As of 24 Aug 05, there still hasn't been any notice in the
Federal Register under Federal Communications Commission on
the NPRM FCC 05-143.

In the 20 Comments received on 23 Aug 05, 10 were against, only
6 were for the NPRM. This, the 25th day of Comments, is the
first time the Against Comments were higher than For Comments.

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

not for

>didn't make it.

Sometimes an imposter can hang around a long time if he's got
a knack of diverting attention from himself to others. That
is what Dudly does in here.

For a while, Dudly was "communications officer" of a
Tennessee State Guard unit with a "title" of "1st Lieutenant."
[TN State Guard is NOT affiliated with federal National Guard]
Had his picture in the State Guard web pages. For a while.
Then it wasn't there anymore. Stebie claimed he "had to move"
and other things. But he quit mentioning his "commission"
soon afterwards. Sound suspicious? :-)

There's Dudly's famous foray into civilian electronics
"engineering" for a few months...as a Purchasing Agent. A
Purchasing Agent just doesn't DO a single bit of engineering
yet Dudly could "tell us all about it from his 'experience.'"
Didn't last a half year. Even then he would get confused on
which "division" he was in. Why so SHORT an employment?

Perhaps Dudly really has a private pilot's license. But,
having once been keen on private flying as a fun thing to do,
and then being around aviation while engaged in designing
civilian and military avionics, I've NEVER heard a private

pilot refer to themselves as "pilot in command!" That's a
USAF thing for high-rankers entitled to wear wings with the
laurel wreath around the star above the shield on their wings.
He is in a TN CAP unit "flying missions" involving search-and-
rescue. Ahem. Like there's a LOT of flying around TN? :-)

Dudly LOVES uniforms. On himself. Scrubs, cammies, or a
one-piece "flight suit." Doesn't matter...as long as it
makes him look IMPORTANT. He be a "somebody."

That "somebody-ness" is not unusual in the hobby of amateur
radio. Licensees are "federally-authorized" and they have to
pass a TEST! Some consider themselves VITAL to the nation
in emergencies when "all else fails" and they can save the
day by heroic morsemanship...the only mode that gets through!
[geez]

>claiming to be K4YZ in this newsgroup isn't Gunny Robeson.

Well, there IS a Steven James Robeson in the FCC database for
amateur radio licensees under granted callsign of K4YZ. From
there on we have NO evidence to support Dudly's claims of USMC
service other than his "word."

There IS a registry with the state of Tennessee for a Licensed
Practical Nurse (LPN) with the name Steven James Robeson. Not
for an RN (Registered Nurse) as would be common in California
for ER (Emergency Room) work. Agreed that there are differences
between states on medical organization/procedure but it is
UNLIKELY that "lower-ranking" nurses would be directly involved
with ER work. [I know some medical people in California,
including two MDs, who say that is unlikely] We don't know if
Dudly is employed right now or even where he is employed as an
LPN...not unusual since our "renowned historian of amateur lore"
in here refuses to give the name of his engineering employer.

> If the
>-real- Gunny Robeson is K4YZ then this imposter is stealing both his
>military history -and- his amateur status.

Not an idle matter for military. They DO have rather complete
information on military personnel and agencies who can investigate
fully. For amateur radio it can be an idle matter since amateur
radio is essentially a hobby, a personal radio activity done for
recreation. Amateur radio is NOT a "vital service for the
nation" regardless of the fantasies of some individual hams.

Corroborating evidence would be old documents. Paper isn't as
ephemeral as electronic data but it can be faked. However, it
is fairly easy to see where old forms have been "touched up" to
insert other data. A DD 214 form has been relatively unchanged
in 50 years, for example...the major change being in that old
military records were typed in by manual typists...as were old
government forms such as license certificates. It is almost
IMPOSSIBLE to fake/substitute/distort old books and periodicals
that were printed in thousands of identical copies and
distributed to subscribers, libraries, and stores. Nearly all
old documents can be scanned, digitized for distribution as
proof of something...or xerocopied at a nickel a page.

> From now on I'm going to
>call him "Dudly" just to make the distinction between the real K4YZ
>and the newsgroup imposter. (The NIS should have fun with this guy!)

NIS? I'd suggest NIH (National Institute of Health). Nut case.

> Had his picture in the State Guard web pages. For a while.
> Then it wasn't there anymore. Stebie claimed he "had to move"
> and other things. But he quit mentioning his "commission"
> soon afterwards. Sound suspicious?

(1) The Tennessee State Guard (the counterpart of California's
own "State Military Reserve") IS affiliated with the Tennessee National
Guard. Tennessee State's website (under Military Department) refers.

(2) Move?

(3) I didn't continue my membership in the TNSG as they didn't
have an effective mission as opposed to the CAP.

> Perhaps Steve really has a private pilot's license.

The FAA's database is too complicated for you?

> But, having once been keen on private flying as a fun thing to do,
> and then being around aviation while engaged in designing
> civilian and military avionics, I've NEVER heard a private

Again, you're welcome to refer to the FAR's.

If you're the manipulator of the controls in a crewed aircraft or
are the sole aviator, you are the "pilot-in-command".

> That's a
> USAF thing for high-rankers entitled to wear wings with the
> laurel wreath around the star above the shield on their wings.

Nope.

That's a "Command Pilot."

Having never been in the USAF, I guess you wouldn't know the
difference...but then you don't let a lack of practical experience stop
you for a LOT of things, now do you, Lennie...?!?!

> He is in a TN CAP unit "flying missions" involving search-and-
> rescue. Ahem. Like there's a LOT of flying around TN?

As a matter of fact...there is.

AND disaster relief.

AND Homeland Defense.

AND communications support.

> Steve LOVES uniforms. On himself. Scrubs, cammies, or a
> one-piece "flight suit." Doesn't matter...as long as it
> makes him look IMPORTANT. He be a "somebody."

Yep...On many different levels.

Lennie, by his own admission, has only particpated in ONE act of
civil support at ANY time in his life.

The rest of his life has been spent harrassing and antagonizing
those who do.

> >What makes you think he's even a ham? It's clear that the person
> >claiming to be K4YZ in this newsgroup isn't Gunny Robeson.

Frank Gilliland is a liar. Or a fool. I am torn as to which might
be more appropriate. Maybe both?

> Well, there IS a Steven James Robeson in the FCC database for
> amateur radio licensees under granted callsign of K4YZ. From
> there on we have NO evidence to support Dudly's claims of USMC
> service other than his "word."

As much as we have YOUR "word" about your service in the Army in
1953.

> There IS a registry with the state of Tennessee for a Licensed

Oh?

I used to WORK in hospitals in Southern California (Hoag Memorial,
Irvine Medical center) both of which employed LVN's (CA and TX use the
term LVN...The other 48 use "LPN")

> [I know some medical people in California,
> including two MDs, who say that is unlikely]

Unlikely in THIER facilites, perhaps.

Quite common elsewhere.

Classic narcissism -- he thinks the uniform will command the respect
he thinks he deserves. And by looking through a few of his posts it
looks like he has a 'wannabe-hero' complex as well. But I really think
this newsgroup facade is just the tip of the iceberg. How much you
wanna bet he has a Crown Victoria with door-mounted spotlights and a
light bar in the trunk?

<snip>
>> If the
>>-real- Gunny Robeson is K4YZ then this imposter is stealing both his

Certainly not. The Master Gunny I called up the other day was really
adamant about checking out Dudly's story.

<snip>
> A DD 214 form has been relatively unchanged
> in 50 years,

While I was hashing out Kerry's record with Dave Hall (N3CVJ) it
became obvious that the DD-214 was used for both discharges -and-
transfers until around 1980 (official title: "Report of Transfer or
Discharge"). That's how the Rove/Bush campaign managed to confuse the
public regarding Kerry's service -- using shill blogs (and sheople
like N3CVJ) to suggest that Kerry's records were somehow forged or
faked. Anyway, Gunny Robeson should have more than one DD-214. Dudly
has claimed to have only one. Looks like he flunked again.

I have a microfiche copy of both my SRB and medical records. They were
sent to me after my final discharge. It's pretty hard to retouch a
hundred or so pages crammed onto a 4' x 5' negative.

And by that you are infering that I do that, eh? Give me an example.
Besides a quote from Lennie that is.

>Discharge").

Correction: I checked my own DD-214 and the 'edition' date is 1 JUL 79
and entitled "Certificate of Release or Discharge from Active Duty".
So it has changed over the years but not much -- the only difference
is that they don't use it for transfers anymore.

Hey, hey, hey! I had an anemometer with a star and a laurel wreath
around it but it didn't entitle me to be "Weatheman In Command."

Pffft.

It was the "master meteorologist" badge.

> He is in a TN CAP unit "flying missions" involving search-and-
> rescue. Ahem. Like there's a LOT of flying around TN? :-)

Steve likes to volunteer for things where there's nothing to do...
"A" NCOIC, for example.

No decent "old phart" resorts to derogatory diminutives in his dealings with other people as Mr. Anderson has habitually done. You might want to think carefully about who you would really want to emulate when you become one yourself.

Dee D. Flint, N8UZE

Heh heh. It comes out in some of his other remarks, notably the personal insult kind: "You think you're so important!" - I've never assumed MY "importance" in much of anything done over the last seven decades. Dudly remarked more than once that "I just swept floors in aerospace [industry]" or that I was "just a technician." Well, I HAVE swept a floor or two and, in early years was an electronics technician but I worked my way up to being a Senior Engineering Staff employee with a load of responsibilities such as being the final sign-off on drawings' title blocks for a project I was assigned to, as engineer or project engineer. Those are typical remarks Dudly tried to put down in here. He wants to diminish ANY accomplishments of others that he deems are his "opponents."

Dudly went on at great length about how Ham Radio magazine went "defunct" after I was on its staff as Associate Editor. Ham Radio was IN BUSINESS for 22 years as an independent ham radio oriented monthly. It is still regarded as the superior periodical for radio technology (in practical and theoretical ways) in North America. It never had the support of an entire membership organization to back them up monetarily (as does QST or QEX). The advertising monies were tightening up in the late 1980s and, without ad sales, an independent periodical can't operate. Seeing the handwriting on the ledger sheet, co-founder Publisher Skip Tenney decided to sell everything to CQ in 1990. CQ would have to drop its spin-off monthly, "CQ VHF", due to less and less ad sales. Even "73" magazine had to shut down completely. BUSINESS conditions. Dudly (and a few other duds in here) snarled and spouted about "defunct! defunct!" like it was a moral-negative condition. Both

CQ and ARRL still sell 3-disk CD sets of all 22 years of Ham
Radio's articles for $150. Not quite as "defunct" as they want
to demonstrate.

In this Los Angeles area, it's not unusual to have a few dozen
Crown Vics all dolled up as "official 'to protect and serve'"
police cars. Several rental companies have them for movies and
TV location shooting. A grip I met once said he'd bought a
banged-up prop cop car from a rental company for his personal
vehicle...said he made a mistake of keeping the paint black and
white and the slogan on the side (but not the Mars Light bar or
the City of L.A. logo on the door)...a BIG mistake he said...he
got tickets for ALL kinds of things, moving and stationary
violations, was hauled out and frisked more than once. He had
to spend extra money to repaint the car "more civilian." Was a
good vehicle even when he had to install smog controls that went
into effect here (real cop cars were exempt from that). LAPD are
fussy about imitators here, even IN the entertainment industry,
and DO do things about those who are pretenders.

>has claimed to have only one. Looks like he flunked again.

I was referring to the general nature of the form. :-)

Can't help you on later editions. My single DD-214 form is dated
1 Jul 52 and was filled in at Fort Sheridan, IL, in February 1956.
Back then its title was "Report of Separation From the Armed Forces
of the United States." Other than an acknowledgement from the
Winnebago County, IL, draft board on status change to "reserve"
(inactive) received shortly thereafter, the only other form I got
was the Honorable Discharge certificate in April 1960. Not a fancy
certificate, either...:-)

I carry around a credit-card-size reduction of my DD-214 for fun,
have used it as local proof (needs a magnifying glass to see the
detail). Once got into a conversation with a Vietvet at a party
who had gotten a similar laminated reduction...he got out in '74...
we compared forms and they seemed to be very nearly identical.

Ow! Mass-reduction 'fiche! I'm used to the "IBM punch card 'fiche"
which have only one image on the card, for drawings...or the library
style 'fiche film reels, one newspaper-page-size image per frame.

per fil

In truth, I've never met many MARS military personnel so I have
NO idea what "Assistant" Non-Commissioned Officers In Charge
would do. I suspect it is on par with "communications officer"
in a state guard unit (not affiliated with National Guard)...get
together with "the boys" once a month and play sojer.

>> Dudly LOVES uniforms. On himself. Scrubs, cammies, or a

If this were the 1930's, dan would be a dangerous man. Besides serving
hitler in the search for evil jews, he would also be pursuing cb'ers who
want an amateur license...

Steve lies. Here's proof:

---
Brian said: "There never was an insinuation, Mr. Robeson. It was a
case of your
misunderstanding and a dose of your wishful thinking."

Then Steve said: "I don't think that your previously archived comments
might be
read that way. For an offense to have occured, it onl;y requires that
it be
perceived as such."
---

So, was Steve lying then, or now?

Tsk. Poor Dee is miffed and a half because I didn't liberally apply
nice-nice oil to her transcript of recorded ARRL maxims some time
ago. Her feelings are still hurt. Boo hoo.

>> You might want to think
>> carefully about who you would really want to emulate when you become one
>> yourself.

Tsk. Dee's vision suffers extreme League-induced astigmatism.

The PCTA are about as OLDE-PHARTE as one can possibly be. Look at
them: A middle-aged-going-on-ninety "renowned historian"
desperately wanting to come across as numero uno guru; a nearly past
middle-aged snarlygram-spouting "veteran of the holy foreign
service" who thinks his velvet glove is an iron fist; a middle-aged
"veteran of foreign wars" spouting off like it was well-drink time
at the Legion Hall; a past-middle-age hoagie-muncher who shot bears
for navel intelligence. Then we have the female acolyte worshiping
at the Church of St. Hiram repeating the beloved maxims of the
order as if she were mama superior.

All must do as they DICTATE. In a hobby. All who do not obey are
sub-human for they believe intelligence only shines through
morsemanship. All will have fun whether we like it or not...

Wow. Show some individuality, some freedom of expression, some free
thinking OUTSIDE of the cloister and they become unglued, unable to
cope with new thoughts, new ideas, differing opinions. All must be

as ordained by the Ancients, never ever to be changed...

Amen.

all sam

There weren't any cb'ers in the 1930's.

It's the Cavalry to the rescue! Kind of ironic (and suspicious) that
you two suddenly come to defend Gunny Dudly from a shitbird PFC, isn't
it? But hey, birds of a feather.....

The reels are bad enough, but the 4x5..... I can't even read it by
scanning it at 1200 dpi! I would have to take it to a photo shop and
have it enlarged.

Of course we have over seven YEARS of Lennie's "remarks"
diminishing any/everyone who dared to "oppose" him...

> Well, he failed there, too. Now he has Tweedle Dave and Tweedle Buzz
> fighting his fights for him.

So Frank of Silliland shows us his true colors, not that it was
too much in doubt...

Funny how when Frank of Silliland came in here his FIRST posts
slammed Lennie as an "obvious fraud"...until it was pointed out that he
was talking about Lennie...

Frank wasn't even sure WHO he was "dissing".

Of course you make the sarcastic commetns about anyone who may
have something in support of me as being "Tweedle..".....

But I wonder where that leaves YOU IRT fighting Lennie's and
Mark's fights for them, Frank of Silliland...?!?! Afterall, that IS
your only purpose here.

> <snip>
> > LAPD are
> > fussy about imitators here, even IN the entertainment industry,

Judging by your interactions with Lennie, I'd say that should be a "Brown Nose" card. Being someone's yes-man isn't a USMC MOS, but I bet you were good at it.

You seem to have it down pat here.

Steve, K4YZ

# 2913. Summary Of Mark Morgan Deceit...Why Does He Highlight His Silliness This Way?

I didn't get "caught", either.

You believe too much of Lennie's lying, Markie.

> > > He admitted to lying to NG about his rants over the years about lying
> >
> > "He admitted to lying..."
>
> you admitted that your rants about lying being a sickness were NOR
> medcial

"NOT"

What "rant"...?!?!

Just because something is not to your liking does not make it a
"rant", markie.

And lying is NOT a medical condition...It's psychological.

> therefore you have been lying when you claimed it was your Professional
> opinion I was mentaly ill becuae I lie

"mentally" "because".

You can be in perfect PHYSICAL health and still be psychologically
ill, Markie. Ask your 'dontor'.

> > A Mark Morgan lie in and of itself. You've outdone yourself this

No, you didn't.

I NEVER said I had ANY "access terminated", Markie...

Proof? Quotes?

> > > a Busy day for stevie boy
> >
> > Lie upon lie from Mark Morgan. I'd dare you to actually PROVE any
> > of those "admissions", however we both know they are NOT there.
>
> Oh you dare me.
>
> Come grow up little boy
>
> already porven it all

"proven"

You've not "proven" anything.

You're like a kid in a sandbox arguing over some perceived
infraction of getting hit with sand...

"DID NOT!"..."DID TOO!" "DID NOT!"..."DID TOO!"

No PROOF, mind you...just silly accusations with unfounded
assertions of "I proved it"...

> with your help of course

With nothing....

You're making up lies, Markie...

They are adding up to your OTHER lies.

# 2914. Frank of Silliland's True Agenda Exposed...BY FRANK!

Well...there we have it.

Some lowlife who never made it to an NCO rank taking those swipes
at a SNCO, albeit no longer on active duty, that he never would have
dared while he WAS on active duty....

And now making allegeations that the comments of others is
"suspicious" because it flies in the face of his "grand entrance"...

The SUSPICIOUS part, Frankie, is why you suddenly show up in an
Amateur Radio newsgroup with no other agenda than trying to undermine
my credibility with lame suggestions that YOU are a "credible" source
and that YOUR take is one of validity.

I think your own self-assessment of "####bird PFC" says it all,
Frankie my boy!

Frank...You have singlehandedly managed, just like Lennie and his
crew, to put yourself where you belong...In the "Liar and Loser"

category.

Make yourself at home.

Steve, K4YZ

Absolutely "at all"....

> I clearly confess I lied about my rank . I also explained why I did so

The bottom line being you lied...

You were never a Colonel...

You were never a Lieutenant, Second, First, Junior Grade or
otherwise.

You were never in the Armed Forces...Oh, I have no doubt you may
have tried to get in...Even may have worked as a civilian on a base
somewhere, but you were never a Veteran.

> > But we all clearly remembered, "Colonel"...
>
> ah yess the blame everyone else for your error tactic stevie Guess Len
> was right

There's no one else to blame for YOUR lies EXCEPT you, Markie...

> You are the one caught with your lies hanging out

No lies here, Markie.

Just laughing at yours!

If underacheivement isn't not having passed element 1C, then you must be labelling wanting to operate phone atall as underacheivement? So you don't like phone ops - at least we are getting down to your true colours!

> Those who have had a phone QSO pop up on top of their CW QSO on or
> about 7040 late at night may understand this a little better.
>

Those who look at the IARU bandplans will see that a phone op on 7040 is in the right place in many countries. Even here in region 2 phone extends down to 7050.

Well, maybe.

Interesting race - the incumbent isn't running again (due to health, I
think) and there are two other candidates.

> > I was a tad surprised to see his candidacy announced,
> > based on his
> > somewhat negative casting of ARRL in the past.

I wasn't surprised at all. It's been clear for 5 years plus
that FCC was sold on complete elimination of Element 1. NCI's
work in the USA is about done. Logical next step for him.

> > As, when I was ARRL

Was it Carl who wrote that or Len Anderson? There was a time when their styles were quite similar. But Carl calmed down and cleaned up his act about 5 years ago.

Maybe it was his exposure to W1RFI and some others. Maybe it was his anti-BPL work, maybe it was his upgrading to Extra and getting a 2x1 vanity call that caused the change.

> We were all treated to "beeper", "jumping through
> hoops", "hazing

>
Yes, we will. ;-)

Maybe a lot of folks will join ARRL in order to vote for WK3C. Maybe a lot will join to vote against him. Maybe the whole Morse Code test issue isn't such a big deal to the majority of members in the Atlantic Division, or maybe they see it as a done deal and time to move along.

In any event, we haven't seen any of those 'HD moments' in many a year. And that's a good thing.

None of this is an endorsement for or against WK3C in his run for the Directorship. Just some observations.

I am pretty sure that those epithets were strictly Lenniesque. I
remember some heated exchanges with Carl, but never remember him
falling back to Third Reich references.

In either case, Good Luck to Carl...Stepping up to an elected post
in ANY volunteer organization can be a very fulfilling experience.

You forgot to leave intact where I said it IS a psychological issue, Markie.

Chronic lying IS a mental health issue.

You ARE a chronic liar.

One can be in perfect "physical" (read that "medical") health all-the-while being a mental train wreck.

That you tried to pawn off THIS post as some sort of "evidence" that I "admitted" something to which I had never said in the first place IS evidence that you are a liar.

The same kind of guy that I try to avoid being...the loud mouth at the end of the bar telling everyone how he stormed the beaches...Laguna Beach...Redondo Beach...Panama Beach...

Didya catch the part where he says he was ONLY a "####bird PFC"...?!??!

Sheesh...even Lennie made E5...

I made Lance Corporal before I could get the "cash sales" smell out of my uniforms...Corporal on the second round of cutting scores (and that was in the rank-tight Avionics MOS of 6616)...Sergeant in less three years of my arrival in boot camp...

Some resource on USMC policy Frank of Silliland turned out to be!

I see that you are just as deficient in quantitative reasoning skills
as you are in qualitative reasoning skills. To wit: From 1955 to 1979
the DD-214 was used for both transfers and discharges. Dudly claims to
have served from 1974 until 1992, and therefore would have served five
of those years during the time when the DD-214 was used for transfers.
The only people who stay at one duty station for five years or more
are high-ranking uppity-ups. Therefore, Gunny Robeson would have at
least one (and probably two) DD-214's -in addition to- the DD-214 used
for his discharge. Dudly only claims to have -one- DD-214. Therefore,
Dudly is -not- Gunny Robeson.

Did you understand that or do you need me to draw you a picture?

It must have been Len's work. I apologize to incorrectly attributing
such statements to Carl. I searched and found only a couple of similar
things which could be traced to Carl:

1996

"Discipline and blind acceptance of dogma are crucial if your idea of
government is the jackbooted, indocrinate the youth, cram 'the way'
down everyone's throats whether they like it or not because we say so"
form of government ... that seems to be the pro-code ideal in many
cases ..."

1997 to Mike Deignan:

"That you pro-coders wish to limit participation in the debate to
only incumbent, coded hams shows your EXTREME need for control and
your EXTREME lack of good faith in these debates. Your tactics
border on Fascist/Totalitarian_dictatorship (gee, that's a LOT like
the ARRL BOD as I think about it ...) in nature, because you seek
to eliminate/ignore all voices who dare utter opposing views."

1998 to me:
"It would seem that your *facist* beliefs would preclude the
possibility of freedom of choice in such matters when that
choice would disagree with your personal preference, even
though that choice would have virtually NO impact on you."

and

"Right Dave ... and everyone who has ever been accused of war crimes
tried to use the excuse 'I was just following orders. It wasn't *MY*
fault.' Wrong is wrong ... and your tacit support of the maintenance of
tyranical Morseodism marks you amongst the guilty despite your
protestations to the contrary."

Additionally, I ran across a couple of Carl's past statements on the
League and its officials:

From late 1997:

"What part of that surprises you??? Sumner is a weasel and all he cares
about is begging for more money so he can make sure his paycheck doesn't
bounce."

and

"I hope it made you feel better to 'vent' ... because I'll bet money
that that was all the exercise (telling your ARRL BOD member how you
felt) was good for ... I have YET to find one who gives a damn what
anyone else thinks ... maybe one exists, but I sure haven't found him/her."

and

"I have yet to find a BOD member who has a good answer for ANYTHING, Gary."

and

"So he's a typical ARRL official ... backward and clueless."

and

"The BOD member I am talking about is EXACTLY like that ... he has NO
vision whatsoever ... he comes across nice, and he's probably worked
DXCC, but he is totally clueless about anything that is more than
minimally technical and he has all of the leadership instincts of a
sub-average lemming. But he's SO nice ... in a
Bill_Clinton_slick_politican/really_smooth_used_car_salesman
sort of way, so he keeps getting elected."

Sure, Frank. I understood what you wrote. I just can't accept it as fact. My DD-214 (you know, the full-sized one which I don't carry around with me), issued in 1972 says nothing about transfers. It is the only DD-214 issued to me in four years of service. I had three transfers while in the Air Force. None were on a DD-214. Go figure.

What we REALLY ahve here is some mealy-mouthed newsgroup mercenary
who thought he could through some 'nomenclature" around and impress
folks.

Didn't work.

Back to Silliland, frank.

You did nothing of the sort.

You might as well draw a picture, Frankie...crayons or
watercolors?

In either case it will look as infantile as your efforts to
belittle MY service in the United States Marine Corps.

That makes two of us.

The Sergant Major of the Marine Corps would fall off his chair
laughing at some silliness like that!

But of course Frank IS rom Silliland, so I bet he's used to it!

The ONLY DD-214's I received in the USMC were at re-enlistments
and my final -214.

The -214 is NOT a "transfer" document except to "transfer" from
Active Duty to severence or retirement.

I never said I "called" anyone, Markie.

> to whom Stevie

Why, Markie?

If they decide to act on it, you'll be given your opportunity to
answer it.

Should I tell you I have no doubt you'd try to call and
intercede...But then you'd only substantiate my claims of your
paranoia.

And you don't want THAT, do you...?!?!

No, I don't think you see at all; I'm saying that the person in this
newsgroup posting as N4YZ is not Gunnery Sergeant Steven J. Robeson,
USMC Retired. As far as I know it's you posting as K4YZ (seeing as how
you two tend to post at almost the same time of day).

Nope and nope.

But your continuous ranting about it certainly substantiates my
claims that you are paranoid.

> > > > > no way that is anything but a death threat
> > > > >
> > > > > It's a lot of things...A death threat isn't one of them.

> >
> > shots do not always involve gun or killing

No, they don't.

But afterall, Markie, YOU have stated it's not what the "spaeker"
intended, but what YOU perceived...

A "shot" in the context you made YOUR comment, especially
considering my military service, either meant a firearm or a punch...In
either case, a violent act.

> > > nothing to with the topic "Cw it more than just a mode"
> > >
> > > What were you doing making slanderous comments?
> >
> > I was not making one

Here we are again, Markie. YOU have stated it's not what the
"spaeker" intended, but what (YOU) perceived...

So...does that concept NOT apply to YOU...?!?!

> can't have been I could have been making libelous one, but I was doing
> that either

Sure you were...

The tone, content and delivery of your comments were ALL meant to incite and inflame. No more...no less...

Steve, K4YZ

>
> No correction no apology

Sure there was a correction.

Show me JUST ONCE from that posting forward where I have made the same error, Markie...

> you don't go making a guy look for an apology
>
> cut the repeat

The "repeat" here is YOU looking to make something out of nothing in order to validate your "victim" status.

> > I did. Told you EXACTLY where it was.
>
> No you did not

Yes I did.

> since your posts don't hit the usene tin the oerder you send em
> sometimes they spread apart by several hours

Sure they hit USENET in the order I sent them!

Usually within 30 seconds.

> another stevie lie

No...Another MARKIE lie!

And allow me to RE-INSERT part of what you "cut" as a "rep"...

(What it IS is YOU refusing to acknowledge that the ERROR you claim I am making was never addressed...)

QUOTE:

> > > > WHERE, since then, have I mistyped your callsign?

You didn't answer the question, Markie.

WHERE SINCE have I made that error?

I did it and it was an accident. I acknowledged it.

UNQUOTE

Are you going to acknowledge and answer the question, or just keep "cuting" it, hoping no one sees you dodging the facts...?!?!

> > > what you going to do threaten to report me again?
> > >
> > > You are the little kid screaming that someone said a bad word

> then why do you ?

I don't. That I so easily unravel your tales is proof enough.

> > When I typo'd your callsign, it was an accident and I acknowledged
> > it.
>
> I don't believe it was an accident, here is newsflash I don't believe

> much of what you say

No newsflash needed, Markie.

People who chronically lie like you do do so because they
can't/won't deal with reality or truth...

> > You're doing this maliciously.
>
> I am doing to porve a point no malice

There's MORE of your cutting stuff out but commenting on it
anyway...

Allow me to re-install it.

> cut

More embarrasment to avoid, eh, Markie?

> > So here we have and OVERT acknowledgement of an "Attack"...
>
> yes
>
> >
> > BY YOU on ME.

> you use people all the time you were using and abusing me when I wasn't
> here, without my consent

I don't "use" anyone!

I don't "involve" anyone who isn't in this forum.

And like it or not, your PREVIOUS lies, deceit and conduct in this
forum are part of it's archives!

> > Nope.
> >
> > > you are choosing to abuse the poor fellow you claim to feel for rather
> > > than be man and apologize for your mistake
> >
> > Already acknowledged the error, Markie.
> >

For what? To whom?

> > > do yourself a kevorkian
> >
> > Nope.
> >
> > > That is, afterall the only way Stevie Robeson will ever stop lying.
> >
> > I'd have to start in order to stop.
>
> you started long ago

Nope.

> I just posted proof of another of your lies

To post "another" there'd have to be a first.

Now...let's see if we can get Markie to REALLY answer the
questions I posed above...How many did he "cut"...?!?!

Steve, K4YZ

## 2935. "Policy" Question

Newsgroup: rec.radio.amateur.policy

> dying of the heat) If the stae isgoing to dole it out I'll take it, but
> back to the subject...(SNIP)

Up to the point where I snipped it, 110 words without a period.

"eligible" "qualify" "assistance" "unseasonable" "state"

> (the state wants to keep the old and infirm from being cheap and
> dying of the heat)

So what you've said here, although I am sure your intent was
otherwise, is that the State of Micigan considers the ill and elderly
who die of the heat to be cheap...Perhaps they died so as to not have
to pay thier utilities?

> discussed Stevie with the caseworker went online
> and show her some of Svierants and threats and indeedlooks a protective
> order against will be put in place, which just allows me more options
> in selfdefense, since as Stevie does correctly point out the law hardly
> matters to someone like Stevie

"Svierants"...?!?! WTF was that?

And I DOUBT with all seriousness that there will be ANY kind of an
order put in place...Just like there was never an offical "order" from
"Colonel Morgan" received.

If there is, I then have actual grounds to file a CIVIL complaint
against you.

It's illegal to file for an order of protection under false
pretenses.

This is nothing more than your "I am a Colonel" ruse to "flumox"
me.

Nice try.

Steve, K4YZ

"whopper"

No, it wasn't.

> > Usually within 30 seconds.
> >
> cutting massive waste of Badnwidth

"bandwidth"

Right back in your face, Coward:

QUOTE:
> another stevie lie

No...Another MARKIE lie!

And allow me to RE-INSERT part of what you "cut" as a "rep"...

(What it IS is YOU refusing to acknowledge that the ERROR you
claim I am making was never addressed...)

QUOTE:

> > > > WHERE, since then, have I mistyped your callsign?

You didn't answer the question, Markie.

WHERE SINCE have I made that error?

I did it and it was an accident. I acknowledged it.

UNQUOTE

Are you going to acknowledge and answer the question, or just keep

"cuting" it, hoping no one sees you dodging the facts...?!?!

> >
> There we have it ladies and gents

There we have WHAT, Markie?

Do you not know the difference between a medical license and a
nursing license, Markie?

Sure does seem like it.

You've been unsuccessfully trying tie "medical" and
"psychological" health together for the last week now...Now you're
trying to say I've "lied" about my LPN license because I acknowledge
that I don't have a medical license?

That's why Nurses get their licenses from a "Board of Nursing",
not a "Board of Medicine", Markie.

Get a paper towel and wipe the egg off your face, chump.

I didn't get "caught", either.

You believe too much of Lennie's lying, Markie.

> > > He admitted to lying to NG about his rants over the years about lying

> > "He admitted to lying..."

> you admitted that your rants about lying being a sickness were NOR
> medcial

"NOT"

What "rant"...?!?!

Just because something is not to your liking does not make it a
"rant", Markie.

And lying is NOT a medical condition...It's psychological.

> therefore you have been lying when you claimed it was your Professional
> opinion I was mentaly ill becuae I lie

"mentally" "because".

You can be in perfect PHYSICAL health and still be psychologically

ill, Markie. Ask your 'dontor'.

No, you didn't.

I NEVER said I had ANY "access terminated", Markie...

Proof? Quotes?

> > > a Busy day for stevie boy

> > Lie upon lie from Mark Morgan. I'd dare you to actually PROVE any
> > of those "admissions", however we both know they are NOT there.

> Oh you dare me.

> Come grow up little boy

> already porven it all

"proven"

You've not "proven" anything.

You're like a kid in a sandbox arguing over some perceived
infraction of getting hit with sand...

"DID NOT!"..."DID TOO!" "DID NOT!"..."DID TOO!"

No PROOF, mind you...just silly accusations with unfounded
assertions of "I proved it"...

> with your help of course

With nothing....

You're making up lies, Markie...

They are adding up to your OTHER lies.

UNQUOTE

So, Markie...there were SEVERAL items in there where you made
UNFOUNDED ALLEGATIONS. You were asked to substantiate them, but all
you did was "cut" them.

So...Do the "rules" apply to Markie Morgan like the rest of us?

Or is it "OK" for you to make obviously untrue and unfounded
allegations because you're a "victim"...?!?!

Steve, K4YZ

# 2958. Hey Markie...Do The "Rules" Not Apply To You Too...?!?!

Nope.

You've blatantly lied in recent days stating that I have
"admitted" to have been "dischaged" for the Marine Corps for mental
health reasons.

> Since Of Course I have not confessed to lying about Stevies mental
> discharge, Stevie has lied about the facts.

Yes you HAVE lied about the nature of my separation and yes you
HAVE misrepresented the truth CHRONICALLY.

> Even if I were lying I have not confessed to it.

But you already HAVE confessed to it, Markie!

You've stated, point blank, that you lie, you consider it "normal"
to lie, and that you will continue to lie at will.

> and I am not lying I believe based on Stevie own
> words that Stevie has received a mental discharge once known formaly as
> a section 8 now with some other name, but still often called a section
> 8

There's a "Section 8" here, alright Markie...In Michigan.

> If Stevie had said "Mark is lying..." then he could claim with some
> basis to be stating an opinion or he could claim he was stating fact,
> but in stating "Markie confesses to lying about mental dischage from
> Marines (if he could SPELL "discharge"...)" he lies on the basis of
> fact

Nope.

My statement IS fact...You are LYING about my having been
dischaged from the USMC for mental health reasons.

> How you do tolerate yourself.

Easily.

> Liar
>
> Fraud.
>
> Coward.

None of the above. But I've got YOU dead-to-rights on all three.

No lie at all

You admit you were discharged medicaly then you deny it was physical
therefore it must be mental
>
> > Since Of Course I have not confessed to lying about Stevies mental
> > discharge, Stevie has lied about the facts.
>
> Yes you HAVE lied about the nature of my separation and yes you
> HAVE misrepresented the truth CHRONICALLY.

more stevie lies

I have teaken Stevie at his word dangerous I agree

and No i have not misrepresented Stevie posts

Nor have I admited to any lie

>
> > Even if I were lying I have not confessed to it.
>
> But you already HAVE confessed to it, Markie!

No I have not

Nope
>
> You've stated, point blank, that you lie, you consider it "normal"
> to lie, and that you will continue to lie at will.

Not exaclty but this has nothing to do with the the subject

>
> > and I am not lying I believe based on Stevie own

Not at all

But your effort to relate everything to sex simply are improper in this
NG

Not at all embarrished to Bisexual, but it has NOTHING to do ham radio,
or my character for that matter

No matter how many time you lie and say it does

That a Nursing license is a Type of medcial license, just like MD is is
type of medical license

there if you have No Medcial you have no Nursing license

You blew it and I caught you

get over and fess up and move on

cuting the BS

# 2971. IARN AND AARA BROADCAST AND POLICY STATEMNT

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-25 19:12:55 UTC
From: netmanager2@yahoo.com
Message-ID: <1124997175.354463.184430@g44g2000cwa.googlegroups.com>
Source record: 117373
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.cb

INTERNATIONAL AMATEUR RADIO NETWORK (IARN) AND AMERICAN AMATEUR RADIO ASSOCIATION (AARA)BROADCAST OWNERSHIP AND POLICY STATEMENT

IARN is a non commercial sister organization of AARA. IARN's Amateur Radio short wave, two meter, satellite and internet bulletin service is available to AARA directly and all other Amateur Radio organizations indirectly through its AARA owned and operated affiliates Amateur Radio Newsline, RAIN and ANS. The amateur radio public has instant and direct 800 number access through the daily talk show. All radio amateurs worldwide are required to listen daily.

IARN is governed by the IARN Amateur Radio Peace Corps Foundation, Inc. which has a Board of Directors who appoint IARN's Manager (currently Glenn Baxter, K1MAN). IARN also has 501(c)(3) tax exempt status with the IRS.

IARN has free lifetime memberships, Directors, International Amateur Radio Clubs around the world, and a free newsletter The International Amateur Radio Digest. IARN's primary purpose is emergency communications and its secondary purpose is to maintain the IARN Bulletin Service and support AARA via access to this service.

# 2980. N9OGL comments on K1MAN taken from QRZ

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-25 20:31:02 UTC
From: N9OGL <toddaug555@yahoo.com>
Message-ID: <1125001862.360165.195270@g43g2000cwa.googlegroups.com>
Source record: 117382

Hello everyone, I see there is another discussion on K1MAN. I am currently working on a petition to send to the FCC regarding K1MAN. This petition is real not for K1MAN nor is it against him. I mainly wish to bring some of my concerns and questions to the commission. I am currently as I stated working on it but here is what I've got so far.

I. Broadcasting and Information Bulletins

1. N9OGL believes that the FCC should clarify the rules regarding Information Bulletins and Broadcasting.
2. N9OGL questions the FCC decision regarding K1MAN "broadcast" was this decision "content-neutral" and how does the decision conform to Section 326 of the Communication Act of 1934 and the First Amendment?

II. Pecuniary Interest

1. 97.113(a)(2) prohibits ANY amateur station from making money direct or indirect from the amateur service. N9OGL questions while K1MAN made money directly the ARRL and its W1AW is making money indirectly how is one allowed to do it and another isn't?
2. What is the FCC definition of non-commercial radio? Because it seems that the definition has an arbitrary assortment of definitions from one service to the next.

Todd N9OGL

Indeed But you over look the hidden escape clause printed in that
secret Maraudars Map (with adknowledgement to the Harry Potter author)
Of Part 97

Noen of the rules applies to those dreaded and powerfull foes that we
are warned about in the english book of prayer , "the Wrathful
Morsemen"
> > ----------

Depends on your definition of fighting. I think you would at least be left with Mike Coslo, John Smith, Jim (N2EY) and myself as we at least try to have interesting debates rather than fights.

Well at least I have the gonads to use a real call and name.

First off asking for a CW only segment is not all that far fetched. I have
been trying to work on 40 cw ever since the ARRL came out with the latest
"gentleman's agreement" of allowing digital to operate within the CW ranges.
Total failure. So why should I expect anything better? Of course BB you
wouldn't know that would you? So why not just stick with what you KNOW
about? And do us all a favor.

You are obviously a product of the 1960 feel good free love society. You
were most certainly TAUGHT by them. I feel sorry for you. This actually
explains your problem. So I can't blame you for your "problems".

Don't forget to send in those dues to the ACLU.

# 2993. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-25 22:58:38 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1125010718.246410.3250@z14g2000cwz.googlegroups.com>
Source record: 117395

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

24 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1904

Indeterminate/duplicates (note 1) 94

Unambiguously Against NPRM (note 2) 516 28.51%
Unambiguously For NPRM (note 3) 1033 57.07%
Code test ONLY for Extras (note 4) 261 14.42%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and six who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 24 Aug 05 that would be 1810.

As of 25 Aug 05, there still hasn't been any notice in the
Federal Register under Federal Communications Commission on
the NPRM FCC 05-143 or WT Docket 05-235. I wonder why not?

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

>If I killfile the half-dozen guys who are always fighting in here,
>will there be anyone left?

Absolutely YES. But, they will ALL be in various Archives
somewhere, in places other than Google.*

The "killfile" feature affects ONLY YOUR particular browser's cache.
Filtering out "objectionable" postings will leave you deaf/sightless
to what others' opinions are and only reinforce whatever your pre-
conceived opinions might be. Call it a subset of bigotry...it can't
be much of anything else.

"Killfiling" is good for things like spam about things NOT related
to the main subject of a newsgroup. There it would be justified.
But, justified to eliminate opinions which are contrary to your
own? That's rather egocentric.

One major problem with "killfiling" is that OTHERS can comment at
will on what you've written...and you will NOT know about that
unless someone includes a "killfiled" person's quotes. That makes
you vulnerable to all kinds of things in addition to adding a time
delay on some particular argument. Some in here have been doing
that already. It's sometimes called the "ostrich syndrome;" i.e.,
burying the head in sand to cut out the 'awful noise' of contrary
opinions. All that gets one is sand in the ears. :-)

* There are several "private" archive sites on the 'web which both
download newsgroups and permit "discussion" on those, sometimes
yielding "challenges" from the upset/outraged/disturbed inviduals
who want to fight about a subject. Few of those archive sites have
two-way interaction with the 'web so it winds up a bunch of "locals"
thinking they are arguing with you...yet not going any farther than
the local archive. :-)

Essentially, "killfiling" is just self-deception. It may be
part of an egocentric attitude, might not. But denial that
contrary opinions exist is still just self-deception. Such may
make you feel better, but that is only inside your own head.
The rest of the world continues on, like it or not. :-)

You are, of course, free to do whatever you want.

you are

Tweedle Davie is real. Tweedle Buzzy is an anony-mouse...worse,
Buzzy taking the name of a TV show "hero" of yesteryear (or is it
a comic strip character?). I classify Buzzy as about as relevant
as "Brewster Rockit, Space Guy" or "Buzz Lightyear." :-)

><snip>
>> LAPD are

Heh heh heh heh. How about that? :-)

All I know is that mine was typed-in by a cute but robotic E-4
gal on a Saturday at Fort Sheridan. Our processing was pushed
suddenly due to an influx of others expected in from Yurp on
the next Monday (ahead of some kind of schedule they thought
they had).

Unfortunately, some yo-yo will pick that item up as some kind of
"proof" that "I never served" or something vacuous or puerile.
However, the Social Security folks, the Department of the Army,
the National Archives and Records Administration, FBI, IRS,
etc., all accept the fact. :-)

>Hey, that's a neat idea! I gotta do that, keep it right next to my
>Blue Nose card.

I bought one at Fort Sheridan in '56 for $2...was mailed to me
in a week. Impulse buy then. Has been fun to pull out when the
need arises to "prove" something to big-mouths met in person.
Laminated in plastic, it has lasted 49 years in my wallet. :-)

I would rank it FAR higher in value than some "ham radio badge"
(shield)(cop-wannabe style) that some outfit was advertising on
a ham website once. Jay-suss, imagine elevating a hobby license
to police-like status with a BADGE.

THAT kind of raddio kopp ought to be read a "Miranda": "You have
the right to remain silent...anything you do or say will be held
against you...<etc>"

Sounds like Davie Heil has one of those buzzers...

bit bit

>
>Did you understand that or do you need me to draw you a picture?

Davie needs it done in triplicate on official Department of
State forms. He was in "the foreign service," ya know. :-)

Ackshully, Davie just loves to FIGHT...but not in any continuous
day-in, day-out basis like Dudly. Davie thinks he is in some
kind of "restricted area" open only for "his kind." Davie also
totally lacks any of the diplomatic skills of the Department of
State in his postings here. Archtypical "ugly American" picture
he presents.

>>>> I carry around a credit-card-size reduction of my DD-214 for fun,

>>> Hey, that's a neat idea! I gotta do that, keep it right next to my
>>> Blue Nose card.
>>
>>What kind of guy carries a copy of his DD-214 around with him?
>
>What kind of Marine lets someone else fight his battles?

Davie was NEVER in the USMC. He claims to be ex-air-farts...plus
another bunch of Dudly-like generalities of implied "in-country"
action in Vietnam. Lots of generalities, NO specifics...save for
supposedly doing MARS work in 'Nam.

There it is interesting in similarities. At first Davie did not
mention his MARS work there. In another thread I did quote some
items from the Army Center of Military History wherein they said
that MARS radio contacts with the States were excellent for morale

purposes and did much for both servicemen and their families and friends. Later, Davie was claiming HE did MARS things in Vietnam. For the USA the Vietnam War ENDED 30 years ago...and so did the "Draft."

WE (the readers) are NOT supposed to challenge anything of this esteemed (or steamed) veteran of "the foreign service." Nor have WE any right to request any proof of HIS statements. Tsk, tsk.

I carry that little miniature DD-214 with me because I got it in 1956 then as a memento. Laminated in plastic, no bigger than any other card in my wallet, it doesn't take up much space. It IS a handy proof, easily producible, for those who challenge my time and service (a few have in-person). If they need more, I can always copy the original documents full-size, stored in my safety deposit box. So far, only personnel departments have requested that much. That miniature form is also a good conversation piece at social gatherings...:-) It also caused one "imposter" in a social group to slink away when confronted about His "exploits." :-)

>want an amateur license...

Cartoon character hero Buzz Corey remarked that there were no CB-ers
in the 1930s. Neither was there any "Commander Buzz Corey." :-)
Only Buck Rogers and the beginnings of science-fiction writing.

Buzzy baby just can't understand any allegories or analogies.

The 1930s didn't have a heckuva lot of radio of any kind except
broadcast receivers. The number of radio amateurs was small and
they made little impact on the radio world then. The "wireless
broadcasters," largely wireless coupling of phonographs to AM
radios, hadn't even started to pick up yet. Communications radio
was largely confined to the maritime world, the (many) radio
communications providers and carriers, and governments. SSB was
there on HF but nearly all of those SSB were of the 4-voice-
channel kind carrying both voice and TTY. A few police
departments were experimenting with two-way voice radios for
vehicle communications and finding it worthwhile. Aviation
radio was almost non-existant (compared to today) and the
"radionavigation aids" consisted of the LF two-antenna-lobe
"A-N" beacon. In smaller radio stations code was king. The
EM spectrum was far from being allocated beyond 30 MHz and
there would come many many changes in the near future. Morse
code skill was then a necessity in amateur radio since so few
radio amateurs had any other mode capability. The Titanic
sinking was only 18 to 28 years past the 1930s and the morse
myths of "saving lives" (via the new international 500 KHz
maritime distress-safety frequency) were in full flower.

With the beginning of the Great Depression in 1929, consumer
radio was having a tough time in the market, not much left to
play around with "technical hobbies" by many. By 1930 over a
quarter of the American work force was out of a regular job and
had to fend for themselves at whatever they could. The thought
of ANY kind of "personal communications radio" was a rare pipe-
dream...NOT possible for most of the denizens of this din of
inequity.

Buzzy-baby was born on the black and white TV tube and never really left that fantasyland. Even today he is only two-dimensional. :-)

dim two

I am providing a free guide on how to make your website rank high in the top search engines. Using this guide and the seoelite software mentioned inside, I was able to make my website - www.studiotrafficguide.com rank in the top 3 positions. (You can type "studiotraffic guide" in Yahoo, Google or MSN search to check.)

I don't know how long I am going to offer this guide for free, so download it ASAP by visiting the link below:

http://www.studiotrafficguide.com/seo_madeeasy.pdf

Be sure to read every word of it, and use the methods diligently. You'd be amazed at how well it works (especially seoelite)!

?? I'm not sure what you mean, Dan.

For decades it's been legal to operate "digital modes" (RTTY, PSK31, etc.) everywhere in the non-voice parts of the HF ham bands. Including 40 meters.

I dunno which gentleman's agreement you mean, but the ARRL "regulation by bandwidth" proposal is just that - a proposal, nothing more. Needs more work IMHO.

> Total failure.

Well, I just worked a K4 station not far from you. Nice QSO. Neither of us had high power or big antennas, but we did fine. 7037 kHz. Morse Code, of course.

btw, there were many Morse Code signals on 40 between 7000 and 7050 - and it's not even dark out yet.

> So why should I expect anything better?

Well, I hope for the best.

See you in 40, Dan.

Tsk, tsk, tsk...Dudly kept talking about his "seven hostile actions"
and implying he was in the thick of them.

I've never bragged about being IN any hostile actions. If fact,
Jimmie Noserve took me to task about being a "rear-area" type.
I guess all those books he read (to become an expert on warfare)
didn't tell him that NOBODY got to "choose" where they were
assigned. Nonetheless, I got to work real HF radio communications
for three years in a 24/7 radio station...even living IN a two
square mile antenna field for a while. [many more antennas
there than overweight "scampering" Davie can possibly put up]

I have no recollection of any "Panama Beach" in southern
California. There's Santa Monica beach (municipal beach).
There's Hermosa Beach (a city) and Redondo Beach (also a city)
and Huntington Beach (a city). Used to frequent the "Lighthouse"
in Hermosa Beach for totally great jazz on weekends and reasonable
drink prices in the late 1950s, early 1960s; they got too popular
and raised prices plus adding a ticket-cover-charge.

The "loudmouth at the end of THIS bar" is Dudly and his "seven
hostile actions" and "MARS >>IS<< amateur radio!" blabbering.

>> Didya catch the part where he says he was ONLY a "####bird
>> PFC"...?!??!
>
>> Sheesh...even Lennie made E5...

>Well at least I have the gonads to use a real call and name.

Is "W4NTI" your legal surname? :-)

We can't see your "gonads." Is having some a requirement of
being licensed as an amateur? I don't think so.

>First off asking for a CW only segment is not all that far fetched.

That is NOT a subject of NPRM 05-143 nor for WT Docket 05-235.

You CAN Petition the FCC to get a RADIOTELEGRAPHY only sub-band.
You CANNOT run Continuous Wave (CW) any longer than is required
for tune-up purposes. That's in the regulations. Didn't you
see it?

You WILL have to make a good, reasonable case for this sole-
mode segment of 40m band. Remember that the government of the
United States does NOT run solely on your personal wishes.

Meanwhile, WT Docket 05-235 is solely about the elimination or
retention of the morse code test for a U.S. amateur radio license
having below-30-MHz operating privileges. Try to remember that.

> I have
>been trying to work on 40 cw ever since the ARRL came out with the latest

Four months through the supply line in 1952 isn't worrisome enough to
require even a mild laxative. It's not like they could have downloaded
the form off the internet and printed it up on an HP. And it's still
common practice to use up old forms before popping open a fresh box of
replacements -- as long as the intended purpose is within the scope of
the old form. But I'm sure -someone- will pitch a bitch.

Yeah, some of these hams have real issues. They aren't all hams, but
for some reason they are often attracted to ham radio. A couple years
ago I tried to sell an old 16-ch Regency that covered 137-150 MHz and
would have been a great starter radio or backup for 2m. Yet almost
everyone who responded wanted to know if it could be converted to
cover the police and/or fire bands and none of them would show proof
of licensure when asked. Kinda scary to think that there are so many
nuts out there just waiting for an opportunity to impersonate a cop.

No dummy that is not what I said, or mean. It is the non CW qualified types
that just dump on top of a on-going CW communication....because they have no

idea it is a real communication. Because they can't copy it. Clear now?

And that is exactly what will happen in the event of NOT having a exclusive
CW segement.

Tell you what Jim, listen during a RTTY contest weekend. Like when the
NAQP CW is on this winter season.

It is just an example of what it will be like with massive digital action. Just watch and see.

There are no more gentlemen Jim. Take away their ability to recognize CW as a real communication method and you will have chaos. This is what I'm referring to.

Dan/W4NTI

The you are full of Bullshit I can reconize CW for what it is.

If Cw can't survive in the real world then I am all for having a wake
for it

What you are saying is that CW can't survive amoungst other modes,
plain and simple

I don't buy your CW welfare program

>
> And that is exactly what will happen in the event of NOT having a exclusive
> CW segement.

Then CW can't compete and will very properly fold, but I doubt it.

Cw Ops will just have to work a bit harder, they do Claim to enjoy a
challange

I know quite a bit about it

I know you are lobbing for protection of YOUR mode, and for the FCC to continue in some form the Morse Code Welfare State that has existed for years

There may be a case for more restrictions on robots ( am not convinced either way on that point), but no case at all for CW needing protection form ALL other mode

All the more reason to have a reasonable Morse Code only subband. Say
7000 to 7050.

> There are no more gentlemen Jim.

Sure there are! But it only takes a few bad apples to
make a mess.

> Take away their ability to recognize CW as
> a real communication method and you will have chaos. This is > what I'm referring to.

Then the thing to do is to get a place for Morse Code.

There's plenty of precedent for this sort of thing. There are sidewalks
for pedestrians, bike lanes, etc. There are large parts of state and
national parks and wilderness areas where motor vehicles are not
allowed.

Some will say "but it's 'just a hobby'". Well, camping and backpacking
are 'just a hobby' for most people - yet there
are plenty of spaces left in a natural state and protected
for those "hobbyists". Why not for Morse Code?

Don't get too carried away, Lennie. Aren't you forgetting your classic sphincter post? There was the distinct implication that you'd experienced the things of which you wrote--except it turned out that you hadn't experienced them at all.

What, by the way, was the flying time for those Soviet Bears which didn't yet exist, to your location in Japan?

> If fact,
> Jimmie Noserve took me to task about being a "rear-area" type.
> I guess all those books he read (to become an expert on warfare)

But it is true, isn't it, that you were so far to the rear that you were in a different country from where the Korean conflict was taking place?

> Nonetheless, I got to work real HF radio communications
> for three years in a 24/7 radio station...even living IN a two
> square mile antenna field for a while. [many more antennas
> there than overweight "scampering" Davie can possibly put up]

Well, grizzled old Sarge, I just put up a brand new, enormous triband yagi all by my lonesome. I'll wager I've put up more antennas in the past five years than you have in your lifetime. Wanna play some more "mine's bigger than yours"?

I got to work real military HF communications during a four-year Air Force hitch and plenty of government HF communications during a State Department career. I've used antennas like rhombics, 3-30 MHz inverted discones, double boom Collins LPA's at 90 feet and I've used magnetic loops, open wire-fed flattops with autotuners, fan dipoles and even crummy B&W "broadband" folded dipole "resistors". I've operated satellite terminals with 9 meter dish antennas and with little suitcase sat terminals. I've installed an maintained several generations of STU's and operated high speed leased lines. My stint as a professional in radio communications exceeded yours by several magnitudes.

Now, what're you using for antennas for your lil R-70 vintage inhaler?

>>> Didya catch the part where he says he was ONLY a "####bird

> Brain Kellie WAS served (by "drudges") at the captain's table!

You act as if status as a veteran is something which gives you entitlement to be condescending to those who were never in the military. Every time I see such nonsense, it seems to be from a guy who served in the rear someplace.

They are not left just for theose hobbists. Many hunderd acres ar ein
this area and never hiked to preserve the tree and lifefroms like deer
and wolves and Mtn lions

the question is why is Morse Code entitled to a such a preserve all to
itself?

And why if it is Such an EFECTIVE mode does it need the protection?

Ill be gone from sometime tommarrow so don't get your hopes up Stevie

BTW you want the turck plate number so you can to again with Wisconsin where I will be visting for a few days

I leave with few thoughts Stevie

One, grow up and learn the wolrd does not revolve around you

Two, seriously consider treatment for your Delsional nature, and your paranoia

Three, stop lying and join in discussing subjects, we have had afew over the last week of course you were to busy with your flame wars to notice

Four try to learn the difference between mental illness and being different from YOURSELF

# 3028. Re: How long are you ("you" who...?!?!) going to contiue (continue) with your bullshit about Michigan

>in a different country from where the Korean conflict was taking place?

Of course. :-) If Jimmie say it true, it must be true! :-)

Japan was not DIRECTLY involved in the Korean WAR, true. The
Occupation was over when I was assigned there. Was I supposed
to break rules, go against the UCMJ, to go to the "front?" :-)

By the way, WHERE was this "front?" You guys keep talking about
the "front lines" like it was in World War ONE. Wasn't like
that. Ask Jimmie Noserve. He was THERE...in spirit...through
his books...he read all about it.

>> Nonetheless, I got to work real HF radio communications
>> for three years in a 24/7 radio station...even living IN a two

>> there than overweight "scampering" Davie can possibly put up]
>
>Well, grizzled old Sarge, I just put up a brand new, enormous triband
>yagi all by my lonesome.

Wow! All by your LONESOME? Gee, Davie, you need to get out more.
It would keep you from being so lonesome...

You have some PROOF of this accomplishment, yes?

> I'll wager I've put up more antennas in the
>past five years than you have in your lifetime.

I'm absolutely positive you have, dozens and dozens, hundreds and
hundreds of them, more than in several mens' lifetimes. Whatever
it is, YOU did MORE. You say so and that be that.

> Wanna play some more "mine's bigger than yours"?

I don't "play" with antennas. On the big ones, I let the pros
do their jobs. They know how to erect them. I know how to
erect mine. :-)

>I got to work real military HF communications during a four-year Air
>Force hitch and plenty of government HF communications during a State

>satellite terminals with 9 meter dish antennas and with little suitcase
>sat terminals. I've installed an maintained several generations of
>STU's and operated high speed leased lines.

All by yourself? Wow! You have PROOF of that, yes?

I'll bet you were Behind The Lines in 'Nam, sending valuable intel
back to Hq, right? A vital asset to the military! Hip hip hooray!

Sorry, Davie, I didn't do a lot of radio communications (all by
myself) after my military service. I went into DESIGN of radio-
electronics, making the equipment from scratch.

>> My stint as a professional
>>in radio communications exceeded yours by several magnitudes.

Hundreds of magnitudes. Googles of them. Off the scale...

>Now, what're you using for antennas for your lil R-70 vintage inhaler?

Why do you ask? Do you need HELP? Just ask.

BTW, my Icom receiver, purchased long ago, is NOT used in the wine
industry nor for private brewing. It has no olfactory sensing
inputs. It still works well as a 50 KHz to 30 MHz RADIO RECEIVER...
is within specification as of this March.

>>>> Didya catch the part where he says he was ONLY a "####bird

>
>You act as if status as a veteran is something which gives you
>entitlement to be condescending to those who were never in the military.

Tsk. I must be subconsciously picking up YOUR attitude! Gotta
watch myself.

No, your snarlingness, I don't feel "entitled" to condescension.
That's YOUR schtick. I DO feel absolutely ENTITLED to cuss out any
sumbish who wants to meanmouth whatever service I did for my country
especially so if they didn't serve. I don't take no snit from
pansies who were NEVER IN who want to "tell me like it is" IN the
military. YOU live with that, because that's how it goes down.

>Every time I see such nonsense, it seems to be from a guy who served in
>the rear someplace.

Tsk. Whose rear have you served lately?

Heh heh heh...some of them are in HERE...being Raddio Kopps.
One of them was impersonating an SS officer but I think he's
really an SA fairy...keeps talking about "rear action" stuff.
Weird.

Those that deny being cops are perhaps striving to be lawyers.
Some keep referring to Google and posts that are years and years
old. They want to rehash and work over old, old arguments hoping
to win one in a re-trial. Waste of time. They are a bunch of
sore losers with painful sores from long ago. Tsk, tsk, tsk.
All of the above are morsemen, too! Sort of defeats the myth
that morsemanship "instills good behavior." :-)

Gotta go...the SA wannabe is hollering about "his is bigger
than mine" and "rear action." He wants satisfaction! :-(

> Hello everyone, I see there is another discussion on K1MAN. I am
> currently working on a petition to send to the FCC regarding K1MAN.

I have a much better idea Todd.
Just don't LISTEN to Glen Baxter and his bullcrap.
It's that simple.

Here's an example of what I mean. About 5 miles from my
home there is a wastewater treatment plant. When you get to
within 1/2 a mile of the plant it really starts to stink like shi+.
Stay away from it and you don't smell it. Same thing goes for
Baxter and his broadcasts. I know where "the stink" is on the
dial so I just stay away when he's on and as far as I am
concerned he does not even EXIST ! (wow! that's effective)

Just ignore the goofy bastard from Belgrade Lakes like
I do in the above example and he'll not only
go away eventually, but you'll not ever hear him also!

No, I don't suppose you do.

> On the big ones, I let the pros do their jobs.

Do you have big antennas at either of your two mortgage-free homes?
Perhaps you meant your comment in the usual Andersonesque sidewalk
superintendant way--that the pro antenna installers do their jobs and
that you stand by in case your advice might be needed.

> They know how to erect them.

Don't you?

> I know how to erect mine. :-)

Knowing how it is supposed to work and actually getting the job done can
be two very different things. :-)

> watch myself.

Try to find a post where I've done any such thing toward those who never served in the military. This isn't the first time you've wrapped yourself in bunting and belittled those, who for whatever reason, didn't serve in the U.S. Armed Forces. I'm quite proud that I served, but I don't find it necessary to take shots at those who did not.

> No, your snarlingness, I don't feel "entitled" to condescension.

Then why have you done it so often?

> That's YOUR schtick.

No, that's incorrect. You've done it frequently to a number of posters here, who have not served in the U.S. Armed Forces.

> I DO feel absolutely ENTITLED to cuss out any
> sumbish who wants to meanmouth whatever service I did for my country
> especially so if they didn't serve. I don't take no snit from

The point being that you never served in a forward area, let alone
a combat area. Matter of fact, the only thing "forward" about you is
bad manners and a propensity to deceive.

> By the way, WHERE was this "front?" You guys keep talking about
> the "front lines" like it was in World War ONE. Wasn't like
> that. Ask Jimmie Noserve. He was THERE...in spirit...through
> his books...he read all about it.

Then it would seem you were in good company, Lennie.

The only place YOU ever "served" on a "front line" was in a Clancy
novel or in the chow hall.

> You have some PROOF of this accomplishment, yes?

Where's PROOF of YOUR station, Lennie?

Since you can't TRANSMIT, we've been asking for a pic of your
"monitoring station"...None yet.

Maybe you got one of those "Monitoring Station Registrations" that
CRB Books advertizes in the back of CQ and Popular
Communications...?!?!

I've worked Dave on the air...At least WE know he HAS antennas
up...

> > I'll wager I've put up more antennas in the

I found myself dealing with YOUR attitude this morning, Lennie.

But then I dropped it in the bowl and pushed the handle and it
went away.

> No, your snarlingness, I don't feel "entitled" to condescension.
> That's YOUR schtick. I DO feel absolutely ENTITLED to cuss out any
> sumbish who wants to meanmouth whatever service I did for my country
> especially so if they didn't serve.

The point here is that NO ONE has "mean mouthed" your "service",
Lennie.

And what >>I<< have "mean mouthed" was your attempts to use the
sacrifices of men who died three years BEFORE you were even IN the Army
to facilitate your sillinessx in here...

> I don't take no snit from
> pansies who were NEVER IN who want to "tell me like it is" IN the
> military. YOU live with that, because that's how it goes down.

Ahhhhhhhhhhhhhhhh! Now we have it...There's the "manhood" issue!
Lennie "served" (wore a uniform, an act he tries to deride ME about...)
ergo anyone else is "less a man"...

> >Every time I see such nonsense, it seems to be from a guy who served in
> >the rear someplace.
>
> Tsk. Whose rear have you served lately?

You been spending time at Markie's house, Lennie? That sounds
like something he'd do......

Putz.

Sure we have proof!

Frankie shows up from "nowhere".

He initially slams into Lennie, calling him a "complete fraud"
allegedly due to the content of his posts...(assuming him to be me...)

But then when he's corrected, digs in on me, although he obviously
didn't find anything wrong BEFORE he was pointed in the right
direction.

Pretty obvious to me. To others too, it seems...

> > But perhaps if "Frank" had been paying attention, by riding you

Is it moderated?
If so, that's also got a "down side,"
in that discussions are limited to the parameters
set by the prejudices and bigotries of the moderator.
Sometimes, kill files are the best answer.

> > WHY do you insist on publishing not one but SEVEN absolutely
> > UNTRUE and DECEITFUL comments in ONE post...?!?!
> not one inture thing in the post

"untrue".

The whole thing was untrue, Markie.

> > > He admitted to receivng a mental discharge
> > Nope. Not a single word from me of any such.
> sure have

Then quote it, verbatim, with headers.

> > Please show the post where I "admitted" such a thing.
> Already done it

No, you've not.

> > > He admited then deined, then admited to it again, receiving a disablity
> > > pension, just as a lump sum payment
> > I never "admitted" any such thing.
> sure did

Nope. Another lie. Now repeated which makes it TWO lies.

> > Please show the post where I "admitted" such a thing.
> already done it

No, you've not.

UNQUOTE

> Stvie has been caught in number of thing recently not that he is man
> enough to admit most of it

"Stevie"

You've not substantiated the FIRST lie, let alone any others,
Markie.

This makes the FOURTH re-intro of the same questions to which you
claim you've already answered.

Try again, LiarBoy.

Steve, K4YZ

Just as they have not permitted you to comment about "amateur" radio
because you hold no license, NoServers may not comment about the
military.

> I have no recollection of any "Panama Beach" in southern
> California.

There is a Panama "City" Beach in Florida. There is even a military
base nearby where Steve may have been short sheeted seven times. All
very hostile actions for the mentally ill.

There's Santa Monica beach (municipal beach).
> There's Hermosa Beach (a city) and Redondo Beach (also a city)

Steve acts as if status as a lower-ranking Marine is something to be
denigrated.

Jim acts as if status as a "amateur" is something which gives him
entitlement to be condescending to those radio professionals who were
never amateurs.

Dave acts as if status as a DXer is something which gives him
entitlement to be condescending to those who enjoyed DX while not
holding the highest class of amateur licesne.

Every time I see such nonsense, it seems to be from a guy who is
insecure about his own accomplishments.

Not without effort.

And my placing of certain words in quotations is for YOUR benefit,
not mine.

> when will you stop lying with your claim Michigan will take a LPN
> seriously about mental illness

It's not a lie.

Any credible entity will take ANY report of mental defect and
INVESTIGATE it, just like they are doing you right now.

And Markie...

I didn't tell them you are "mentally ill"...I told them I have
reason to be concerned for your health and welfare and WHY I am
concerned.

> If you sent a letter it was circular filed, since the Computers know
> nothing about it

No letter of that nature is "circular filed"...Not unl;ess they
want to take a HIPPA fine that can range up to $250K.

> and what was mihcigan going to do?

"Michigan".

I don't know. That will be up to them.

> Force me to take meds because I lie on Usenet?

If you lie so liberally here, there's no reason to doubt that you
do it in real life.

> get real

I have.

> stop lying

I'm not.

> Code needs props in order to survive?

Nope.

It needs reasonable bandwidth in order to avoid interference. OOK
signals to not mix well with digital and modes such as PSK31

> > are plenty of spaces left in a natural state and protected
> > for those "hobbyists". Why not for Morse Code?
>
> They are not left just for theose hobbists. Many hunderd acres ar ein
> this area and never hiked to preserve the tree and lifefroms like deer
> and wolves and Mtn lions

"those" "hobbyist" "lifeforms"

Sure they are left for "hobbyists", although in your example
"naturalists" is the appropriate term.

> the question is why is Morse Code entitled to a such a preserve all to
> itself?

Why not?

The ONLY mode that OOK is compatable with is Single Side Band.

> And why if it is Such an EFECTIVE mode does it need the protection?

"EFFECTIVE"

We could ask the same about who needs the ADA, Mark.

> > the pizza waned, thanks to some Zantac OTC.
>
> more stevie lies

Nope. I feel quite well.

> kiddy porn is in no way related to lying

Sure it is.

That YOU are an ADMITTED liar and that putting you in that basket
makes you uncomfortable is just too bad, Markie.

Ya shudda considered that (a) before you started lying and (b)
before you bragged about BEING a liar.

> > > > > and since Stevie lies often Stevie should feel he is the same as a
> > > > > Kiddy porn producer
> > > > >
> > > > > You have yet to validate a single one, Markie.
> > > >
> > > > sure have
> > >
> > > Nope.
> >
> > indeed I have

Nope. Not a one.

> a new lie validated is your claim to respect the constitution of the US

I do.

YOU on the otherhand have yet to show where I HAVEN'T, other than
to express your frustration that I refuse to yield to an admitted liar.

> cuting more repitous crap

"repetitious"

QUOTE

> ratonalizing his sickness

Those were YOUR words.

Here are mine, since you "commented" on them but didn't cite what
you were replying to (very poor netiquette, by the way...)

QUOTE:

Untrue. Many kids can do exactly that too. Most don't, but then most

abused spouses and domestic partners don't "run away or defend
themselves" either.

UNQUOTE.

Number one cause of premature death of adults in families under
age 50 is homicide-by-partner. Most of those cases were of persons
killed by spouses/partners who had abused them before.

This is a fact.

> > > And that Stevie thinks about kiddy porn to makes such judgements and to
> > > bring them out on his own proves who is sick

> more rationalizing his remarks about kiddy porn

More of me reinstating comments you are commenting on but didn't
quote:

QUOTE:

As much as I hate to do it, Markie, being made alert for such
potential abuses of children is a requirement of my job. There are
classes specifically taught to recognize such potential activities.

UNQUOTE.

That's not "rationalizing", Markie. It's the truth.

UNQUOTE

No matter how often you "cut" it, Markie, it remains true.

Sorry it runs counter to your pattern of conduct and deceit.

# 3066. Re: N9OGL comments on K1MAN taken from QRZ

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-26 14:55:50 UTC
From: N9OGL <toddaug555@yahoo.com>
Message-ID: <1125068150.687534.9530@g14g2000cwa.googlegroups.com>
Source record: 117417

Any amateur radio station can run an information bulletin. My pet pea with it is that the thin line between information bulletin and broadcasting. An Information Bulletin is a message directed to amateur radio operators consisting of subject matter of interest to amateur radio. Many amateur's has taken it to be "a short, to the point newscast" and that Information bulletins cannot be opinionated. First there is nothing in the rules that state an information bulletin cannot be opinionated; nor any rules that state an information bulletin has to be a newscast. If there is a rule feel free to let me know which rule. As for short and to the point the FCC in a warning letter to K1MAN stated that there was no time limit on information bulletins as a matter of fact a club station that runs a information bulletin or a code practice transmission 40 hours a week (that's 8 hr. a day) may be compensated (47 CFR 97.113©). The FCC on their website has also stated that it is up to the station transmitting the bulletin to determine if it is amateur interest. Which brings me to the FCC, the FCC is prohibited from controling the content of any station, they are also prohibited from regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication. (47 USC 326) (this however doesn't apply to obscene and indecent material) So if one of the key points of the NAL was the content of his transmission it has to be asked if the FCC violated section 326 of the Communication Act. the courts has also stated that the FCC is prohibited from making content based rules. I also am going to bring up about the ARRL's W1AW and how it, like K1MAN has also cause interference with on going communication and that it should also be fined.

Source record: 117418

I have a much better idea Todd.
Just don't LISTEN to Glen Baxter and his bullcrap.
It's that simple.

Who said I wanted to stop listening??

Here's an example of what I mean. About 5 miles from my
home there is a wastewater treatment plant. When you get to
within 1/2 a mile of the plant it really starts to stink like shi+.
Stay away from it and you don't smell it. Same thing goes for
Baxter and his broadcasts. I know where "the stink" is on the
dial so I just stay away when he's on and as far as I am
concerned he does not even EXIST ! (wow! that's effective)

My problem is the definitions for information bulletin and broadcasting
are at lease vague. Something I hope to try and resolve.

Just ignore the goofy bastard from Belgrade Lakes like
I do in the above example and he'll not only
go away eventually, but you'll not ever hear him also!

I don't listen to him, I have my own bulletin station I run

Todd N9OGL

All modes need reasonable bandwidth in order to avoid interference.

> OOK
> signals to not mix well with digital and modes such as PSK31

But not because of bandwidth.

> Sure they are left for "hobbyists", although in your example
> "naturalists" is the appropriate term.

There are wilderness areas/preserves where human access is strictly limited in an attempt to maintain the "wild" nature of the place. The radio analogy to such preserves is the quiet zone (both geographic and spectrum) around some radio astronomy observatories.

But that's not what I'm talking about.

There are parks, recreational areas, seashores, lakes, and other areas reserved from "development" and access in various ways. The rules for their use are aimed at letting "hobbyists" have the best possible experience (as in "fun") from the area - even though the rules limit the use of the area by some.

For example, there are plenty of such places where motor vehicles are simply not allowed. In many cases the only way to reach such places is to walk in and walk out. The presence of motor vehicles would change the place, and the experience, so much that they are simply not allowed.

There's a nature trail near my home that just opened last fall. Used to be an interurban right-of-way. It's a favorite for walkers, runners, bicyclists and rollerbladers. No motor vehicles of any type are allowed, even though the surface is paved.

At the other end of that spectrum is the Appalachian Trail, stretching from Stone Mountain in Georgia to Mount Katahdin (sp?) in Maine. No motor vehicles or even wheeled vehicles allowed on most of it.

Does walking need "props" in order to survive?
>
> > the question is why is Morse Code entitled to a such a preserve all to
> > itself?
>
> Why not?
>
> The ONLY mode that OOK is compatable with is Single Side Band.

In some ways yes, but in most ways no. Even those two modes are incompatible in many ways. That's why they have separate subbands.

Consider the fact that most "data" modes are not allowed in the voice/image subbands. Is that a "prop" so that SSB and AM will survive?

Imagine a stretch of band where there are Morse Code signals every 1 kHz. Is there anyplace in such a band where an SSB voice signal can operate without causing interference to at least one Morse Code signal?

>
> > And why if it is Such an EFECTIVE mode does it need the protection?
>
> "EFFECTIVE"

>

There's a fundamental divide appearing in radio modes nowadays.

Modes like Morse Code and the analog voice modes are real time, "direct experience" modes. A human listens to the demodulated signal directly, in real time.

The "digital" modes are fundamentally different in that there is decoding beyond the demodulation process. A machine does the decoding - the human does not 'listen' to the signal at all in most cases.

Look at PSK31 - you see a particular pattern on the waterfall, click on it, and the decoded text appears. If there is interference, the text is garbled, and there's not very much you can do about it. And what you can do is a matter of equipment adjustment, not skill in listening.

Because of this difference, it makes sense to allow certain modes - like Morse Code - a place free of interference from "machine modes", just like the trails where motor vehicles are not allowed.

Voice modes like SSB and AM are protected from modes like PSK31 and RTTY. The spectrum allowed to those modes in the US HF ham bands amounts to more than half the total spectrum available! If such protection is good enough for SSB and AM, why not Morse Code?

Hold on, Sparky. Len has commented here at great length and on many,
many occasions. Now then, Len has been vocal in his attempts to change
regulations in an endeavor in which he is not a participant. Has anyone

here, who has never served in the military, attempted to change
military regulations?

Do you think being repeatedly busted to a lower rank is something to be
proud of?

> Jim acts as if status as a "amateur" is something which gives him
> entitlement to be condescending to those radio professionals who were
> never amateurs.

Does he? I've seen no evidence of it. The only radio professional
here, who isn't a radio amateur, is Len Anderson. Len is an insulting
churl.

> Dave acts as if status as a DXer is something which gives him
> entitlement to be condescending to those who enjoyed DX while not
> holding the highest class of amateur licesne.

To those? Well, there's you and you don't seem to know very much about
DXing. You seem to equate it with ragchewing across continents.

> Every time I see such nonsense, it seems to be from a guy who is
> insecure about his own accomplishments.

Then again, you've been wearing a chip on your shoulders for years.

# 3074. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-26 18:54:04 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1125082444.386860.20820@g43g2000cwa.googlegroups.com>
Source record: 117425

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

25 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1913

Indeterminate/duplicates (note 1) 94

Unambiguously Against NPRM (note 2) 520 28.59%
Unambiguously For NPRM (note 3) 1037 57.01%
Code test ONLY for Extras (note 4) 262 14.40%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and six who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 25 Aug 05 that would be 1819.

As of 26 Aug 05, there still hasn't been any notice in the
Federal Register under Federal Communications Commission on
the NPRM FCC 05-143 or WT Docket 05-235. I wonder why not?

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

# 3075. A Weekly F.A.Q. - What Is Ham Radio?

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-26 18:56:13 UTC
From: Polymath <aiyr.r.bean@lycos.co.uk>
Message-ID: <1125082573.078138.29130@g47g2000cwa.googlegroups.com>
Source record: 117426
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.homebrew,uk.radio.amateur

What is Ham Radio?

Ham Radio is a technical pursuit for those who
are interested in the science of radio wave
propagation and who are also interested in the
way that their radios function. It has a long-standing
tradition of providing a source of engineers who
are born naturals.

Ham Radio awakens in its aficionados a whole-life
fascination with all things technical and gives
an all-abiding curiosity to improve one's scientific
knowledge. It's a great swimming pool, please dive in!

This excitement causes a wish to share the experience
with ones fellow man, and shows itself in the
gentlemanly traditions of Ham Radio.

Radio Hams are in a unique privileged position in that
they can construct and operate their own equipment! No-one
else has this privilege. Users, such as broadcasters,
the po lice and armed farces, CBers and mobile phone
users have to purchase ready-made gear. Manufacturers
are not licensed to operate their gear. Radio Hams
are qualified to design, build and then
operate their own pieces of equipment. They do this
with gusto, and also repair and modify their own
equipment. This is a privilege well worth the effort
to gain, and one to be jealously guarded.

The excitement that drives a Radio Ham starts with
relatively simple technologies at first, perhaps making
his own Wimshurst machine and primary cells. Small pieces
of test equipment follow, possibly multimeters and signal
generators. Then comes receivers and transmitters. It is with
the latter that communication with like-minded technically
motivated people takes off. The scope for technical
development grows with the years
and now encompasses DSP and DDS. There is also a great deal
of excitement in the areas of computer programming to
be learnt and applied.

The technical excitement motivates Radio Hams to compete
with each other to determine who has designed and manufactured
the best-quality station. This competitiveness is found in DXing,

competitions and fox-hunts.

-----OOOOO----

However, beware! A Ham Radio licence is such a
desirable thing to have that there are large
numbers of people who wish to be thought of
as Radio Hams when, in fact, they are nothing
of the kind! Usually such people are a
variation of the CB Radio hobbyist; they buy their
radios off the shelf and send them back to be
repaired; they are not interested in technical discussion
and sneer at those who are; they have no idea how
their radios work inside and have no wish to find out;
they are free with rather silly personal insults;
they have not satisfied any technical qualification
and their licences prevent the use of
self-designed-and-built equipment.

These CB types engage in the competitive activities
with their Cheque-Book-purchased off-the-shelf radios
in a forlorn effort to prove that they are Radio Hams.

No _REAL_ Radio Hams are deceived by such people!

The military base for the mentally ill is speculation and
suspicion. However, given that Dudly has NEVER presented ANY
proof of his claims, nor any names of corroborating witnesses,
such conjecture seems more correct than his claims of military
service.

>> >Did you catch the part where Jim didn't serve?

Some others who claim they served in the military are way too
concerned over "rear areas."

>Sometimes these armchair types only have their double standard to fall
>back on.

Their own "rear area." They are anal-retentive on "rear area."

>
>The point is that a low-ranking Marine knew enough to call you out on
>your military service lies.

Tsk. The stealers of valor cry foul when their stealing is stolen.

Dudly has NO PROOF whatsoever of his "forward area" action. NONE.
Aircraft ground maintenance personnel are NOT in any "forward area."

If one is NOT in a "forward area," one is in the "rear area." Such
as an Okinawa MARS station where Dudly claimed to be "Assistant
NCOIC." [wow...lots of responsibility there...in a NON-commo role
if he was really there...MARS was never a part of the Defense
Communications System]

Dudly has never referred to any common small-unit land force radio
by nomenclature or familiar name. Neither has he done so for any

common avionics radio of the 1974-1992 period. That is unthinkable for anyone who has really been IN the military involved in radio communications of any kind. Ergo, Dudly NEVER DID what he claimed.

Dudly has presented NO PROOF of this claimed military service. He has presented nothing but verbal generalities that can be gleaned from publications or entertainment shows. Anyone truly proud to have served will have some sort of documentation which can be scanned and presented for proof. Dog tags can be scanned. Dudly has offered NONE. Not even personal snapshots.

Dudly says all who challenge him on his military claims should "call the VA [Veteran's Administration]." The VA will not reveal details to non-familiy members and must have assurance that a requestor is legitimate. The VA cannot reveal details due to a federal law that is almost three decades old. The same is true for NARA, the National Archives and Records Administration, which has a large records archive in St. Louis, MO. NARA has a website which contains the form required to request details...the filled-in form can be e-mailed for personal data, but must be sent surface mail for full disclosure.

The only logical conclusion is that Dudly's claims to military service are a FRAUD, a fabrication, a LIE. In his case, a "rear area" is what he has been giving us.

As you've said before, any time now that vein gonna go POP and it's
bye-bye Dudly.

Until then, we are faced with a deluge of Dudly's personal efforts
to "justify" his military claims...and to denigrate all those who
challenge his massive snow job. That's NOT what this newsgroup is

about but he ignores that in efforts to promote himself.

==========

I do not wholely agree.

There are many radio amateurs who are, or have been, professional engineers, not necessarily radio engineers, who contribute in their many various ways towards the hobby.

'Hobby' is perhaps not the best of descriptions. It is an international affair.

why is amateur radio not a hobby ?

Definition of a hobby

A spare-time recreational pursuit

Which is great for people such as myself!

Thank goodness for that! If listening skill was the main criteria, I
wouldn't be much of a Ham! Well hearing skills maybe.....

> Because of this difference, it makes sense to allow certain modes -
> like Morse Code - a place free of interference from "machine modes",
> just like the trails where motor vehicles are not allowed.

I'm certainly all for keeping those accursed robot stations in their
own section of the bands (actually, I am not in favor of their existance
- I think they violate the spirit if not the law). How is a robot
station that wipes out sometimes dozens of QSO's any different from
certain Amateurs who have been known to broadcast "bulletins right over
top of ongoing QSOs?

> Voice modes like SSB and AM are protected from modes like PSK31 and
> RTTY. The spectrum allowed to those modes in the US HF ham bands

I have to smile at the concept of SSB and AM being protected from my
wimpy little PSK31 signal.

I understand your analogy, but I don't think it quite hits the
fundamental divide point. Certainly RTTY and SSTV and ATV and HELL mode
have been around for quite a while.

>You took my comment and turned it around.

NOTHING was "turned around." The quotes are exact, in a linear form
from your posting.

> Then, when I respond to your
>silly question, you think I'm discussing anal sex?

Since you are anal-retentive on "rear area" issues, what I wrote
is the most plausible explanation for your non-turned-around
statement.

> What in the world is the matter with you?

Nothing. I'm trying to (vainly it seems) to return to amateur
radio policy issues.

Up before the FCC at this very moment is 05-143, an NPRM on the
government's proposal to remove test element 1 from the license
examination requirements. Comments continue to come in on that
via Docket WT 05=235. The results of that and whether or not a
Report and Order will be issued removing the code test will most
definitely affect United States amateur radio in the near future.

You do not choose to discuss CURRENT amateur radio policy issues
but rather dwell on old, old arguments in here and are now anal-
retentive on "rear area" statements.

What is the matter with YOU?

LenAnderson@ieee.org

Adding to the basis of "th[i]er" double-standard.

> Dudly has NO PROOF whatsoever of his "forward area" action. NONE.
> Aircraft ground maintenance personnel are NOT in any "forward area."

Actually, it just might be possible. I know of some rear area
personnel who were permitted to go on helo excursions so that they
would qualify for hazardous duty pay. Yet the douche bags had no
weapon, no TA50, and no sense. It was just a scam, and they should
have been reprimanded.

I beleive that Steve is up to such stunts.

> If one is NOT in a "forward area," one is in the "rear area." Such
> as an Okinawa MARS station where Dudly claimed to be "Assistant

> NCOIC." [wow...lots of responsibility there...in a NON-commo role

He hides behind his "Ask the VA" claims. Wonder where he hid during
the "seven hostile actions?"

> The only logical conclusion is that Dudly's claims to military
> service are a FRAUD, a fabrication, a LIE. In his case, a "rear
> area" is what he has been giving us.

He fully understands that disclosure of his military records will
expose him as the fraud that he is. So he hides behind his claims that
the "VA" will somehow release his data, knowing full well that they
won't.

Hmmmm? I know not to work French hams out of band on 6 meters.

Hmmmm? I know where to get permission to operate from a piece of real estate that has no government.

It took a guy who you claim "doesn't seem to know very much about DXing" to point that info out to you. But you just can't accept it, coming from a younger, brighter, better looking, and lower ranking amateur. Too bad for you.

And what has Jim's response been to Len's comments?

# 3093. Is the Axis Of Evil of Blair/Bush/Windsor destroying Ham Radio?

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-26 20:56:09 UTC
From: Polymath <aiyr.r.bean@lycos.co.uk>
Message-ID: <1125089769.323149.73530@g43g2000cwa.googlegroups.com>

Ham Radio is a pursuit for those who dabble in
technical matters. Knowing how things work and
modifying and creating is what it is all about.

Can it be, though, that such aficionados would be
seen as a threat to national security ("Last week
I visited a farmyard and the national security came
up to one's knees?) because of their ability to get round
technical naziism?

Consider the whole basis of copying DVD's, for example -
it is a trivial matter for the technical aficionado
to throw together a few lines of code to do a low-level
block-to-block copy. Yet in the USA, there is the DMCA
to make such things illegal.

How long before attempts are made to make it illegal
to sell a computer without an operating system, and to
make it illegal to use a computer other than with the
operating system with which it is sold?

When the Axis Of Evil introduces ID cards, it will
be a trivial exercise for us to produce a reader that
will be able to excite the ID cards and read it.
The Axis Of Evil won't like anybody to have the knowledge
to do that!

No wonder that the govenments of the world are taking steps
to deskill Ham Radio and to make it indistinguishable from
CB Radio. Already licences are being issued that forbid
the design and manufacture of your own rigs. The thin
end of the wedge. I understand that in Tex-arse it is
illegal to own chemistry sets (test-tubes and the like)
without a licence.

Time to resurrect _REAL_ Ham radio and to boycott
these CB-like licences (The M3 in Britland)?

>
>Adding to the basis of "th[i]er" double-standard.

Notice that Dudly NEVER explains EXACTLY which "front" He was in.
His usual tactic is to immediately denigrate his accuser in an
attempt to avoid a direct answer.

I arrived in Japan in February 1953. Combat action in Korea was
in a minimal state due to on-going talks about a cease-fire/truce.
In July 1953 that Truce state was entered and has remained so for
52 years! On the other hand, the USSR had aircraft bases in
Manchuria, the biggest being a cluster in Kamchatka. Those were
within range of Honshu Island, Japan (Tokyo is in the middle).
It doesn't matter on aircraft type numbers that the USSR had, the
point was that there were USSR aircraft that could reach Tokyo
from land bases. Jimmie Noserve picked out my one error in USSR
bomber types of 1953 and tried to imply that I was "in error" in
all my postings.

Compare that to Dudly. Dudly has NEVER specified the Where or
When of HIS "seven hostile actions." Probably because he was
never IN them. He could have been in the military at that time
but then he would be in the non-heroic position of being in a
rear area.

>> Dudly has NO PROOF whatsoever of his "forward area" action. NONE.
>> Aircraft ground maintenance personnel are NOT in any "forward area."
>
>Actually, it just might be possible. I know of some rear area
>personnel who were permitted to go on helo excursions so that they
>would qualify for hazardous duty pay. Yet the douche bags had no
>weapon, no TA50, and no sense. It was just a scam, and they should
>have been reprimanded.
>
>I beleive that Steve is up to such stunts.

I have no opinion on that.

>> If one is NOT in a "forward area," one is in the "rear area." Such
>> as an Okinawa MARS station where Dudly claimed to be "Assistant
>> NCOIC." [wow...lots of responsibility there...in a NON-commo role
>> if he was really there...MARS was never a part of the Defense
>> Communications System]
>
>How could it have been??? "MARS >>>IS<<< Amateur Radio!"

The Defense Communications System (and whatever names it was changed
to) was NEVER any amateur effort. It has always been run by
professionals. MARS served as a sort-of auxilliary that MIGHT be
an asset "if all else failed" but all else did NOT fail. MARS was
valuable for troop morale in Vietnam in the first half of the 1970s.
The U.S. Army acknowledged that and it is written up on the website
of the Army Center for Military History. But, that was over 30
years ago and before Dudly's claimed time in service.

>> Dudly has never referred to any common small-unit land force radio
>> by nomenclature or familiar name. Neither has he done so for any
>> common avionics radio of the 1974-1992 period. That is unthinkable
>> for anyone who has really been IN the military involved in radio
>> communications of any kind. Ergo, Dudly NEVER DID what he claimed.
>
>Ergo, Dud UXO lied.

An 18-year period of enlistment is quite long in an average human's
lifespan. To have NO record, no memento, not even a snapshot or a
name of a "buddy" to use as a reference in all that time is so
strange
that it is unthinkable. Ergo, what Dudly claimed was a LIE.

>> Dudly has presented NO PROOF of this claimed military service. He
>> has presented nothing but verbal generalities that can be gleaned
>> from publications or entertainment shows.
>
>Such as a 1950's issue of "This is the Air Force?"

Not if Dudly was in the USMC or USN. :-)

>> Anyone truly proud to
>> have served will have some sort of documentation which can be

>> scanned and presented for proof. Dog tags can be scanned. Dudly
>> has offered NONE. Not even personal snapshots.
>
>He got sand in his eye.

For 18 years, yes. It's a wonder he can see anything at all now...

>> Dudly says all who challenge him on his military claims should "call
>> the VA [Veteran's Administration]." The VA will not reveal details
>> to non-familiy members and must have assurance that a requestor is
>> legitimate. The VA cannot reveal details due to a federal law that
>> is almost three decades old. The same is true for NARA, the
>> National Archives and Records Administration, which has a large
>> records archive in St. Louis, MO. NARA has a website which
>> contains the form required to request details...the filled-in form
>> can be e-mailed for personal data, but must be sent surface mail
>> for full disclosure.
>
>He hides behind his "Ask the VA" claims. Wonder where he hid during
>the "seven hostile actions?"

I'm tempted to reply "in a bud's rear-area" but that would be in
bad taste so I won't reply that...

>> The only logical conclusion is that Dudly's claims to military
>> service are a FRAUD, a fabrication, a LIE. In his case, a "rear
>> area" is what he has been giving us.
>
>He fully understands that disclosure of his military records will
>expose him as the fraud that he is. So he hides behind his claims that
>the "VA" will somehow release his data, knowing full well that they
>won't.

There we have it. A big NOTHING from Dudly, no proof, no documents,
not even snapshots, and all he can do is generate vague generalities
and implications of where and what he has done. His "descriptions"
don't have a ring of personal experience to them. He is a con man,
a fraud, an imposter, and like all of those, tries to smokescreen
direct answers to challenges with personal insults against those
same
challengers. He gives the appearance of answering yet never
answered
anything at all. Typical con man syndrome.

Repeaters, satellites and beacons are robots of a sort.
Should we ban those too?

> How is a robot
> station that wipes out sometimes dozens of QSO's any different > from
> certain Amateurs who have been known to broadcast "bulletins
> right over top of ongoing QSOs?

Several important measures:

1) Does the bulletin station operate on a published schedule of
times and frequencies?

2) Does the bulletin station transmit only information of
clear and special interest to radio amateurs? (IOW, not general
news and such?)

3) Is the bulletin station using an approved method of control?

> > Voice modes like SSB and AM are protected from modes like
> > PSK31 and

> > such
> > protection is good enough for SSB and AM, why not Morse Code?
>
> I have to smile at the concept of SSB and AM being
> protected from my wimpy little PSK31 signal.

But they are! You can legally transmit PSK31 anywhere on the HF ham
bands where voice modes are *not* allowed. Why does SSB need
protection from PSK31 but not Morse Code?

This sort of thing has some odd ramifiactions. Imagine if you wanted to
use a combined text/voice mode. Such a mode might
use SSB *with carrier* for the voice part, with the carrier
phase-shifted to send the text. Such a mode is not allowed
on amateur HF.

One can even imagine a mode consisting of SSB on one sideband,
SSTV-type images (digitally encoded) on the other, and text
on the phase-shifted carrier. Something neat to try out, huh?
Except it's not allowed on the amateur HF bands either.

Butfull-carrier double-sideband AM voice is allowed.

In both cases the prohibition is not due to the bandwidth used
but because of the content (voice/image vs. text)

> I understand your analogy, but I don't think it quite hits the
> fundamental divide point. Certainly RTTY and SSTV and ATV
> and HELL mode
> have been around for quite a while.
>
Sure - but they've been of limited use until recently because of
the difficulty of implementation. With the drastic reduction
in the cost of a computer, the increased computing power, and
the wide selection of easy-to-use freeware, the game is very
different than even 10 years ago.

Of course none of this prevents someone from having "happy fingers"....

*** SAY GOODBE TO K1MAN FOLKS !!!!! ***

(snip of much bs)

ENFORCEMENT: FCC SETS ASIDE K1MAN LICENSE RENEWAL
(from the ARRL Letter )

The FCC has confirmed that the agency has set aside the license
renewal application of Glenn Baxter, K1MAN, of Belgrade
Lakes, Maine. This after routinely granting it on July 22nd.

As previously reported, Baxter received a $21,000 Notice
of Apparent Liability from the agency which has not yet
been paid. His current license expires on October 18th.
In years past, if a person contested fine and his or her
license expired during the period when the matter was
being adjudicted, that person could continue to operate
until a final determination was made.

That all changed in November of 2004 when the
agency enacted the so-called "Red Light Rule"
With the "Red Light Rule" in place, the FCC can
decline to renew a license during the appeals
process and order the person off the air once his
or her current license expires.

The agency's July 25th notice to K1MAN was signed
by Tracy Simmons who is Associate Chief for Licensing
Operations of the Public Safety and Critical Infrastructure.
Division of the FCC. In it, the FCC says that the set
aside is for enforcement review purposes. Whether or not
the regulartory agency will invoke the Red Light rule in
Baxter's case won't be known until after October 18th
unless he pays the NAL or settles the matter in another
way before that date.

Back on November 1, 2004, the FCC's put its "Red Light"
rule into effect. Under it, the agency must withhold action
on applications and other requests for benefits when the
applicant is shown in the FCC's database as being delinquent
in non-tax debts owed to the Commission. This means that

the regulatory agency will no longer accept applications
from debtors, process their pending requests, or provide
other benefits until the delinquency is resolved.

To make this work the Commission checks its records against
each application under that applicant's federal registration number.
This, to determine if the applicant or any other entity using
the same taxpayer identification number is delinquent in
any debt owed to the Commission. If the Commission finds
that the person to be a delinquent debtor, the request is "red lighted."
The Commission then stops the processing and notifies the
applicant that he or she has 30 days to either pay the debt
or make arrangements for payment of the debt. If payment
arrangements or correction of the records is not made,
the Commission will dismiss the application or request.

There are three extremely limited exceptions to this rule.
First, if the applicant through an attorney files a timely
administrative appeal or has contested the existence
or amount of the debt, the debt will not be considered
delinquent under the red light rule until the order in
question is final. Also, the FCC will not consider it to
be an immediate debt if the automatic stay provisions
of the United States Bankruptcy Code have been
invoked and are deemed to be applicable in a given case.
Lastly, the Commission will process applications for
emergency or special temporary authority involving safety
of life or property including national security emergencies.
Other than these, the delinquent applicant either must
pay up or take the chance of loosing his or her ability
to continue on the air.

Polymath:

It is far from sane to attempt to hold amateur and the ridiculously low numbers it now has, being the smallest minority on the planet, it already lacks sufficient numbers to be able to do anything...

Rather, it is time to attract real technical savvy people to the hobby and bring it up to date and with a membership large enough to have a voice...

"DO NOTHING! CHANGE NOTHING!" has been the call for decades, with very negative results and is the reason we have ended up here behind the times with ancient members or SK members--only a fool could possibly counsel to continue that course of action (or rather, inaction.)

On the individual/personal level,
for a great many of us it IS a hobby.

Strictly speaking, however, amateur radio is, by FCC
rules definition, a service.

Cheers,
Bill K2UNK

Hello, Len

I hope you'll excuse me. I landed a permanent job at almost 4 times what I was making. Due to the shift in jobs, I wasn't to be paid for a few weeks. I wanted to ensure enough funding for gasoline (quite expensive of late) as well as food, cigarettes (yep, I'm one of *them* - gasp) and so didn't pay the phone bill until last week. They shut off the DSL for a week until they were certain the check cleared. Due to that unfortunate fact, I was unable to fairly compete with the various whiners in the group. The good news is that the DSL was upgraded and I'm running 3 to 7 megabaud so I should be able to whine quite loudly in the future ;)

Might I be credited with a few extra posts, or must I wait until next month to see if I can whine as loudly as some of the other folks?

Best regards from Rochester, NY
Jim AA2QA

p.s. - I think Ed Hare got tired of the same junk going on, but not positive.

But you've chosen to discuss whether I can put up antennas.

> You do not choose to discuss CURRENT amateur radio policy issues
> but rather dwell on old, old arguments in here and are now anal-
> retentive on "rear area" statements.

Your posts on Steve's service in the Marine Corps are about amateur
radio policy matters?

> What is the matter with YOU?

>>>
>>>Do you think being repeatedly busted to a lower rank is something to be
>>>proud of?
>>
>>
>> Like Billy Mitchell?
>
>No, like Frank "Not-a-model-Marine" Gilliland.

Well, I'll tell ya, Dave -- I have absolutely no regrets about
anything I did in the Marines, not even the actions that resulted in
my loss of rank. But there's one big difference between me and Dudly
that you can't seem to comprehend: I'm telling the truth. And that's
something I am most definitely proud to admit.

Now what I don't understand is why you are so passionate about Dudly
when this discussion has absolutely nothing to do with you. Is he your
butt-buddy? Or are you afraid that you are next in line to be exposed
as a military imposter? Why is his business -your- business, Dave?

Your posts on Steve's service in the Marine Corps are about amateur
radio policy matters?

> What is the matter with YOU?

One of my knees is bothering me and I haven't been getting enough sleep.
I'm wondering how best to tackle the mounting of a 6m yagi above my
homebrew 12/17m yagi.

Dave K8MN

.....

May I be so bold as to have the audacity to agree with K8MN? While my
comments may not rest well with some of you "chairborne" commandos, it is
cheap and tawdry to call into question or submit falsehoods about the
service of Veterans.
Whether or not you approve of Veterans such as W4NTI or K4YZ, the fact
remains that they SERVED!
While you Chairborne Hams were nit-picking over license qualifications these
two guys were serving their, and YOUR, country.
I defer to K8MN. He is correct and "on the money". Would that the rest of
you do the same.

It's even worse to impersonate a vet. Wouldn't you agree?

>Whether or not you approve of Veterans such as W4NTI or K4YZ, the fact
>remains that they SERVED!

No, that's not a fact. K4YZ has, through his own words, proved beyond
any reasonable doubt that he did -NOT- serve, at least not in the
capacity he claims. I've run into many of these impersonators over the
years, most of whom claim to be Viet-Nam vets that did "secret ops" or
worked independently "behind enemy lines", and often quoting lines
from the movies "Apocolypse, Now", "Platoon" and "Full Metal Jacket"
(and even that early Jack Webb movie). But ask them for proof and they
clam up and get all defensive, just like K4YZ, and now K8MN.

>While you Chairborne Hams were nit-picking over license qualifications these

Honor is earned, not stolen. By defending a valor-thief you are
subverting your own intentions and disrespecting those who -did-
serve, those who are serving right now, and those who have died and
will die in the future. If you want to do the right thing then don't
let yourself be fooled by these fakes -- any true vet will have no
problem with showing proof of service when asked.

///////////////

And just where you step in is indeed a question. You, as easily as the
others, can be just as much a "fake".
I don't know you, so for all I know you are a Troll. I know Dan, W4NTI, and
I know of his service.
Dan has earned, in your childish words, his "honor". So also have several
other Veterans who comment in this or other groups.
I, unlike you, don't question the service of fellow Veterans. I accept them
as they are.
It has been, and will continue to be my practice to give a hand salute to
all Vets.

Now, about jumping a T-10 chute...ever been there?

"...not even the actions that resulted in my loss of rank..."

Whelp...that pretty well answers most of why Frank of Silliland has
taken this opportunity to "diss" a SNCO Marine.

> But there's one big difference between me and Dudly
> that you can't seem to comprehend: I'm telling the truth. And that's

Of what business do YOU have, Frank of Silliland? Dave's got a
lot more in common with me than you do.

You obviously have no AMATEUR RADIO issues to discuss.

You came in "guns-a-blazin" over "military" credentials, only for
it to be found out you're a disgraced non-rated enlisted yourself.

Some "resource" YOU turned out to be!

Frank Gilliland is a disgraced liar.

Period.

Steve, K4YZ

Yes, I did serve, and you're a disgraced liar, Frankie.

And that WAS through your own words!

You claim that MY "words" prove I didn't serve.

You're a liar. Period.

It's probably part-and-parcel why you left the Marines as a PFC
instead of as an NCO or SNCO, and is also no doubt as to why you
entered this flame fest to start one of your own.

> I've run into many of these impersonators over the
> years...(SNIP)

YOU'RE the "impersonator", "Frankie"...

"Impersonating" someone who served Honorably...

> most of whom claim to be Viet-Nam vets that did "secret ops" or

Words spoken by a non-hacking, busted-to-non-rate loser.

I am sooooooooooooooooooooooooooooo unimpressed!

> If you want to do the right thing then don't
> let yourself be fooled by these fakes -- any true vet will have no
> problem with showing proof of service when asked.

I have "proof of service", Frankie, and offered more than enough
non-Privacy Act protected sources for any marginally interested person
to find the results themselves...Even specific dates of promotion
boards...

You're a liar and a loser, Gilliland. and now YOU have been
exposed.

Go ahead...let's see what excuse or rationalization you spin up
for this...

Fair enough. Here, for your viewing pleasure, is a scan of part of my
DD-214 (with DOB blocked out). It's in high resolution so you can
analyze it should you think it's a forgery:

http://www.icehouse.net/wirenut/dd214ex.jpg

Here's my bluenose card:

http://www.icehouse.net/wirenut/bluenose.jpg

And just to see how well it would scan, here's something I picked up
in Haifa. Know what it is? The name of the file is a clue:

http://www.icehouse.net/wirenut/tt.jpg

Any more doubts? Need more proof?

Sorry, Frankie...the issue now is YOU...

By YOUR own words, you're a disgraced, busted-to-nonrate ex-Marine
who obviously has a serious chip on his shoulder...Not "left behind"
due to over-billeting of MOS's or other personnel issues beyond your
control, but through some act of negligence or misconduct.

You were in an MOS that the Marine Corps spent a lot of money in
order to get you there, yet they deemed you UNFIT to leave the Corps
after less than 4 years as anything but a Private First Class.

A loser.

Ironically you refered to yourself as a "####bird PFC"...

Unfortuantely I knew more than my fair share of "####birds", but
most of them at least managed to get their tours done HONORABLY and get
out the door as Corporals or even Sergeants after a 4 year tour.

At least on the six occassions I got to stand in front of a Marine
officer in regards to my rank, it was prefaced with the words "To All
Who Shall See These, Greetings..."

Guess Frankie of Silliland wasn't listening when the repeated the
words about "Special Trust and Confidence"...Because that's exactly
what being a Marine is all about.

And Frankie couldn't hack it...

Loser.

"peeve"

There's no "thin line".

It's either an "information bulletin" or it's broadcasting.

> An Information Bulletin is a message directed to amateur
> radio operators consisting of subject matter of interest to amateur
> radio. Many amateur's has taken it to be "a short, to the point
> newscast" and that Information bulletins cannot be opinionated.

Once it's "opinonated" it stops being an "information bulletin"
and becomes an editorial. Editorials are broadcasting.

> First
> there is nothing in the rules that state an information bulletin cannot
> be opinionated;

Sure there is. Right where it says "information bulletin".

As soon as it's "opinionated" it stops being an "information
bulletin" and becomes an editorial. Editorials are broadcasting.

> nor any rules that state an information bulletin has to be a newscast.

But an information bulletin has to have INFORMATION in it.

Once tainted by editorialization, it's no longer objective.

> If there is a rule feel free to let me know which rule.

"97.1369 When in doubt about what constitutes an "information
bulletin" as opposed to a "broadcast", anything Todd McDaugherty says
is wrong."

> As for short and to the point the FCC in a warning letter to K1MAN
> stated that there was no time limit on information bulletins as a
> matter of fact a club station that runs a information bulletin or a
> code practice transmission 40 hours a week (that's 8 hr. a day) may be
> compensated (47 CFR 97.113©). The FCC on their website has also stated
> that it is up to the station transmitting the bulletin to determine if
> it is amateur interest.

And one has to be relatively objective in what constitutes
"amateur interest".

Toiddie, the opinions of a foul mouthed, immature, basement
dwelling domestic parasite such as your self are of zero-point-squat
interest to the Amateur Radio service.

Set up 1000 blogs if you want to...Internet bandwidth is almost
limitless...Once your tripe hits the airwaves it's QRM.

> Which brings me to the FCC, the FCC is
> prohibited from controling the content of any station, they are also
> prohibited from regulation or condition shall be promulgated or fixed
> by the Commission which shall interfere with the right of free speech
> by means of radio communication. (47 USC 326) (this however doesn't
> apply to obscene and indecent material)

Which in this case does not apply.

The only "content" issues were Baxter's pecuniary use of Amateur
Radio. Those are clearly within the FCC's purview to limit.

> So if one of the key points of
> the NAL was the content of his transmission it has to be asked if the
> FCC violated section 326 of the Communication Act.

So ask. But ask the right people.

> the courts has also
> stated that the FCC is prohibited from making content based rules.

Again...You keep avoiding the fact that the FCC C L E A R L Y is
allowed to prohibit commerical use of the Amateur Service.

This isn't about Baxter discussing religious preferences or the
color of his wallpaper...

> I also am going to bring up about the ARRL's W1AW and how it, like K1MAN
> has also cause interference with on going communication and that it
> should also be fined.

Do yourself a favor if you're serious...

Draft out your thoughts and then give them to someone else to
prepare. The use of a typewriter and lack of profanity might more
readily impress the FCC.

N9OGL:

Yes, it would be best if you left here and went there. You don't seem to
do well in an open forum where matters are freely discussed.

There you will be able to pick and choose those which agree with you or
who can only mount weak disagreements. You can also control and influence
the course of conversation, or else "pull the plug on them."

I will attempt to help you out and refer complete nincompoops your way,
try to be gentle with them...

If you ever get tired of running a "fixed game", come back, we will be
waiting... bring your bunch with you, after you have them all brain washed
and figure ten of you will be able to go "toe-to-toe" with one of us...

By a far stretch.

He was in an expensive technical MOS (Ground Radar Repair).
You've got to go out of your way to get the USMC to send you home as a
PFC with 3 1/2 years of service..."####bird" was an understatement on
Frankie's part.

The rank of PFC and the less-than-four year tour lends one to
believe that the reason he didn't publish the other 3/4ths of his -214
was that somewhere on that form it said "LESS THAN HONORABLE", or one
of those categories of discharge.

And O N L Y accusations, Dave.

They claim I am "hiding behind the Privacy Act", but I have
offered them more than adequate PUBLIC resources to validate my
service.

This ludicrous spin about how I am one Steven Robeson claiming the
service of another is assinine.

Frankie will do nothing of the kind, Dave.

He was given adequate resources to validate my service...MORE than
adequate if we were to take his not-so-subtle suggestions of having
resources that "you don't even know about" at his disposal. Yet he
claims that he's "most definitely proud to admit" how truthful he is.

He's all three of the "oser's" Hoser Poser Loser

Frankie's done himslef in, Dave, just like Lennie, Markie, Toiddie
and Brain have done in turn...

The Feeble Five.

The reality is that the arguements will continue of code vs no code.

Few folks understand that a fair number of hams can send and receive Morse
faster than these folks can type. A surprising number of people cannot type
more than 30 or 40 words per minute; their skill is that they can point and
click with a mouse ;)

Likewise, a number of folks think that typing is outdated. It is, so long
as you only wish to copy and paste other's work and pass it off as your own.
Somehow, if one wishes to actually create an article, it is useful to be
able to type.

Jim:

You should fully investigate "text-to-speech" and "speech-to-text"; typing
is indeed becoming as extinct as the dodo bird (and cw.)

Frankly, keyboards are probably only as prevalent as they are for much the
same reasons as cw--humans are creatures of habit, the newest generations
probably will kill the keyboard...

^^^^^^^^^^^^^

Isn't that what we have going on in Iraq at this very moment?

> users have to purchase ready-made gear. Manufacturers
> are not licensed to operate their gear. Radio Hams
> are qualified to design, build and then
> operate their own pieces of equipment. They do this

A gross (and inaccurate) generalization. A great many hams I've
met in recent years barely remember what Ohm's Law is, let alone how to
do anything resembling design. They do indeed purchase their radios
'off-the-shelf,' talk about the things that matter to them on the air,
however non-technical the subject matter may be, and often show up at
radio club meetings.

And you know what? The vast majority of them are very smart, very
nice people who, while they're very interested in the public-service and
volunteer emergency service aspects of amateur radio, and may have made
significant contributions to the hobby and their community in other
ways, may never have so much as learned how to pick up a soldering
pencil.

Lack of real electronics experience does not make someone with a
ham license any less worthy of respect, Beany, no matter what you may
believe. I say this as an amateur radio license holder for the last 27
years (first as WD6EOS, then later as KC7GR), and as a professional
electronics engineering tech (for just about the same number of years).

And, for the record: Yes, I've been tinkering with electronic and
radio projects for most of my life.

Many have said that amateur radio is a dying hobby. Personally, I don't believe that. However, if there is any grain of truth to such statements, it's not the lack of technical skill in SOME newcomers to the hobby that's hurting the hobby.

What will quickly kill amateur radio will be expressing ongoing disrespect and hostility to those who choose to contribute to the service in non-technical ways. You don't need to know how to use a multimeter or whatever to be a good on-air operator, or to be of value in a disaster situation.

You can continue to post whatever kind of misguided "FAQ" you want to, Beany-boy. It won't change the fact that I, at least, have seen enough of your previous rantings on Usenet over the last few years to know your true colors.

Your Childish Broadcast (CB) below serves to
classify you.

Those whom you mention who are operators but
who are non-technical are the CBers whom I warn
against in the FAQ.

Ham Radio is not about operating - that is CB Radio
including CBers-Masquerading-As-Radio-Hams whom you
repeatedly mention.

I have never "ranted" on the Internet - I have only
posted sincere and genuine concerns about the decline
in Ham Radio by the influx of the very Childish
Broadcasters (CBers) that you typify.

If you have indeed been around for as long as you
claim, then you should know better than to enjoin
an international public forum in the rather
silly and infantile style that you adopted.

Shame on you.

Stupid boy.

Hello, John

Well, I guess I've got to admit that I might be getting stumped.

How do I use speach to text to write programs in Visual Basic or C? Can the program understand the difference between "to", "too", and "two"?

Don't worry as the China will probably do your work for you ;)

Jim:

It is only necessary to create the association between any spoken word and the series of characters you wish to generate when that word is spoken, into a library of such associations...

In other words, if I speak "the" and make the association to the characters "t-h-e" the speech to text engine will always generate those characters when I speak that specific word--I could just as easily associate the spoken "the" with any other series of characters.

Now, while you and I might not go to that trouble if we are fast typists, others who do not type will... those who are blind will... companies and corps will (and especially those employing disabled workers.) I have seen such libraries on the net for specific uses, such as programming, before. You most likely can download one for the speech engine in question...

There are groups devoted to the blind who could easily supply you with them, I am sure...

The way I figure it, as long as we know how to ask "Would you like
fries with that?" We've had all the job training we need these days! 8^(

For better or worse, I would hazard that 99 people out of 100 would not
even think of programming when they think of keyboards. But then, isn't
programming something they do in India?

Congrats on getting that new job!

Dear Asshole,

I've started this group to allow people to discuss amateur radio
issues, and get away from assholes like YOU and your little buddy
STEBIE, Command BitchWhore and all the other harassing people one here.
Perhaps one day you too will get tired of the name calling, libel, and
homobashing on this group and come to a group that talks about AMATEUR
RADIO POLICY AND RULES AND REGULATIONS.
I hope you and your little name calling buddies have fun on this
so-called amateur radio discussion group.

And one more thing Johnny, you can talk about anything you want the
only thing I don't want on it is all the crap (name calling, libel and
harassment) that's on this so-called discussion group

again you and your little harassing buddies have fun on this so-called
and worthless newsgroup

Hans,

Please accept my public apology for my insult to you (a number of years
past).

>
> Perhaps a leopard can change his spots.

I have changed my view of the ARRL ... in fact, I became a Life Member.

If you read my Candidate Statement (a 2 page .pdf) which is available via a
link from my website at http://home.ptd.net/~wk3c,
you'll see that I've come to believe that a strong and inclusive ARRL is
important to the future of ham radio.

I even have developed good relations with Dave Sumner, Ed Hare, and some of
the other staffers and personally consider them to be a friends.

Yes, my views towards the ARRL have changed *considerably* over the past
years.

73,
Carl - wk3c

Having read this thread, I must agree with the assessment that lowering
standards will NOT help Ham Radio. In the USA, the ARRL is doing its
best to turn the HF bands into an email forwarding facility, by pushing
regulations that will allow PACTOR II and III, used by the PROPRIETARY
SCS Modems, and Winlink, across ALL the bands. Soon there will be
nothing but robots, relaying email to and from the internet. Anyone who

can get a cereal-box license and is willing to spend $1000+ for the modem, as well as whatever an HF rig will go for, will be able to use the "ARRL HF Internet Service Provider."

Mike:

Text-to-speech and speech-to-text should be thought of in the same way as
the internet in regards to the pony-express or the US Postal System...

While in the future there will be keyboards, it would make as much sense
to use them as attempting to participate in this newsgroup via us postal
mail--worse, get someone on horseback to deliver your post!

... some adapt easier than others ...

How do you figure anyone here is for lowering standards?

We are for bringing standards up-to-date and getting rid of archaic,
seldom used methods and "historic concepts."

No one is for reducing standards... indeed, how could standards fall much
lower than where they exist now? Amateur radio is already decades behind
technology... that should be nothing less than totally obvious--well,
other than to the the totally clueless...

Well, I must admit that it will be nice have some homosexual/queer worshiping weirdo like you move off straight avenues.

And, I have noticed that all you have to offer is "historic protocols", "historic justifications", "historic data", religious devotion to ancient ideals, etc--and that you want to plonk your worthless behind-the-times right in the middle of everything and bring everything to a halt, so by all means I do welcome your leaving to form your own "good ole boys club"...

And, I am afraid you will only get my ridicule, disdain and polite tolerance for your very limited methods of participation and your concept of non-advancement for the technology, policies and course which will lead amateur radio away from the destruction you hold in store for it and have most obviously participated in... what ever vision blind you, there is probably a cure or treatment when you are ready...

Progress can move mountains, a few old-timers stuck in yesterday should be no problem...

Answer: For the same reason that, if you search the web long enough,
you might possibly come up with all or part of an operating manual for
an old military spark-gap transmitter - namely that a lot of
information about old military stuff can be found on the Internet.

For example, I followed the link above, only to find myself staring at
part of the instructions for the AN/VRC-45 and AN/VRC-49 radios. Not
unlike the use of CW in US military communications, these two radios
are obsolete, having been replaced by the AN/VRC-93 UHF TACSAT (as in
TACtical SATellite) radios.

Hello, John

You have an idea that is remiss in a thought or two. One of my friends I have known for years is blind. He types. You do *not* have to see in order to type. I need not (and usually do not) look at the keyboard. In fact, I never look at the keyboard. Once you know where the home keys are, you don't need to see. In fact, check and see if your "f" and "j" keys have little bumps on them to assist you in finding the home keys. Amazing, ain't it LOL

I learned grade 1.5 Braille when I was a teenager. I used a Braille slate, although it is far easier to use a Braille writer. My friend has a text to speach translator. They work quite well and are great for his e-mail, but speach to text has a problem.

This brings to mind a simple diddy:
Rockabye homonym, on the tree top
when the wind blows, the homonym will rock
and when the bow breaks, the homonym will fall
and down comes your arguement, homonym and all.

<takes a bough>

As you can see, I might associate "to" with the letters "t" and "o" combined for one word. Unfortunately, when I wish to add the word "two", I will see that the spoken word is already associated with the word "to". Too big a problem, I suspect. Woops, there just went another too, too - or is that tu-tu?

Further, how does one do addresses? I want the numbers to be stated as one block, with no commas should the address be something like 1600 Pennsylvania Avenue. Of course, no one is usually there at 1600 Pennsylvania avenue, but the arguement seems solid. I can't even use "my address" as two words come out rather than my street address - heaven help me if I want to add my e-mail address. Will "at" appear as "at" or "@"? Will ampersand appear as "ampersand" or "@"? Suppose I wish to use the word in a sentence?

If you can't speak, you could always be in a restaurant with a lap-top with text to speach and type in "blew cheese dressing, please" and it sounds perfectly proper, despite the error in spelling. However, it doesn't work in the other direction. Now you have a spelling and/or context problem.

Hope you understand my point ;)

Jim:

Yes, I thought "typing by touch" was a given, I thought it a waste of time
in mentioning to anyone using a keyboard...

However, once it is necessary to present the blind with text-to-speech it
is only obvious they can make excellent use of speech-to-text--especially
since the text is usually spelled back to them for checking...

We used to have a blind coder at a kernel driver shop I worked for, that
was ten years ago, and he was using the both engines... I don't even have
a concept of how far all that has advanced in a decade.

But, I take it for granted, the only reason I am still using a keyboard is
because of my religious devotion to it... on IRC chat I come into contact
with those using the speech-to-text engines (many blind/disabled use
IRC for social contact)--if they did not make me aware, I would only
believe they were faster typists than myself...

I see you missed that part, too. I was in here on a totally different
issue when someone mentioned that Dudly was a Marine. So I asked him
when he served and what units he was with -- a really simple question.
Heck, it's not like I was asking him his SSN or something. But that's
the way he acted. Up went the red flag. Ever since then he's been
tripping over his tongue and frothing like a rabid dog.

Now that I have answered -your- question, just why are you defending
him with such passion?

<snip>
> This ludicrous spin about how I am one Steven Robeson claiming the
>service of another is assinine.

I see you finally calmed down long enough to comprehend the issue. And
it's far from assinine. With the advent of the internet it's a simple
matter to look up your own name on a database, and it's much easier to
steal the identity of someone with the same name than someone with a
different name. Doing that I could impersonate any number of people.
It would even be simpler than that if my father had the same name and
didn't hang around the newsgroups to see what I was doing.

And BTW, notice the title of box 11: ".... years and months in
specialty...." IOW, that time doesn't include boot camp or the three
months I had to wait at 29 Palms for an opening in the BE course
(during which I worked as an assistant for the supply officer working
on the TICKET computer system -- an educational mainframe system that
was under development).

You may now resume your tirade.

Hello, John

It is all a matter of the proper tool at the proper time. Sure, you can
order a new computer via the Internet, but the Internet cannot deliver it.
They you go to the post office or UPS.

One tool doesn't work for everything LOL.

Incorect troll. The FCC has not taken the K1MAN off the air and it
never will. K1MAN has 11 lawyers in Washington and 4 in Maine who will
tie the FCC up in court for years. K1MAN, IARN and AARA will win.

Answer: THEY DO NOT for manual radiotelegraphy ("morse code").

FM 24-18 is a basic PRIMER on radio communications, an introductory text which has been around for at least three decades. The version approved for public distribution is dated 30 Sep 87, superseding the one for 13 Dec 84. Much of the equipment mentioned is OBSOLETE now and has been for decade(s). The AN/GRC-26D, for example, (an HF station in a hut on the bed of a 2 1/2 ton truck) dates back to the first half of the 1950s! The AN/PRC-70 manpack HF set went bye-bye in the 1980s, replaced with the AN/PRC-104 designed by Hughes Aircraft Ground Division.

There is NO "SINCGARS-V" in the U.S. military. You are confusing "single-channel" as in one set, one operator, with the SINCGARS family of SINgle Channel Ground Air Radio System that begins with the manpack AN/PRC-119 (first operational 1989) and continues on through two ground/vehicular versions (using same R/T) and two airborne avionics versions. Just as the AN/PRC-77 replaced the AN/PRC-25 VHF portable FM transceiver, the frequency-hopping digitized voice/data (with selectable COMSEC internal) AN/PRC-119 replaced the PRC-77. The PRC-25 and PRC-77 were both used in the Vietnam War that ended 30 years ago. The SINCGARS family is perhaps the most produced of any military radio communications set with 250 Thousand produced and fielded between 1989 and end of 2003 by ITT Fort Wayne, IN, and General Dynamics Ground Division (now dissolved) in Florida. The PRC-119 is expected to be replaced by the PRC-150 designed and built by Harris Corporation, NY.

SINCGARS sets, along with nearly every HF-VHF-UHF radio set designed and built since WW2, have provisions for remote operation through various interface-control equipments. When remote operation talks about "CW" they do NOT mean manual radiotelegraphy as is common in radio amateur parlance. "CW" in the military manual sense is control over the basic CARRIER transmission. In actual practice SINCGARS is used in small-unit operations (a few vehicles, squads) and many may be in the same radio-range area but "separated" (non-interference operation) by their digital/frequency-hopping option. SINCGARS sets, manpack through airborne, have NO provision for connecting any manual "morse code" key or sending any "morse code"

radiotelegraphy signals.

The U.S. military does NOT teach any manual radiotelegraphy skills for communications purposes. It does teach radiotelegraphy cognition for ELINT intercept-analysis as part of four MOSs for Military Intelligence operations at the M.I. School in Fort Huachuca, AZ.

FM 24-18 is a fairly good introductory handbook on radio for anyone who wishes to learn basic radio facts and radio wave propagation along with several types of antennas. It is a free download through the Army Training and Doctrine Digital Library (in the given link) and may be copied from military CDs containing Field and Techmical Manuals (not fully public distribution) through LOGSA (LOGistics Supply Agency). In particular, the "nevis" (pronounced version of NVIS or Near Vertical Incidence Skywave) techniques used by U.S. land forces radio since the 1970s; known colloquially as "cloud burners" by amateurs.

Manual radiotelegraphy for communications is essentially "dead" for every other U.S. radio service...except amateur radio. Accept that and carry on. As you were...

No, Dudly, you have NOT produced ANY proof of having served in the
USMC.

> And that WAS through your own words!
>
> You claim that MY "words" prove I didn't serve.

So far, with NO PROOF presented, YOUR words are vague generalities
without specifics. You've claimed being "in seven hostile actions"
but have never said WHERE or WHEN you were actually IN those.

> You're a liar. Period.

No period, Dudly. Lots of us readers have come to the conclusion
that you are simply running a con job, a snow job, and cannot
come up with enough details or familiarity to establish that you
actually did all those vague/general things you've described.

> It's probably part-and-parcel why you left the Marines as a PFC
>instead of as an NCO or SNCO, and is also no doubt as to why you
>entered this flame fest to start one of your own.

Tsk, tsk, tsk. Personal insults do not YOUR bona fides make,
Dudly.

The personal-insult-reply is something you use constantly when
challenged to produce ANY proof of what you've said. It is
NOT AN ANSWER. It is just misdirection to avoid YOUR answer.

>> I've run into many of these impersonators over the
>> years...(SNIP)
>

> YOU'RE the "impersonator", "Frankie"...
>
> "Impersonating" someone who served Honorably...

We readers have NO PROOF that YOU "served honorably." By your
own words you exited the USMC through a MEDICAL DISCHARGE.
Then you changed that to an "honorable discharge." Inconsistent.

>> most of whom claim to be Viet-Nam vets that did "secret ops" or

>> problem with showing proof of service when asked.
>
> I have "proof of service", Frankie, and offered more than enough
>non-Privacy Act protected sources for any marginally interested person
>to find the results themselves...Even specific dates of promotion
>boards...

PRODUCE THEM, Dudly. Give us real links if you have them. Give
us scanned documents in e-mail if you have no links. Give us
some personal references that we can contact, those who you
claim have "served with you." So far you've provided NONE.

> You're a liar and a loser, Gilliland. and now YOU have been
>exposed.

Tsk, more personal insults from Dudly masquerading as a "reply."

Dudly has NO PROOF of his.

> Go ahead...let's see what excuse or rationalization you spin up
>for this...

Frank has presented some links for his proof. Frank's words ring true. YOURS are just vague generalities, no specifics, sound like they've been cribbed from books, movies, and TV shows.

Quit trying to point fingers at others, Dudly. Remember that every time you point a finger at someone there are four other fingers of yours pointing right back at YOU.

Dave was in the "foreign service," i.e., the Department of State
as a government employee. "He's from the government and is here
to help" or something like that...:-)

Dave is a Pro-Code-Test Advocate. Dudly is more-or-less a PCTA.
Dave wants to fiercely attack ANY No-Code-Test Advocate (NCTA).

Frank, you've come out as an NCTA and thus are on Dave's shitlist.

Dave thinks you've "sided" with me. I'm on Dave's shitlist from
years ago. :-)

Dave makes it "his business" to denigrate, demean, and personally
insult any NCTA. He imagines himself a "leader." He isn't leider
fabled in song and story.

Ackshully, Dave hasn't specified a lot of detail of what HE DID
in his military service in the air farts in "a country at war."
He's admitted to doing something in regards to MARS, but MARS
was never part of mainstream military communications.

Dave shows no indication of EVER picking up the art of diplomacy
in a government secretariat that is supposed to use diplomacy.

Maybe that's one reason why U.S. foreign policy isn't universally
beloved around the world? :-)

Good on that, Jim! Been close to your situation in the past, done
that, have the old T-shirt, etc. Know the feeling.

However, not since 1963 have I EVER taken out a loan, had any lien
on anything since 1983 when I finished paying that mortgage. Takes
some belt-tightening to get into that debt-free condition but it's
been worth it.

In late 1960 a former girl friend talked me into getting a new
Chevy Impala convertible (didn't like my lil '53 Austin-Healey two-
seater scarf-wagon). Got a Ramo-Wooldridge Corp. Credit Union
loan for 3.5% annual interest. Then I was "downsized" from Ramo.
Credit Union loan was independent of that. I got a new job soon
after but girl friend went to another guy with more money right
after. :-( When the two-year Credit Union loan was paid, I kept
paying myself the same amount each month. That built up personal
funding even though the savings account rate was only 3% annual;
it paid ME rather than me paying anyone else. Never took out any
loan for a new car since ('67, '70, '82 and now 2005).

>Might I be credited with a few extra posts, or must I wait until next month
>to see if I can whine as loudly as some of the other folks?

Google did the numbers, Jim. I just copied them off the Google
newsgroup main message listing (through the "About" link at the
top of the page). You (and anyone else) has to REALLY hump to
get the 17 thousand plus messages that Cecil Moore (W5DXP, ex-
W6RCA) did! :-) Cecil Moore is listed under two separate
accounts at Google: he relocated to Texas and got a W5 call and

also changed ISPs, had a slight pause in the rrap postings while
he did that.

>p.s. - I think Ed Hare got tired of the same junk going on, but not
>positive.

Yes, he did. His last rrap posting was 18 October 2003 according
to Google archives. Cecil stopped posting here for the same
reason. Reasons were stated in public, BTW.

"Act as if he was some kind of hero?" Didn't see that of Frank
at all.

WE all saw that "some kind of hero" stuff of YOU, Dudly.

Show us some PROOF of having been IN those "seven hostile actions."

Show us some PROOF of having done all that avionics work.

Show us some PROOF of having been that "Assistant NCOIC of MARS."

>> Every time I see such nonsense, it seems to be from a guy who is
>> insecure about his own accomplishments.
>
> Gee...How ironic. I was thinking the same about YOU and your

> Funny, isn't it..?!?!

Not funny at all. YOU are the one insecure.

Tsk, Diplomat Dave went on "DXpeditions" while working for the
State Department in those "DX" embassies? Looked like he was
there in government service, not in any amateur radio junket.

Just exactly WHAT did you do for "operations from Okinawa?"
Did you help save Guam? Establish national security through
contact with MARS? What PROOF do you have of that esteemed
(or steamed) "Assistant NCOIC" position? Can you describe
the MARS station from memory at least? Do you have any friends
(ahem) who can be your references? You've not named a single

one. After 18 years of supposed service you have none?

> I've been busting your chops for years to PROVE that your
>bootlegging from Somalia WASN'T bootlegging, and you refuse to ante-up
>some "proof" of ANY sort of it's legitimacy...Yet here YOU are trying
>to "diss" me on military service that can be verified in any of several
>PUBLIC files.

Just exactly WHAT are those "PUBLIC files?" How "PUBLIC" are
they? Who can easily access those "PUBLIC files?" Tell us
WHAT those "PUBLIC files" are.

For one thing, Dudly, you are definitely NOT in any JAG nor have
you been. Even if you're just an ex-medical-corpsman in the USN
instead of the USMC, you would have NO knowledge of either USAF
or USA special regulations. Both USA and USAF special regs
cover MARS operations; I've given links to the U.S. Army websites
which have specific ARs and SRs concerning amateur radio
operation. YOU have given squat, dink, nothing but shouting and
hollering of how others are all "bootlegging" or doing dishonest
things...in short, just personal insults to others instead of
showing us any of "your proof." Describe the applicable UCMJ
text saying that amateur radio operations from Somalia is
"bootlegging." Diplomat Dave never showed us any legal cites
that stated armed forces officials cannot allow/disallow
armed forces personnel from doing such things.

We readers are still waiting for YOUR PROOF of claims, brags,
assorted braggadoccio from years back of your bullshit in here.

Tell us specifically just WHERE and WHEN you were IN those
"seven hostile actions." Do so in more detail than the vague
generalities you've posted so far. Surprise us. <yawn>

What "chops" have you "busted?" So far, only your own
credibility. All you do in regards to "chop busting" is
personal insults of those who challenge you to provide proof.

You have not. You cannot. You are an imposter. Simple as that.

Len:

Little boys who never grow up only have their fairy tale dreams, how could it be different--it is obvious from the get-go that they dream they are secret agents fighting some secret war. They imagine themselves important "radio operatives", not ever realizing the gov't has let old, retired, decrepit men dream they are still vitally important as they have been warehoused in "amateur service."

No longer can they tell reality from the dream, they are either unable or unwilling to face the stark reality--it would be too painful... now they must be left to hide within this dream world, they no longer have the courage to face the truth... strange, but it probably all started out with everyone wanting to be nice to them, but it became an evil and diabolical trap to the demise of their credibility and respectability...

No one takes any joy in such a sorrowful thing...

John

Nobody ever claimed that it is a dead mode. Model Ts aren't dead.
Tailwheel airplanes aren't dead. Neither is CW.

However, the driver's license test doesn't include hand-cranking Model T engines, nor does the airplane certificate test include 3-point landings in tailwheel airplanes. Why hang on to an obsolete technology on the EXAM for those who choose not to participate in the obsolete mode?

Moreover, there aren't special lanes on the road for Model Ts, nor are there special runways for tailwheel airplanes. Why are there special segments of the band for CW. Makes no sense to me.

Just one day later you followed that up with:

On 27 Aug 2005 17:07:31 -0700, "N9OGL" <toddaug555@yahoo.com> wrote:

>Dear Asshole,

>I've started this group to allow people to discuss amateur radio issues, and get away from assholes like YOU and your little buddy STEBIE, Command BitchWhore and all the other harassing people one here.

>Perhaps one day you too will get tired of the name calling, libel, and homobashing on this group and come to a group that talks about AMATEUR RADIO POLICY AND RULES AND REGULATIONS. I hope you and your little name calling buddies have fun on this so-called amateur radio discussion group.

>And one more thing Johnny, you can talk about anything you want the only thing I don't want on it is all the crap (name calling, libel and harassment) that's on this so-called discussion group

>again you and your little harassing buddies have fun on this so-called and worthless newsgroup

>Todd N9OGL

Then, you couldn't even let a day go by and you posted this:

On 27 Aug 2005 17:07:31 -0700, "N9OGL" <toddaug555@yahoo.com> wrote:

>well dickhead, for your information I'm not queer or gay, but i consider what you said slander!

So, unless asshole, dickhead, little harrassing buddies, worthless
newsgroup and some of your other choice descriptions aren't
namecalling on the planet you live on, it looks to me like you're the
problem. Maybe google groups is a good place for you...for us. Now we
won't have to hear all the name calling, filty language, atrocious

spelling, fractured syntax and other spew that you try to pass off as intelligent repartee.

Good bye.

Thanks Carl. And thanks for the pleasant phone call this afternoon. Wish we could have talked longer, but we had just arrived at the MN State Fair, and needed the phone to coordinate arrival of two or three parties who were joining us there.

I wish you success in your quest for a seat on the ARRL BoD, as whatever differences we've had in the past, we both passionately agree on the need to refurbish the tinkerer/experimenter/technical nature of our Amateur Radio Service. ARRL needs to lead that effort.

Good luck es 73,

Hello, John

One thing that I hadn't thought of is Windows and Linux/Unix. Just wait
until the unthinkable happens and you get dropped into the command line
interface. Then you either know what you are doing and start typing, or you
drop in the bootable cdrom, reboot, reformat, and start over.

Been there, worn that t-shirt LOL.

Best regards from Rochester, NY

Well, that sounds like a good deal (eliminate the cw only bands) for the no-codes, but it would end up a very *good* deal for the cw enthusiasts. Believe me, ssb would get clobbered from one end to the other by cw stations simply because of the wide spectrum that ssb occupies (compared to cw, that is). I have a feeling that if the cw bands were eliminated, a lot of phone folks would be screaming to bring them back. I'm not sure, but based upon my 75 watts being able to cut through a kilowatt station trying to clobber me and another station ..... both of us maintained a solid qso for half an hour at 35 to 45 words per minute cw whilst Mike, W2OY, was trying to jam us with a kilowatt of am. Didn't work then and I doubt it would work now. You're talking a 6 kHz wide am signal vs cw signals needing only a couple hundred of Hertz. You're talking at least a 14 dB or so advantage for the cw based upon bandwidth of the receiver.

For the protection of the phone stations, I believe you will want to keep the cw bands intact.

Jim:

You put words in my mouth (or text on my fingers, rather) CW has a great entertainment value for some... I would never choose to argue that...

I do not make light of that fact, some of the most important things I have found in life are books, movies, songs, stories, hobbies--entertainment.

Things need to be no bigger than they are, nor diminished, they are as they are...

I see now why you made the statement you did, however, it was not my point CW was/is "worthless", it is just not what some attempt to make it...

Then Dave is barking up the wrong tree. I'm not a ham but I do see the
value of keeping the code as a requirement. Not only is it one of the
most efficient and universal forms of radio communication, learning
the skill demonstrates both a willingness and dedication to the hobby
and it's history. Besides, 5wpm isn't so hard that it leads to chronic
insomnia or constipation, but some of these no-coders whine about as
much as Dudly does when he's asked for proof of his military service!
Code isn't that big of a deal. Learn it, pass the test, then either
use it or don't use it but at least you'll have a skill you didn't
have before. IMO.

> Dave thinks you've "sided" with me. I'm on Dave's shitlist from
> years ago. :-)

Well, that's between you and Dave. Apparently he can't make that
distinction.

Jim:

Strange how you place everyone who disagrees with you in a "wannabe"
category. I have always been "commandline material." As we speak right
now, I am compiling my linux 2.4.20 (yes, I should get the new 2.6.9x
kernel.) In windows xp I drop to the command line to move files, program
(in the old borlandbuilder c++ commandline compiler) my "personal stuff",
etc...

However, the commandline is dead, I know it, there is nothing you can do
at the commandline which cannot be done in gui, launchers and installers
do exist... in the future there will be no commandline, I just have a
religious devotion to the commandline--if I followed that in my
employment--I would soon be unemployed--like it or not the gui does make
me more productive... still, once in awhile, I can come up with an excuse
to use it... in my personal life, I will probably die using the
commandline, some who follow after me will only know it from books... so
it is with CW... the brave men call the truth for what it is, the
cowards still just die a thousand deaths, and look pitiful as they snivel...

Downloading is easy. Once it is delivered, you open your mouth and download
the thing, one byte at a time ;)

Frank:

You are much more dense than I'd imagined, I am sorry to have given you too much credit, let me explain it to you, perhaps you can get the picture.

While the evolutionists have gone around spinning a story of life beginning in mud puddles (and who knows for certain, I certainly don't), SETI has been created and searches the heavens, also, in some southwestern desert there is a "big ear" which searches for ET--and at least a good portion of a billion has been spent on its' creation, recently.

If we came from a mud puddle, then in some of those billions and billions of mud puddles out in the universe, which formed millions, tens of millions, hundreds of millions or even billions of years before ours, life also began... surely you can realize that--unless you still are afflicted by the same disease and consider yourself "SPECIAL!" (perhaps you consider your amateur license proof you are a member of a sole-solitary race?)

Then there is "life by intelligent design" and a supreme being, I am sure you are familiar with that argument--and there are some points needing further investigating...

Then again, even if it a "mud puddle god" which is now on his/her/their way to us right now, we may not be able to tell the difference between them/it and a/the supreme being(s)--or perhaps, "God forbid!", they did create us and now study us from a "duck blind"...

Surely if you can scoff at that, you would know you risk being a complete idiot... but if you believe in a mud puddle, you are actually betting on aliens existence, make no mistake, I don't, and just because the gov't or FCC hasn't told you is no excuse for not thinking--"they" just think it would be too unsettling to let the "dumb masses" in on the "little secret", or perhaps the driving force is not to insult them, like the reason they don't tell queers what sick buggers they are... go figure... maybe it is the mental health bill to "cure" 'em which they are avoiding...

John

RST Engineering wrote:
> Nobody ever claimed that it is a dead mode.

Yes, they have. Obviously they haven't actually
listened to the parts of the ham bands where
Morse Code is used.

> Model Ts aren't dead.
> Tailwheel airplanes aren't dead. Neither is CW.

True enough.

> However, the driver's license test doesn't include hand-
> cranking Model T
> engines, nor does the airplane certificate test include 3-point > landings in tailwheel
airplanes.

That's because the percentage of autos with handcranks is very
small. So is the percentage of taildragger aircraft.

But the percentage of ham stations on HF/MF using Morse Code
is much, much higher.

However, the remaining Morse Code test is probably going away
soon.

> Why hang on to an obsolete technology on the EXAM for
> those who choose not to participate in the obsolete mode?

"Obsolete"? Morse Code is the second most popular mode
in HF amateur radio.

Why are there written exams with questions on electronics for
those who chose not to build their radios?
>
> Moreover, there aren't special lanes on the road for Model Ts, > nor are there
> special runways for tailwheel airplanes.

But there are special lanes on some roads for cars only, high-occupancy
vehicles only, etc.

There are sidewalks and trails on which motor vehicles are banned.

> Why are there special segments of
> the band for CW.

The only CW-only parts of the US ham bands are 50.0-50.1 MHz and
144.0-144.1 MHz. All other HF "CW" subbands are shared with
digital/data modes.

>

In the beginning, God created the earth, and he looked upon it in His cosmic loneliness.

And God said, "Let Us make living creatures out of mud, so the mud can see what We have done." And God created every living creature that now moveth, and one was man. Mud as man alone could speak. God leaned close as mud as man sat up, looked around, and spoke. Man blinked. "What is the purpose of all this?" he asked politely.

"Everything must have a purpose?" asked God.

"Certainly," said man.

"Then I leave it to you to think of one for all this," said God.

And He went away.

Frank:

Frankly, if I thought anything, I would suspect that it would be the "supreme aliens" who were able to call the shots--I don't think our gov't or the world gov'ts for that matter would be doing much of anything--at least not anything the aliens were not telling them to do...

Who knows, keep an open mind, maybe they are just raising us like a head of cattle--and butchering time is near!!! <terrified-look!>

... do I think that is really happening? Heck, I don't know if there is a supreme being, I don't know if we came from a mud puddle, how should I know, if you ask me--all the choices just sound crazy, ask the aliens! <chuckle>

K0HB:

Interesting...

All I know from observing the elements, electromagnetic spectrum and
the nature of things is that nature never creates symmetry (well,
crystals and spheres), never creates extremely complex designs, machines
or beings--indeed, the only argument and/or example anyone can possibly
pose is us--or rather, life on earth.

I would find one believing you can throw a handful of glass, plastic,
metal into a mud puddle--come back a million or so years later and start
pulling out microwaves, cell phones, amateur equip., etc... as all of
those are much simpler, we can make those ourselves!

I find it strange men have designed a whole complex theory explaining how
it can happen and stating they have "proofs", and yet we are the only
"proof", and really no proof at all to the original question--i.e., we are
simply proof we exist, not how we came to exist...

In my personal opinion, evolution is nothing more than a religion, and one
needing a leap of faith to participate in...

Nature is a prime example of decay, destruction of complex chemicals,
reduction to the base elements--devolution if you will... but then, some
would argue black is white...

If I was forced to guess, a beginning without the intervention of an
intelligence with a plan I would venture is impossible, someone obviously
"made" us...

Are you from Kansas?

Evolution is (in my mind) too fuzzy a term, because it has become popularized to imply a lock-step progression from "lower to higher". I subscribe to the basic premise ("natural selection") but I believe it to be a stochastic process in which some randomly scattered "lucky breaks" occured. For a good read, go to a good university library and check out "The Blind Watchmaker" by Richard Dawkins (Oxford) and "The Mind of God" by Paul Davies (University of Adelaide).

There is a teleological argument, popular in the bible belt, which goes
something like this:

Premise 1: The universe was designed by someone "intelligent"
Premise 2: If it was designed by an intelligent being, it was designed by
either humans or God.
Premise 3: The universe was not designed by human intelligence.
4: From (1) and (2), the universe was designed by either humans or God.
5: From (3), it was designed by God.

The third premise is generally scientifically accepted, but not so the first
and second.

Okay, I stand corrected. No problem to me.

However, under the ROE (Rules of Engagement) in here, if you
agree with me in the slightest on anything, that puts you in
"aligned with me" and in Dave's shitlist. :-)

> Not only is it one of the

>Code isn't that big of a deal. Learn it, pass the test, then either
>use it or don't use it but at least you'll have a skill you didn't
>have before. IMO.

Opinion noted. I have a surfeit of acquired skills already,
don't need any old ones. :-)

I don't need to demonstrate how to hand-crank-start a car to
the state motor vehicle department. I've done that anyway.

I don't need to learn musketry skills, of hand-loading a lead
ball, to shoot well. I've shot well with modern firearms. No
personal firearms license in my locality requires demonstration
of shooting skills.

I don't need to "sit" a horse in order to convey myself a large
distance. I've never done that nor do I expect to. All the
"horsepower" I need is in our new Chevy. The state motor
vehicle department does not recognize horsemanship.

I don't need to learn blacksmithing in order to shape iron or most other metals. I've already shaped metal to what I want and none of it was for horseshoes. :-)

I don't need to learn to grow all my food, either in ground or that walking upon it. Food markets serve me and wife well. I've learned enough to survive on the land in emergencies and that is, in my opinion, sufficient.

Since 1952 I've learned old-fashioned vacuum tube radio communications techniques and never had to demonstrate any morsemanship nor to use it in any transmission mode then...or afterwards. That afterwards included transmitting on many more parts of the EM spectrum than is allowed to U.S. radio amateurs.

One thing I have learned in the last half century is that our government CAN and DOES accept cogent arguments on changing existing regulations to better suit all citizens. At the same time I also learned that there is a large body of citizenry that absolutely forbids any thought of changing "their" beloved standards and practices in legislated law! :-)

>warehoused in "amateur service."

That's a tad harsh, John. Close, though. Ham radio is essentially
a solo operation: One man, one radio, listening a lot to assorted
radio signals...and natural/man-made noise. There's ample
opportunity to start imagining things, even to reading "signals"
in natural noise.

With OOK CW the ONLY clue they have to the other operator is the
kind of keying they use/do, the so-called "fist". OOK CW has NO
other clue as to that other person, no voice tone, no expression,
no body language, nothing of what we in-person humans use to
base social interaction on...just the absolute formality of certain
procedures, jargon, abbreviations. That other operator could be
of another gender and there is NO clue as to which one with OOK CW.

That alienation to normal other-person input can be responsible for
some of the strident bigotry about morsemanship...a defense AGAINST
having to conform as humans in social, in-person situations. With
a minimum of normal human clues to others, they can be whatever they
want to be, whatever they dream about, the emobdiment of their
internal fantasies. Who is to tell with OOK CW? All the normal
human clues are missing in such interaction.

In much the same way is computer-modem communications. All we have
is words on a screen. The "clues" to what another person is like
is dependent on how well they can compose sentences, communicate
ideas and feelings. Not all have such capabilities. It is similar
to OOK CW morse code but has at least one approximation of human-
interaction clue, the representation of speech. Voice is a NATURAL
thing in human interaction, all races, all genders, any nation.
Monotonic sound patterns are NOT natural for communications, not a
part of our natural behavior.

>No longer can they tell reality from the dream, they are either unable or
>unwilling to face the stark reality--it would be too painful... now they
>must be left to hide within this dream world, they no longer have the

>courage to face the truth... strange, but it probably all started out
>with everyone wanting to be nice to them, but it became an evil and
>diabolical trap to the demise of their credibility and respectability...

There are many psychological causes for a retreat into a fantasy
world. They might not be able to handle the pressures of reality.
They might be too ego-driven to accept change if they've become
good at some old procedure...and need that to retain their sense
of self-worth. They might be just fraudulent individuals seeking
prestige under a fantasy identification; personal income is not
always monetary. They might be just nuts.

>No one takes any joy in such a sorrowful thing...

Certain other individuals in this newsgroup have. They have openly
wished others dead and thought nothing of it. That's perverted.

I've found enormous satisfaction in the entire technologic field
of radio-electronics, so much so that it has been my work as well
as hobby; one need not be licensed to build/experiment/explore if
the RF radiation is below government-specified standards. All of
electronics has been continuosly evolving, changing, IMPROVING,
opening up new vistas of technology in other fields, a working-
together of techno trades that benefit all. It is insane to have
to confine oneself to certain old procedures and standards in a
hobby endeavor, to have to behave in such utter formality of
everything. Amateur radio is NOT a job, not a guild, not a craft
of professionals. Neither is it some specific national resource
or a "service" for/of/about the nation. It is basically a HOBBY,
personal interest for recreation in a radio area that requires
licensing due to the nature of EM waves and human legislation to
regulate such EM wave uses.

I will be happy if more people recognize that amateur radio IS a
hobby and not some mythical "service" to their own imaginations
and desires for personal glory and misguided self-patriotism.

Well, so be it, I'm saddened to see. I'll just try to inform
these poor souls (or pour souls in some, they obviously pouring
something before writing) what military radio IS, not what they
imagine it to be.

Ackshully, FM 24-18 is a good tutorial for a beginner. In re-
checking the link given, there's a download-the-whole-thing link
at the bottom but the file is roughly 10 MB in size. Takes a few
minutes to get. [glad I already had it on a CD) It has an
objective comparison of wire antenna gains in various
terrain/environment, untainted by advertising claims and
myths of some amateur users.

FM 24-24 is available from the Army Training and Doctrine Command
Digital Library. It is a veritable catalog of land force radios
and communications devices as of 1994. Public distribution. I've
given the link to it before in here. The ATDLS website has
changed slightly so those precise links I gave before won't get
there, but anyone can do so from the 'web, through their home
page. Some of the equipment shown has gone obsolete in the past
9 years, or it is in storage in a depot "just in case" or whatever.

The ITT 'web page has more informative technical material on the
SINCGARS family of radios. Aerospace and Ground Division at
Fort Wayne, Indiana, at the old Magnavox plant. Harris Corporation
has some more plus future things they are trying to get contracts
on, forgotten division name for the moment (somebody will pipe up
with the correct name in triumph and imagined glory). Harris
has already sold some SINCGARS-compatible work-alikes to the UK
last year.

SINCGARS is interesting in that it doesn't have so many of the
conventional controls. From day one it has a Touchscreen for
entering frequency, for entering net properties (frequency
hopping pattern). A little OS built into the internal micro-
processor. When commanding it to frequency/net operation, one
enters a "hopset" (colloquial) which is a rather large data

group with its own authenticators from a separate piece of equipment to be used at local Net central. Internal power demand at idle (such as in transport or listening only) is so low that it all the entered data is retained until the LiON battery is replaced. Internal time/frequency accuracy is phenomenal over the full military environmental range. Newer models (the SINCGARS Improvement Plan or SIP versions) will allow the "Plugger" (AN/PSN-11) GPS receiver to connect to it to synchronize the internal time/frequency to the GPS. The "Plugger" (military refined nickname in place of what GIs have called it - the PSN) saw its first field operational duty in the First Gulf War. A very few PRC-119s were tried then, but not many fielded in 1990 since the first ones went to Army forces in Korea. The frequency hopping rate is 10 per second, damn hard to get a handle on in the field for either DF or interception. With digitized voice or data, SIP versions have built-in crypto (selectable) while the older versions needed external COMSEC keyers. It is also "QRP"-like in that there's a three-position front panel switch to select RF power output; DX it ain't but that isn't needed in small-unit ops. The vehicular model with larger PA can push out some RF for (easily) up to 200 miles. It ain't yer daddie's old backpack raddio and it beats the old (but still neat) AN/PRC-10 I once wore on weekly sojer training sessions in the 1950s. The Harris AN/PRC-150 covering HF through UHF is compatible with some more bells and whistles in it, all in manpack size and weight.

The AN/PRC-104 IHFR (Improved High Frequency Radio) family debuted in 1986 out of Hughes Aircraft Co. Ground Division. For those missions where HF is thought to be better, it can do so nicely, even the manpack version having an automatic antenna tuner (using latching relays to hold the L and C selections for the internal L network). Little microprocessor in that, too, also controlling the frequency synthesizer permitting good SSB performance. COMSEC is external with that model but they handle all the voice/data crypto formats. Early PRC-104s had a KY-114 knee key (why, I don't know) which was left out of later models.

Back in World War 2 times, someone at the Pentagon thought it a fine idea to improve the horse cavalry radio...a lighter and better version than the 1930s model they did have but needed to be set up and operated while the troop was stopped. The answer was in the BC-511, the infamous "guidon radio" (set was IN the combination guidon-bottom with top mount whip antenna, carried like the old horse cavalry guidon pennant). That was thunk up around 1942. However, at the same time HORSE cavalry was disbanded in the U.S. Army! Motorola in Chicago made a bunch of them. Neat little sets, AM and on low HF, crystal controlled. So, a whole bunch of horse cavalry radios being made with no horse cavalry to use it! Stagnated old-soldier thinking in DC. Infantry got some of them, GIs calling it the "pogo stick,"

terribly clumsy to use on foot. Some new-soldier thinking got vehicle adapters for them but those pogo-sticks went surplus storage when the BC-1000 Walkie-Talkies were built (also by Motorola in Chicago, also beginning in 1943). The SCR-300 (using BC-1000 R/T) was FM voice-only on low VHF. It weighed the same as the cavalry pogo-stick but was in backpack form and much more mobile on foot, worked far better in the field as a radio.

Some of the "old radio ops" just can't give up morsemanship. It must be part of their religion or whatever. Like the never-quit horse cavalryman of long ago, their beliefs insist that "CW" or on-off keying of a carrier is somehow "necessary" for today. They can't be budged from that in "the service." :-)

It's like 60+ years ago, the cavalrymen insisting that all "good soldiers" had to know how to ride a horse...even when the horses were put out to pasture, glue, or pet food. So it is when all other radio services have abandoned morse code for communications purposes, U.S. amateur radio morsemen INSIST that morsemanship MUST be in the amateur license test. Horsesnit.

K0HB:

Yes, I have read a couple of books on the subject--most of the authors strike me as being rather weak in math and especially in the area of probability and statistics--quite possibly lotus-blossom-eaters.

First, just for starters, to get all the necessary elements formed into the complex amino acids to create the RNA is preposterous--let alone the actual creation of the RNA (and this would only be a virus--unable to replicate on its own.) Next, to get a complex DNA structure would be another extraordinary event, for the proper structure (organism) to be present and form around the DNA AND be able to use the DNA would be another extraordinary event, for this organism to be able to replicate would be one more extraordinary event, for just one of these single celled organisms to go "multi-cellular" would be one more extraordinary event, then for each cell to develop specialized functions--another extraordinary event, for them to form complete organs handling a specific function--another extraordinary event.... AND THIS IS SUPPOSED TO GO RIGHT ON UP TO WHERE THE ORGANISM IS CAPABLE OF SELF-REALIZATION, COMPLEX THOUGHT AND CONSIDERS ITSELF TO HAVE A SPIRIT!

... as you can quickly see, this chain of impossible, seemingly endlessly numbered and impossible links of extraordinary events to have all occurred, all at just the right time, all in just the proper order is just too mathematically impossible to have any believe but those willing to believe the most preposterous impossibility which could ever be devised... in plain english--IT IS IMPOSSIBLE--END OF STORY!

Those books on the subject, start quickly to, toss around these CHAINS of extraordinary events without the slightest considerations to the mathematical possibilities, which end up being NON-EXISTENT!

I had the fortune to have a mathematics professor who I worked with at the university, who obtained a grant and was into computing these possibilities, he WAS an atheist... and that is a true story!

In fact, it was this professor who first told me to look either for angels or aliens--before he finally settled on the angels (intelligence NOT from a mud puddle as you could ever find upon an earth-like planet)...

I just flat do not know what to think, it is all too impossible... perhaps the answers are out there...
<X-Files-theme-plays-in-the-background>

... or, perhaps there is a very simple explanation we just have not thought of--yet... any guess is as valid as another...

Len:

ahhhhh....

I like to build antennas... I like to experiment with them...

But, I am a software engineer, not a hardware engineer (some of the
math interests me) and frankly, anyone who will pay attention to my
rants about the either consider me a loon <frown>... something has to seem
like "magic" to me--or I will lose faith altogether! <grin>

I tend to look at the whole antenna as a "tunable balun" which interfaces
the signal from the transmitter to the ether--the ether being a
near-superconductor, or at the very least--a "superior conductor."

I am still stuck on just studying, devising new feeds for, and generally
playing with the 1/2 vertical on 10 meters, nice size to work with,
some local amateurs on the freqs there, etc... and the lack of need of a
counterpoise (virtually) makes the 1/2 wave interesting and fun... I have
built dozens of them and given quite a few away... my "coaxial match" is
my most exciting development to date, simple, stable, almost bullet proof
and an excellent performer! I am waiting for the next revelation as I
type here, and type here, and type here, and type here, and type here...

<deep-in-thought-and-highly-intellectual-look-on-the-face-to-fool-'em!>

Len:

Just answer me one thing. Is it just me who sees "them" constructing control-freak rules which work at 180 degrees opposite anything conductive to experimentation and research in new protocols, equip, methods, etc?

I mean these rules are beginning to look a bit like a religious cults', and deal with the proper form, how to conduct yourself, the status quo, the "amateur class system", proper worship of "Radio Gods", belief systems, etc....

If so, I might try a few of those lotus-blossoms myself! This chit gets a bit old fast!

John

I take it English is a second or third language for you.

Aw, come on. Give the poor guy a break. His lack of proper education is
probably the result of the New Liberalism so prevalent in our public schools

today. It is, after all, what he meant to say, not how he said it.
As these things go today, it is not his fault that he is only semi literate.
There is always someone else to blame.

Typical partisan politics: you have to be on one side or the other, no
independent thinking allowed.

>
> I don't need to learn musketry skills......
<snip for brevity>

The difference between our opinions seems to be in our perceptions of the service. My own perception is that the ARS, while intended to be used for various reasons, is primarily a hobby. And obsolete or not, CW is still a significant part of the hobby as a whole. I think it should be dropped when the mode has been abandoned by the -hams-, not just the ITU.

You can apply this argument to your analogies for dropping the code: For example, you don't need to pass a horsemanship test for your driver's license because horses have been almost completely abandoned for traveling on the roads. On the contrary, CW is still widely used in the ARS. So in this respect I don't think it's very fair to equate horsemanship with code.

And again, since it's just a hobby, the requirement of 5wpm just isn't any big deal. I learned Morse at an age when things like that are easy to learn, but I can understand how trying to learn it at a later age might cause a little anxiety. However, there is a huge assortment of anti-anxiety drugs available these days (and plenty of doctors who hand them out like candy). No, that's not a legitimate reason to keep the code requirement, but it -is- a reason not to make such a big deal about it.

What I think -is- a big deal is the dumbing-down of the written test. Giving out the question pool to memorize before the test is a complete and utter joke. It's nothing more than a memory test, -not- a test of knowledge and skills. Who's bright idea was that, anyway?

> One thing I have learned in the last half century is that our

> that absolutely forbids any thought of changing "their" beloved
> standards and practices in legislated law! :-)

The requirement will eventually be dropped. That much is inevitable. The question is really about -when- it should be dropped. Either way, I still have no intentions of getting a ham license -- that is, not unless ARRL of Borg decides to assimilate the 1750m band.

That's true for every hobby or recreational sport.
There's always a minority of enthusiasts (hams, golfers,
you name it) that are extremists.

Cheers,
Bill S.

Better example from the auto anology is manual gearboxes.
There are significant numbers of new vehicles made every
day which have manual gearboxes...but no state mandates
driver testing on a manual gearbox to be able to drive one.

> But the percentage of ham stations on HF/MF using Morse Code
> is much, much higher.

So? Nothing in the amateur rules requires anyone to every
make a CW QSO, or, for that matter any contact
using any mode at all. The issue is and always has been
the exclusive CW test in comparison to knowledge
tested for any other modes.

> However, the remaining Morse Code test is probably going away
> soon.

Just a matter of time.

>> Why hang on to an obsolete technology on the EXAM for

> those who chose not to build their radios?

No separate test exists for only the electronics. The written is
scored on an overall basis....not on a subject area stand-alone basis.
Add some CW questions (similar in forat to existing
questions on the phonetic alphabet) to the tests then.

>> Moreover, there aren't special lanes on the road for Model Ts,

Last statistics I saw were that 5% of new cars have manual
transmissions. The other 95% sold today are automatics.

Morse Code accounts for a lot more than 5% of amateur radio
HF/MF operation.

> > But the percentage of ham stations on HF/MF using Morse Code
> > is much, much higher.
>
> So? Nothing in the amateur rules requires anyone to every

Exactly. Yet there are all sorts of test questions on things no ham is
required to do.

Why?

> The issue is and always has been
> the exclusive CW test in comparison to knowledge
> tested for any other modes.

Without knowledge of those other modes, you can't get a
license, even if all you want to do is to use Morse Code.

> > However, the remaining Morse Code test is probably going away
> > soon.
>
> Just a matter of time.

Probably.

> >> Why hang on to an obsolete technology on the EXAM for

Nope - but try to pass the exam without electronics knowledge.

> The written is
> scored on an overall basis....not on a subject area stand-alone > basis.
> Add some CW questions (similar in forat to existing

What Canada has done solves that problem.

Let's see...comments close sometime this fall...FCC takes six months to produce the R&O, coming out in early spring 2006...effective early summer 2006.

You may be the winnah!

>
> Last statistics I saw were that 5% of new cars have manual
> transmissions. The other 95% sold today are automatics.

Agreed, but in terms of total vehicles sold new each year
in the US, that is several hundred thousand vehicles
with stick shifts every year.

> Morse Code accounts for a lot more than 5% of amateur radio
> HF/MF operation.

The point still reverts to the exclusivity (i.e. stand-alone)
testing for one mode and one mode only. No other mode, or
subject area is so tested for an amateur license.

>> > But the percentage of ham stations on HF/MF using Morse Code
>> > is much, much higher.

>
> Why?

Read again the following:
The point still reverts to the exclusivity (i.e. stand-alone)
testing for one mode and one mode only. No other mode, or
subject area is so tested for an amateur license.

>> The issue is and always has been
>> the exclusive CW test in comparison to knowledge
>> tested for any other modes.
>
> Without knowledge of those other modes, you can't get a
> license, even if all you want to do is to use Morse Code.

Wrong....you can ignore or not learn about several specific
subject areas...one or more modes of operation, etc. and
still get a passing test grade.

>> > However, the remaining Morse Code test is probably
>> > going away soon.
>>
>> Just a matter of time.

>> No separate test exists for only the electronics.
>
> Nope - but try to pass the exam without electronics knowledge.

It still isn't a separate exclusive test. If you get all
the other stuff (rules, regs, etc) 100%, you can miss
a greater percentage of electronic questions then
if it was a separate subject area test.

>> The written is
>> scored on an overall basis....not on a subject area stand-alone > basis.

That's obvious-to-the-most-casual-observer-with-a-receiver correct. It's the favorite mode of a lot of hams (including you and me), and that fact isn't likely to change.

It's also an inherently self-testing mode. In other words, if I'm on the air using Morse code, then obvious-to-the-most-casual-observer, I've taken the time/effort to learn it. The need for a government test is obviated by this simple observation.

John, for some here (and elsewhere), CW Morse is a Faith-Based Mode.
It transcends rationality. For example, it overcomes all propagation
problems, all equipment malfunctions, and is the world's best language
translator. Just ask them.

The PCTA, including Jim Miccolis/N2EY, immediately set upon discrediting Len's comments and opinions. In the end, if they cannot lay waste to Len's comments with rational argument(s), they claim that his opinions are simply no good because Len isn't a ham. David Heil/K8MN is a primary culprit in that tactic, but Jim has used it as well.

"he who owns the presses owns the press"...if someone starts up a moderated newsgroup or list on Yahoo, they "own the press" and can setup whatever rules they like. I don't bitch about it. If I don't like the rules I don't join the group. If I want a group with different rules, I setup one of my own. Pretty simple, actually.

I've got to get bifocals before I try to tinker with electronics
anymore. But that's my problem. I do agree that tinkering is

something that most amateurs can get behind, isn't controversial, and might close the abyss created by the Code Wars. What will the ARRL do with such an idea? That's anyones guess. bb

Hope he's at least on medication for his bulging vein, if not his other issues.

> Until then, we are faced with a deluge of Dudly's personal efforts
> to "justify" his military claims...

I wish. The only evidence of military service is the photo of him wearing a Civil Air Patrol flight suit.

I once saw a photo of Cecil in a cowboy getup. That means Cecil was a cowboy, right?

Anyway, he's shot his mouth off about seven hostile actions...

Steve is an instrument of Amateur Radio Policy. His purpose is to lay waste to the persons (not their opinions) disagreeing with the Hiram Hams.

Correct. Questioning or discrediting is not what you claimed. What you
said was that Len wasn't permitted to comment. You were incorrect.

> In the end, if they cannot
> lay waste to Len's comments with rational argument(s)...

I've seen any number of Len's comments made to look like the product of
one who has little experience.

> ...they claim that
> his opinions are simply no good because Len isn't a ham.

Sometimes Len's opinions are no good because they are issued because he
has no experience in amateur radio. Sometimes his opinions are no good
because they are the rantings of a geezer with an ax to grind. Often,
he makes factual errors and there have been numerous times when he
deliberately fabricates.

> David Heil/K8MN is a primary culprit in that tactic, but Jim has used it as
> well.

Oh no, I've by no means been "a primary culprit", but I have
participated over a period of years. Len isn't involved in amateur
radio. He wraps himself in bunting and writes of his Constitutional
rights of free speech and to petition his government. Well, he has done
those things. Nothing on this planet can prevent me from lauging at him
or ridiculing him or his ideas. Len writes of being denigrated or
insulted by those who do not agree with his him but he often insults and
denigrates those who have the opposite point of view.

He is quick to tell others that they are not discussing amateur radio
policy, then he goes on a multi-post rant having everything to do with
personalities and nothing to do with amateur radio.

You, of course, are Len's little electrolytic acolyte.

Dave K8MN

Out of total sales in the millions. A tiny niche market. In fact,
almost all cars can be ordered with an automatic transmission, but many
*cannot* be ordered with a manual transmission.

> > Morse Code accounts for a lot more than 5% of amateur radio
> > HF/MF operation.
>
> The point still reverts to the exclusivity (i.e. stand-alone)

> subject area is so tested for an amateur license.

Sure - because no other popular mode requires skills the
average person does not already posess.

How many hams would have to learn to talk in order to use voice
modes? How many would have to learn to read and type to use keyboard
modes?

What's different about Morse Code is that most new hams today have to
learn it just for amateur radio. And that, IMHO, is what bugs some
folks so much.

> >> > But the percentage of ham stations on HF/MF using Morse

That depends entirely on what you consider a "subject area". If you
define "subject area" as "questions about SSB voice", one could
probably get all the questions about SSB voice wrong and still pass -

*if* almost all of the others were answered correctly.

But if you define "subject area" as "questions about voice modes", it's doubtful that one could get all the questions about voice modes wrong and still pass - even if almost all of the others were answered correctly.

Doesn't have to be.

> If you get all
> the other stuff (rules, regs, etc) 100%, you can miss
> a greater percentage of electronic questions then
> if it was a separate subject area test.

But you can't miss all of them.

The fact of the matter is that the current written tests involve a lot of subject areas, but not in a lot of depth. Morse Code testing involves one subject area, in somewhat more depth (although at 5 wpm, "depth" becomes somewhat questionable).

It's like saying we have a manual-transmission test where the person must get the car in first gear and drive around an empty parking lot at 5 mph for one minute. And folks say that's too much to ask!

So would you support a reasonable set of Morse Code only subbands,
Bill? Say, the bottom 10-15% of each HF ham band?

The Pool is still ongoing.

>
One thing I notice about FCC R&Os for the amateur service is that
they almost never put changes into effect on the first of a month -
always midmonth or something like that.

Since it serves no useful purpose, such a test would be ludicrous (and thus "too much to ask"). Couldn't have stated it better myself.

N9OGL:

Let me explain something to you, from your posts here:

1) I consider you "One SICK BASTARD!"
2) If you lived in my neighborhood I would warn my neighbors of you.
3) I would not be comfortable having you around children.
4) I would refer you to mental health.
5) etc.
6) etc.

You get the picture?

John

>OVER three decades old: The Privacy Act of 1974.

Thank you, correction noted. I seem to recall an amendment or
addition to that in 1976...but that may be my confusion with
several pieces of legislation done in 1976 such as a major
revision of the Copyright Laws and the Code of Etiquette on
The Flag. :-(

>
>Well, any proof he offers now will need to be pretty damn convincing.

If Dudly actually has any "proof" now and it is convincing, he
is then stuck with years of his insulting and demeaning behavior
in here, all nicely archived in Google. He will be NO better off
"with proof."

As is, I call him a POSEUR, a FRAUD, a SNOW JOBBER who wants others
to believe him even though he hasn't got a shred of evidence to
present for his proof.

>to experimentation and research in new protocols, equip, methods, etc?

Not just you, John, but thousands are realizing it. They are
speaking up on it in regards to WT Docket 05-235. They began
seeing all the wool pulled over their eyes back in the 1980s
when the no-code-test movement began in earnest among amateurs.

>I mean these rules are beginning to look a bit like a religious cults',
>and deal with the proper form, how to conduct yourself, the status quo,
>the "amateur class system", proper worship of "Radio Gods", belief
>systems, etc....

I've tried to show that years ago, only to be met with extreme
resistance by the Believers, the acolytes serving the Church of
St. Hiram, the self-styled self-propelled Heroes of the Hams.

THEY claim territorial imperative. THEY are da boyz in da hood
ready to gang-bang anyone intruding on their sacred turf and
changing it.

>If so, I might try a few of those lotus-blossoms myself! This chit gets a
>bit old fast!

Believers can't be turned off by logic or reasoning.

The only answer is prolonged deprogramming to remove the last
vestige of their brain-washing suds.

>Morse Code is used.

"Ham bands" on the HF spectrum are small in width. Listen to the
OTHER 86 percent of HF bandspace to hear "all the morse code."
Hear any? No? Well, then, to all those other radio services,
morse code radiotelegraphy is DEAD.

>> Model Ts aren't dead.
>> Tailwheel airplanes aren't dead. Neither is CW.
>
>True enough.

>
>But the percentage of ham stations on HF/MF using Morse Code
>is much, much higher.

Quantify "much, much higher." Give us a NUMBER, not the
subjective wish-fulfillment of a radiotelegraphist lifestyler.

>However, the remaining Morse Code test is probably going away
>soon.

Then why are you persisting?

>> Why hang on to an obsolete technology on the EXAM for
>> those who choose not to participate in the obsolete mode?
>
>"Obsolete"? Morse Code is the second most popular mode
>in HF amateur radio.

What about the other 99% of allocated amateur bandspace?

Is morse code radiotelegraphy "number two" there?

>Why are there written exams with questions on electronics for
>those who chose not to build their radios?

Ask the VEC QPC. They make up the questions.

Hint: The VEC are made up of licensed radio amateurs.

Show us WHERE in Part 97, Title 47 C.F.R. where the FCC
specifies the minimum number of various kinds of questions
that are supposed to be on a license test.

>> Moreover, there aren't special lanes on the road for Model Ts,
>> nor are there special runways for tailwheel airplanes.
>
>But there are special lanes on some roads for cars only, high-occupancy
>vehicles only, etc.
>
>There are sidewalks and trails on which motor vehicles are banned.

You are confused. Hop on a Bombardier ATV and see how one can
travel all those "banned" trails.

>> Why are there special segments of the band for CW.
>
>The only CW-only parts of the US ham bands are 50.0-50.1 MHz and
>144.0-144.1 MHz. All other HF "CW" subbands are shared with
>digital/data modes.

Thank you, Capt. Oblivious. Now tell us WHY those VHF sub-
bands are devoted to morse code radiotelegraphy?

For moonbounce? How much "EME" have you done, Jimmie?

Aren't those sub-bands a result of LOBBYING by codeaholics for
"on-air practice morse code transmissions," put there in another
effort to make all U.S. radio amateurs know and love the code?

Why else is there such EXCLISIVITY in a singular mode at VHF?

Please give us your renowned, learned experience at VHF and up...

>cowboy, right?

Right...in clothing from the 1800s along with his two pretty
daughters. Makes Cecil a "settler" type from over a century
past.

So far, Dudly hasn't shown us a picture of himself IN real USMC
uniform anywhere. According to his brag, he had 18 years of
Marine Corps service. In 18 years he "never" had his picture
taken in uniform? Unbelievable.

>Anyway, he's shot his mouth off about seven hostile actions...

Dudly has NEVER told us the WHERE or WHEN of his participation IN
those "seven hostile actions." Ergo, he was never IN them.

>> and to denigrate all those who
>> challenge his massive snow job. That's NOT what this newsgroup is
>> about but he ignores that in efforts to promote himself.
>
>Steve is an instrument of Amateur Radio Policy.

His "instrument" is out of tune. He can't get it up enough to
play it (or with it). FALSE NOTES come out of it.

> His purpose is to lay
>waste to the persons (not their opinions) disagreeing with the Hiram
>Hams.

He is our albatross to be worn around our necks...sort of "the
rhyme of the ancient marine-er." :-)

The PCTA have been bound and determined to keep morse code
purity in U.S. amateur radio IN ANY WAY THEY CAN...since back
in the 1990s and led by Jim Kehler, KH2D, an avowed PCTA.
[sorry, Brian, I know you like Kehler, but he was NOT kind,
gracious, or anything else civil to me...as old archives show]

Heil's "argument" is that NO ONE UNLICENSED CAN POSSIBLY TALK ANYTHING ABOUT AMATEUR RADIO POLICY. That is patently FALSE. The FCC does not require any staff or Commissioners to hold amateur radio license grants in order to REGULATE and ENFORCE U.S. amateur radio. There is NO SUCH PROVISO forbidding U.S. citizens from discussing ANY federal regulations or laws.

Heil says one MUST have a license, be a "participant" in amateur radio in order to speak about it in any way. That is still FALSE. Such would forbid newcomers from doing anything priod to any test, to remain silent, to blindly accept anything about law, regulation, or even "moral-ethical" issues. Heil wants SHEEP who blindly accept HIS control/dictates/commands.

Diplomatic Dave seems to have completely MISSED what Department of State uses as its primary tool in carrying out U.S. foreign policy: Diplomacy. Dave is the antithesis of this as a demanding dictator, a self-styled self-propelled tyrant who forbids any opposite opinions from his. Diplomatic Dave would have us ALL throw out the First Amendment of the U.S. Constitution because HE doesn't like opinions contrary to his!

It's no wonder that U.S. amateur radio is stagnating in the number of licensed amateurs with EXAMPLES of the "highest rank" in amateurdom such as Heil.

==========
January 29, 2002

Mr. Glenn A. Baxter
RR1 Box 779
Belgrade Lakes, ME 04918
Re: Amateur Radio license K1MAN

Dear Mr. Baxter:

On May 14, 1999, after numerous complaints about your Amateur station regarding broadcasting, deliberate interference, failure to identify, poor signal quality and erratic starting and stopping times, personnel from the Boston office of the Commission monitored your station and attempted to inspect it. There was no one present at your station while it was transmitting on Amateur Service frequencies. The transmissions continued while Commission personnel went to your residence at 1 Long Point Road, but there was no one present there either. Again on May 15 while your station was transmitting, Commission personnel attempted an inspection but there was no one present.

Since the Amateur Radio Service rules require that Amateur stations be under the control of a control operator, and that the control operator must ensure the immediate proper operation of the station, we requested by letter dated June 25, 1999, that you provide information to the Commission, pursuant to Section 308(b) of the Communications Act of 1934, as amended, regarding the operation of your Amateur station. You responded by letter dated July 25, 1999, but your response failed to provide the information we requested. We notified you of that fact by letter dated August 4, 1999, and detailed the inadequacies of your response.

Specifically, you did not provide the name, address or phone number of the control operator for any of the "broadcasts" or "bulletins" such as prerecorded interviews, transmissions of answering machine responses, live interviews, or live, pre-recorded or automated station identifications transmitted by your station. Among other deficiencies of the response, you did not provide dates and times Amateur station K1MAN transmitted without a control operator.

You also stated in your July 25, 1999 reply that you had not received our June 25 letter by certified mail and that our letter had "misrepresented itself as Certified Mail". We reminded you that you had signed the certified receipt for that letter, and we provided you with a copy of that certified receipt.

You responded to our August 4 letter by letter dated August 24, 1999. During our review of the information you provided, your Amateur station ceased operation. As a result, we held our inquiry in abeyance. The U.S. District Court in Maine subsequently dismissed your lawsuit against the Commission, and dismissed your petition for reconsideration of that dismissal as well.

You recently resumed operation of Amateur station K1MAN. In view of that resumption and the resulting complaints we are receiving about deliberate interference, threats against those who do not relinquish frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control, we have resumed our inquiry into the operation of K1MAN.
In reviewing your letter dated August 24, 1999, referenced above, and your actions subsequent to coming back on Amateur frequencies, it appears that your understanding of certain Amateur Radio Service rules may be incorrect.

We will outline the apparent misunderstandings below.

Amateur Station Control
With regard to control of an Amateur station, your letter of August 24 indicated that the control device for your station was a "Radio Shack timer", and that the control points for the station were "the main power switch at the transmitter site" and at the location of the control operator, wherever that may be". You further stated that on the dates in question, May 14 and 15, 1999, you were the control operator and were in "both Belgrade Lakes and Augusta in either mobile or portable modes".

Section 97.7 of the Commission's rules states that "when transmitting, each Amateur station must have a control operator". Section 97.105 states that "the control operator must ensure the immediate proper operation of the station, regardless of the type of control (emphasis added). Section 97.109 states that "each Amateur station must have at least one control point", and that the control operator must be at the control point when the station is locally controlled or remotely controlled.

Section 97.7 further states that a control operator need not be at the control point if a station is automatically controlled. However, as Section 97.109 also explains, only stations specifically designated in Part 97, such as a space, repeater, beacon or auxiliary station, may be controlled automatically. There is no provision in Part 97 that allows an Amateur station transmitting information bulletins to be automatically controlled.

In summary, your control of the station by a "Radio Shack timer" while you are absent from your Amateur station is a violation of the Commission's Rules. You were not in control of your station on May 14 and 15, 1999 while you were in "both Belgrade Lakes and Augusta in either mobile or portable

modes". Your statement in your response that "K1MAN has never transmitted during the current license term without a control operator acting in full compliance with rules 97.105 and 97.109 as well as all other applicable FCC rules" is untrue.

Simply put, to comply with Commission rules, you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting, when your station is locally or remotely controlled. If the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

Publishing a Transmitting Schedule & Interference
It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule.

Threats to Complainants and Other Users
Your sending "Felony Complaint Affidavits" to other Amateur Service licensees who complain or intend to complain of your operation, or who do not relinquish frequencies to you, was the subject of a Warning letter to you dated December 11, 2001. You have also been warned about such "Felony Complaint Affidavits" by the United States Attorney in Maine.

The Commission will view any threats made by telephone, through the U.S. Mail or on radio frequencies to Amateur Radio licensees who file complaints with the Commission, or who do not relinquish frequencies for your use, as very serious.

Broadcasting
We also note that on your web site and in your radio transmissions, you

refer to your transmissions variously as "broadcasts, programs, talk shows, bulletins, pre-recorded interviews" and so forth. We have received complaints that you have broadcast comedy shows and commercial messages. We caution you that Section 97.113(b) of the Amateur service rules prohibits amateur station from engaging in any form of broadcasting. Certain one-way transmissions, such as information bulletins, are allowed as specified in the rules.

Tape Recording and Broadcasting Telephone Conversations
We have received and have under review complaints that you have tape-recorded telephone conversations without the consent of the recorded party and that you have broadcast such tape recordings. We caution you that such recording without consent may be in violation of state or federal law. We will contact you under separate cover regarding those complaints.

In summary, it is very important for you to understand that we will review all valid complaints concerning the operation of your Amateur station, and that Commission personnel will again inspect your station. The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed.

On IRCnet, yes.

On zIRC, I usually use KC2HMZ, but also have KNY2VS registered. It
makes a good alternate nick in case I ping out and have to rejoin
under another nick so I can kill my ghost.

Usually KC2HMZ.

The #monitor channel is linked across four networks - dalnet,
StarChat, zirc, and ircnet. The usual tech problem that would cause a
severance of the crosslink would be if one of the relay bots pings
out, or if the server a linkbot is on gets lost in a netsplit.

Otherwise you can join any of the four networks - though if you want
to avail yourself of the NSA logbot you'll need to be on either ircnet
or zirc.

>There are no such subbands on MF/HF now. Why in heavens name would we establish
>them at this point?

Simple reason: To keep the MINORITY happy, the minority who still
believe in the efficacy, the nobility of purpose ascribed to the
morse code mode.

The claimed efficacy is that "it will get through when nothing else
will." In that case it will work THROUGH any QRM and therefore
doesn't NEED any exclusivity.

The claimed nobility of purpose ("first mode in radio" "must be
treasured as traditional") is nothing but a rationalization on
the PCTA's part to keep even a vestige of CONTROL over regulations
that they've grown accustomed to having. THEY are the "nobility,"
not the mode and all must bow to THEIR wishes. THEY rule. Not.

If morse code cognition is "so easy to learn, all can do it," then
WHY MUST THERE BE A FEDERAL TEST REQUIRED FOR IT? Something so
"easy" can be taught in code schools OUTSIDE of federal jurisdiction
and supervision. NO FEDERAL TEST IS NEEDED FOR PRESERVATION.

The PCTA want to retain CONTROL. They want to have their elite
EXCLUSIVITY in the radio playground. It makes them feel "happy" to
keep "undesireables" out of THEIR turf. They feel they somehow
"own" the right to exclusive EM bandspace. They are the Radio
Royals. Their blood is bluest of the blue.

Blue blood is caused by oxygen deprivation. Oxygen deprivation
leads to malfunctioning thinking. QED. Merde.

Tsk, tsk, tsk...Heil sails the river denial again.

>> In the end, if they cannot
>> lay waste to Len's comments with rational argument(s)...
>
>I've seen any number of Len's comments made to look like the product of
>one who has little experience.

I have "little experience" in toadying up to self-styled
"masters of radio" who pretend to know the answers. I have
LOTS of experience in being around such. You are just one
more in a long line of self-assumed masters of radio.

>> ...they claim that
>> his opinions are simply no good because Len isn't a ham.
>
>Sometimes Len's opinions are no good because they are issued because he
>has no experience in amateur radio.

"No experience?" Is amateur radio different from all other radio?
Tsk, tsk. NO. ALL radio is subject to the SAME physical laws.
Only MAN-MADE laws differentiate "amateur radio" from all other
radio.

Heil has NO EXPERIENCE in regulating radio, of controlling those MAN-MADE laws. Ergo, Heil has NO EXPERIENCE in law-making policy concerning radio!

To repeat: NOTHING in the laws establishing the FCC require any staffer or Commissioner to hold an amateur radio license grant in order to REGULATE U.S. amateur radio. By Heil's reasoning, the FCC has "no experience" in regulating amateur radio. Obviously it does. Just as obviously, Heil's personal opinion is invalid in reality.

> Sometimes his opinions are no good
>because they are the rantings of a geezer with an ax to grind.

"Geezer?" "Axe?" :-)

That from a former employee of the U.S. government supposedly involved in "diplomacy" who demands that all newcomers to amateur radio test for skill in a 161-year-old primitive communications code?

"Geezer:" Dictionary definition is "Noun, slang, an eccentric olf man." Tsk, tsk, that applies to HEIL more than I. :-)

Heil is NO youth. His youth was left behind many years ago. Heil keeps defending the "necessity" to test for morse code skill for an amateur radio license. The morse code test for an amateur radio license has NEVER left U.S. amateur radio regulations...a length of time longer than Heil has been alive (71 years). Heil has shown NO valid reasons to retain the code test in U.S. regulations; his main comments on that is to act uncivilly to all who propose eliminating that code test. That fits "eccentric" far more than my wishes to eliminate the OLD, unnecessary morse code test.

Heil fits the "geezer with a (blunt) axe" to grind far better than I. He refuses any change, will not give in to progress in regulations.

> Often,
>he makes factual errors and there have been numerous times when he
>deliberately fabricates.

Nonsense. I do not "often make factual errors." Google archives will show that.

I fabricate electronic hardware sometimes. Some of that involves radio. I fabricate other physical things as well. What I do NOT fabricate is specious, illogical, emotional DEMANDS that ALL must follow Heil's dictates in amateur radio regulation changes (or "unchanges" in Heil's apparent viewpoint).

I have NOT "fabricated" what I've said about beginning in HF radio communications in (what I term) the "Big Leagues of Radio" over a half century ago.

I have NOT "fabricated" my personal references in experience in
radio. They are still alive and licensed radio amateurs.

I have NOT "fabricated" any of my work experience, have listed
my past employers in here. Anyone can check those out
independently.

Obviously one other in here HAS done considerable "fabrication."

I need NOT "fabricate" things with deliberate omissions of facts
in order to make a point...nor do I need to "fabricate" opinions
of others who deliberately try to demean, denigrate, or insult
my person just because I have opinions different to them. I need
only refer to the overall history of radio-electronics available
to all who care to look. Not like the ARRL deliberately leaving
out other radio services activities in attempting to "prove" that
amateurs "pioneered all radio."

>> David Heil/K8MN is a primary culprit in that tactic, but Jim has used it as
>> well.
>
>Oh no, I've by no means been "a primary culprit", but I have
>participated over a period of years.

4,022 posts as of 25 August 2005 according to Google archives.

>Len isn't involved in amateur radio.

Neither are any FCC staffers or Commissioners required to have
amateur radio license grants in order to REGULATE and ENFORCE
U.S. amateur radio.

Sunnuvagun!

> He wraps himself in bunting and writes of his Constitutional
>rights of free speech and to petition his government.

I wear rather conventional clothing and eschew "bunting."

Yes, I am a citizen of the United States of America and choose
to exercise my RIGHTS (guaranteed under the Consitution) as I
see fit. Heil has a "problem" with that?

>Well, he has done those things.

Amazing observation. Heil has "monitored" ALL of my actions?
He has a dossiere of what I have done? [wouldn't put it past
a control-freak to do that kind of "stalking"]

>Nothing on this planet can prevent me from lauging at him
>or ridiculing him or his ideas.

Nothing in this universe can prevent ME from laughing right
back at the ultra-conservative geezer called Heil...and
exposing his dictatorial viewpoints on who is "allowed to
express themselves" in this free society.

>Len writes of being denigrated or
>insulted by those who do not agree with his him but he often insults and
>denigrates those who have the opposite point of view.

Poor baby, don't like it when return fire is stronger than
your attempted character assassination shootings at me? :-)

>He is quick to tell others that they are not discussing amateur radio
>policy, then he goes on a multi-post rant having everything to do with
>personalities and nothing to do with amateur radio.

WT Docket 05-235 (now before the FCC and all citizens) is about
nothing else but the morse code test for a U.S. amateur radio
license. Is discussion of that "ranting?" I think not.

Discussion, debate, argument about a test for GETTING INTO U.S.
amateur radio is "ranting?" When it comes to specious, invalid,
illogical, emotional, subjective "reasons" for its retention IS
"ranting." By the PCTA.

The NCTA want to OPEN UP U.S. amateur radio, to all who care to
get into it, NOT restrict entry by some old, outmoded, dictatorial
and arbitrary barriers which the FCC themselves have said is
unneccessary. Heil keeps on RANTING that those old, outmoded,
dictatorial, arbitrary reasons are "valid" yet has presented NO
proof to qualify them. All Heil has presented are a number of
personal insults directed to those who oppose him, as below:

>You, of course, are Len's little electrolytic acolyte.

I do not know Brian Burke personally. We live 2000+ miles apart.
By all his words in here, Brian Burke has demonstrated that he is
HIS OWN MAN, not some "acolyte" or "little electrolyte." You
insult him and myself in saying he is some kind of "acolyte" to
my thinking. FREEDOM is not a "cult." It is the basis for the
creation and continuation of the United States of America.

That Brian and I SHARE THE SAME VIEWPOINT of yourself is due to
YOUR words. You do not regulate U.S. amateur radio, have never
been in any position to do so. All you have done is to keep an
amateur radio license grant for four decades. Many others have
done so for longer.

I repeat once again: The FCC does NOT require any staffer or
Commissioner to hold an amateur radio license grant in order to
REGULATE and ENFORCE U.S. amateur radio. YOU are NOT a regulator
or enforcer of U.S. amateur radio; only a wannabee dictator who
has no more power than any other U.S. citizen, licensed or
unlicensed. Try to adjust to that very real FACT.

> such a test would be
> ludicrous (and thus "too
> much to ask"). Couldn't have stated it better myself.

Apply that same logic to the written tests.

Explain why it's necessary to learn all the stuff necessary to
pass Elements 2, 3 and 4, just to operate QRP CW on 14.020 MHz.

> > So would you support a reasonable set of Morse Code only
> > subbands,
> > Bill? Say, the bottom 10-15% of each HF ham band?
>
> There are no such subbands on MF/HF now.

There should be.

> Why in heavens name would we establish
> them at this point?
>
Several reasons. One is that we're about to unleash a lot of
hams with no Morse Code skill upon the bands where Morse Code
is primarily used by hams.

But the more important reason, IMHO, is that as amateur radio
becomes more diverse and varied, the regulations of necessity
become more complex.

There was a time, a bit less than 60 years ago, when 99.99% of amateur
radio operations used either Morse Code or AM voice. Almost all
operations were "simplex" too - satellites, repeaters, and other
automatic stations were in the future.

The regulations back then were simpler, because the range of amateur activities were fewer.

Then hams in considerable numbers began to use SSB voice. And RTTY, though the number of RTTY stations was limited by the cost, size and complexity of an RTTY setup. (Yes, we all know The Armed Forces used lots of RTTY, which they called RATT. They also had somewhat greater resources than the average ham).

Then hams began to use SSTV, and FM, and satellites, and repeaters, and RTTY modes besides five-level Baudot. And packet and pactor and PSK and HELL and WSJT and all sorts of other stuff.

Now we have a whole tower of babel of modes. That complexity would benefit from some rules changes. Like a protected space for good old Morse Code.

Hans, I know you think the best system would be to simply allow all authorized modes anywhere in the ham bands, by any licensed radio amateur. The reality of such a system might be very different from your imagined nirvana.

btw, FCC doesn't go for that system either.

N2EY:

The computer has made most everything simple, hassle free and even
children can do it. If you have a ham right and a computer with a sound
card this page:
http://www.geocities.com/SiliconValley/Heights/4477/?200528

will get you started. There is no need for expensive equip. A SW
receiver, homebrew transmitter and a homebrew linear with you computer and
you are off into the ether.

Old hams trying to scare everyone off is ridiculous... it is childs' play...

Absolutely...even when he wrote the following:

"HAM RADIO OPERATORS ARE INTROVERTS - In most cases, FACT. It's much easier to speak your mind on the 75 meter Goober net than it is to stand up in front of a group of real people and do it. Meeting a ham in person whom you've talked to on the air for a long time is usually an eye opening (and sometimes heart breaking) experience. Most times you'll find that the mental image you've created of a person you haven't met gets shattered when you do finally meet them. If you've been talking to John Wayne on the radio and you're finally going to meet him at the flea market, don't get your hopes up. In years gone by, hams fell into a few well known categories - A1 Ops, Lids, Kids, and Space Cadets. Today those categories have changed. Most hams can be classified into one of three commonly found groups - Freaks, Jerks, and Wierdos."

[quoted direct from some beloved opinion at http://kh2d.net]

So, Hans, which one are you? Freak, Jerk, or Weirdo? :-)

That is a telephone token. The telephones in Israel didn't take money
because the inflation rate was super high -- when we arrived in the
spring the "moneychangers" rate was 200 sheckles to the dollar, and on
our last visit in July it was 600 per dollar. And to think people here
get upset if the inflation rate rises above 5%.....

http://weather.noaa.gov/cgi-bin/iwszone?Sites=:laz069#t2

Note the predictions of damage...

Only three Category 5 hurricanes have hit the USA since records have been kept. They hit in 1935, 1969 and 1992. 34 years, 23 years, and now 13 years between such storms.

My thoughts and prayers are with those on Katrina's path.

73 de Jim, N2EY

>yourself as to make ANY argument lost.

Wrong again, Dudly. Neither of my disciplinary actions resulted in my discharge. I fulfilled the full term of my contract. But after two court-martials my conduct marks were just one tenth of a point too low for an honorable discharge so I got a "General under Honorable". And here is where I know that your claim to have upgraded your discharge is bullshit -- because I -did- upgrade my discharge. (Warning: long story.....)

Back in early '85 I injured my knee on a forced march. The corpsman wrote me a light-duty chit that was to stay in effect until I could get to the mainside (Lejeune proper) hospital to have it checked out. But before that could happen we were to go on a field-op. Since I was on light-duty I wasn't supposed to go on the op, but the shop chief (comm shop, not the tech shop) took the chit, put it in his desk and ordered me to go anyway. Since the chain of command was already in the field I couldn't request mast, so I refused the order. He then ordered me to serve on mess duty while awaiting office hours, which I also refused (since I was supposed to be on light-duty). The result was a summary court-martial, a month in the brig and reduction back down to private. And a big hit on my conduct marks.

Shortly afterwards I was transferred to 2nd AAV where I was finally allowed to get my knee examined at the hospital. Being an RN and/or LPN you should probably know what a torn lateral -and- medial meniscus means -- pain! Simple orthoscopic surgury fixed it up right as rain. And it also vindicated me of the shop chief's "indiscretion" (as it was called in his reprimand).

So after I got my 'general' discharge I challenged my conduct marks based on getting shafted by 3/8's shop chief and won. In the process I learned quite a bit about how a discharge is upgraded; i.e, a general discharge cannot be upgraded to honorable unless there are mitigating circumstances -- circumstances such as mine -- that caused the wrong discharge to be issued. You can't get it upgraded just by asking, for being a good citizen after your discharge, or for any other reasons not related to having been given the wrong discharge.

Now a medical discharge is also a "general under honorable" discharge. If you wanted to upgrade -your- discharge then you would have to show that the reasons for your general discharge were wrong; which, in your case, is utterly ridiculous since the reasons were medical. You even

went one step further and claimed that you are "USMC Retired", which is absolutely impossible unless you served your full 20 years, which you couldn't possibly do if you had been discharged prior to 20 years for medical reasons. And it's impossible for you to have taken two full years of terminal leave since a) you would have had to serve 24 years without taking -any- leave, and b) they didn't permit anyone to accumulate more than 90 days leave on the books -- you either use it or lose it.

So all those claims of yours about your discharge are completely bogus, Dudly. They have absolutely no foundation in reality.

> Loser. Hoser. Poser.
>
> That's Frank of Silliland.

Coming from a retired Marine Corps gunny, that's pathetic. If you are going to continue this "truth-by-repitition" charade then at least get someone to ghost-write your posts so you don't sound like a 3rd grade dropout.

I see you've been swimming in google-juice. Do you want a list of the
other names/emails I've used for usenet?

> I've given references to PUBLIC sources to verify my service, yet
>you continue ot try and diminish my serivce.

Public sources prove nothing -- they are just a source of information
to be used for identity theft.

> HOWEVER, for what ever pea-brained reason you thought it pertinent
>to do so, you have PROVEN to us that YOU were incapable of honoring
>your contract with the Marines.

And again you are mistaken -- the USMC didn't honor it's contract with
ME, which is what led to my -first- court-martial. Do you want to hear
that story, too?

> Sucks to be you, non-rate.

Aw, gee, that hurts, Dudly. It's too bad that you get an intrinsic
reward from your false sense of superiority, but that's just a typical
symptom of your narcissistic personality disorder. Like I suggested
before, get some help.

Yes, Len, your typical insulting demeanor. You know, the one which brought about the creation of Jim's apropos profile of your likely actions:

N2EY: "Besides, here's a simple, plain fact:

No matter what job, educational level, employer, or government/military service that a radio amateur has, if said radio amateur opposes Mr. Anderson's views, he/she will be the target of Mr. Anderson's insults, ridicule, name-calling, factual errors, ethnic slurs, excessive emoticons and general infantile behavior."

>
>> What Jim hasn't done is to prevent or attempt to
>>
>>>prevent Len from making those comments.

> Right now, there's not a damn thing Jimmie can do about it...

Slow down and regroup, Len. Jim has done nothing to prevent you from commenting to this newsgroup or to your government. Your rant is vapor.

>
>>The PCTA, including Jim Miccolis/N2EY, immediately set upon

>
>
> The PCTA have been bound and determined to keep morse code
> purity in U.S. amateur radio IN ANY WAY THEY CAN...since back
> in the 1990s and led by Jim Kehler, KH2D, an avowed PCTA.

Yes, by God, he's an AVOWED PCTA, heh heh. Those characters have tried to retain morse testing "IN ANY WAY THEY CAN". Do you think they were ever involved in kidnappings or dog poisonings?

> [sorry, Brian, I know you like Kehler, but he was NOT kind,
> gracious, or anything else civil to me...as old archives show]

As I recall, you never gave him any reasons to be kind, gracious or civil toward you.

> Heil's "argument" is that NO ONE UNLICENSED CAN POSSIBLY TALK
> ANYTHING ABOUT AMATEUR RADIO POLICY. That is patently FALSE.

You're right. Your statement is patently false. You've written and written and written and written. I've made no attempt to stop you from writing. I've countered you. I've pointed out that you have no standing in amateur radio. I've stated that you have no experience in

amateur radio. Those things are all true. I've laughed at you. I've ridiculed you.

> The FCC does not require any staff or Commissioners to hold
> amateur radio license grants in order to REGULATE and ENFORCE
> U.S. amateur radio.

That's great. You aren't with the FCC. You don't regulate or enforce amateur radio. FCC staffers are paid to regulate and enforce amateur radio.

You aren't a licensed radio amateur. You don't participate in amateur radio.

You've commented to the FCC. The FCC is under no obligation to adopt your ideas, agree with your comments or to take them seriously.

> There is NO SUCH PROVISO forbidding U.S.
> citizens from discussing ANY federal regulations or laws.

You've discussed. Many have laughed.

> Heil says one MUST have a license, be a "participant" in amateur
> radio in order to speak about it in any way.

There's one of your factual errors now. No, I've not stated such. You've "spoken" if you want to consider a newsgroup posting or written comments to the FCC as "speaking".

> That is still
> FALSE.

Your statement? Yes, it is.

> Such would forbid newcomers from doing anything priod
> to any test, to remain silent, to blindly accept anything about
> law, regulation, or even "moral-ethical" issues. Heil wants
> SHEEP who blindly accept HIS control/dictates/commands.

As inspirational reading goes, your statement is pretty b-a-a-a-a-d.

> Diplomatic Dave seems to have completely MISSED what Department
> of State uses as its primary tool in carrying out U.S. foreign
> policy: Diplomacy.

I'll remember your words if you're ever declared a foreign country.

> Dave is the antithesis of this as a
> demanding dictator, a self-styled self-propelled tyrant who
> forbids any opposite opinions from his.

You're getting confused again, old timer. I'm not the one who has told others to shut up or leave a newsgroup. The person who did that would be *you*.

> Diplomatic Dave would
> have us ALL throw out the First Amendment of the U.S. Constitution
> because HE doesn't like opinions contrary to his!

There, there. You *are* confused. You don't like opposite opinions and you don't like anyone not taking your pontifications seriously. You insult and denigrate. You tell others to shut up or to leave.

> It's no wonder that U.S. amateur radio is stagnating in the
> number of licensed amateurs with EXAMPLES of the "highest rank"
> in amateurdom such as Heil.

Amateur radio isn't stagnating, Len. You continue to show that you simply don't know much about it.

Dave K8MN

>
>As Len has questioned your net control capabilities.

Not quite true either side. I was citing Heil as a CONTROL FREAK
that he appears to be from all his postings to me. Evident to all.

I have experience in radio. A considerable amount. Most of it is
PROFESSIONAL radio...that kind that pays money for services
rendered.

Heil must not equate government employ in the Department of State
as "professional" yet he obviously got MONEY for that, PLUS living
expenses.

>> > ...they claim that
>> > his opinions are simply no good because Len isn't a ham.

>
>You want us to believe that all of Len's comments are to be discarded.

Heil doesn't like my commenting, therefore I am to be "discarded,"
discredited, demeaned, and some other "d" I can't think of. :-)

>> > David Heil/K8MN is a primary culprit in that tactic, but Jim has used it as
>> > well.
>
>> Oh no, I've by no means been "a primary culprit", but I have
>> participated over a period of years.
>
>Can you guess how many times you've commented that Len isn't an amateur
>radio operator?

He has a macro sentence generator for that. :-)

I've never said I had an amateur radio license. From day one in
here
I've stated that I do not. I have a Commercial radio license.

But, that constant repetition of "not having a license" masks Heil's
INABILITY to reply ON the subject of what he was challenged for. He
tries to wiggle out of a challenge by semi-denigrative, moral
something or others implying that I should NOT be posting in here.

>> Len isn't involved in amateur
>> radio. He wraps himself in bunting and writes of his Constitutional
>> rights of free speech and to petition his government. Well, he has done

>
>Perhaps Len is correct to do so.

Tsk tsk tsk. Heil thinks he has some special dispensation that
allows
him to insult others but others are "not permitted" to fire right
back
at him.

>> He is quick to tell others that they are not discussing amateur radio
>> policy,

>
>Get a clue, he's giving it back to you. He's been told that he is not
>an amateur radio operator and should be here. This is a place only of
>amateurs and amateur things.

Supposedly. Lots of different things are discussed in here. One
such seems to be winding down: The one about evolution versus
creationists. All of radio hasn't been around more than 109 years
and fits NEITHER. :-)

>> then he goes on a multi-post rant having everything to do with
>> personalities and nothing to do with amateur radio.
>
>Have you ever thought of reigning in Robeson? When you do, get back to
>me about Len and we'll talk some more.

Heil must LIKE Dudly...because Dudly attacks me. Heil is living
vicariously, enjoying another personally-insult me. "An enemy of
an enemy is his friend" to slightly paraphrase an old folk saying.

Heil doesn't realize that Dudly's fraudulent behavior is HURTING
the image of U.S. amateur radio.

Miccolis can't rein-in Dudly. Hans Brakob couldn't hold him down.
Katapult Kellie doesn't seem to have tried either way. Jeswald
hasn't said much. NOT a good case for building a good image of
U.S. amateur radio to the public.

There's one of your factual errors now, Len. I've never claimed to be a master of radio. You wrote it. Then again, I never claimed to be a radio god, but you told me that I was...and that I wasn't...and that I was...and that I wasn't.

>
>>>...they claim that
>>>his opinions are simply no good because Len isn't a ham.
>>
>>Sometimes Len's opinions are no good because they are issued because he

>
>
> "No experience?" Is amateur radio different from all other radio?

Yes, it is.

> Tsk, tsk. NO.

Ooops! There's another of your factual errors.

> ALL radio is subject to the SAME physical laws.

Yep. If only amateur radio was simply about the physics of radio, you might have had a point.

> Only MAN-MADE laws differentiate "amateur radio" from all other
> radio.

There's another of your factual errors. There are operating styles and interests. There are, as you so like to point out, modes which are quite popular in amateur radio but which see little use elsewhere. Any number of things set amateur radio apart from other radio services.

> Heil has NO EXPERIENCE in regulating radio, of controlling those
> MAN-MADE laws. Ergo, Heil has NO EXPERIENCE in law-making policy
> concerning radio!

My experience in such matters is pretty much equal to your own. I did serve for two years as the president of the Botswana Amateur Radio Society, the IARU voice of Botswana. Five, six or maybe seven of us got together monthly and decided on whether to vote for or against admitting

the Croation or Ukrainian or such amateur radio society to the IARU.
Our vote carried the same weight as the JARL's or ARRL's.

> To repeat: NOTHING in the laws establishing the FCC require any
> staffer or Commissioner to hold an amateur radio license grant in
> order to REGULATE U.S. amateur radio.

I'm not unclear on this, Len. I understand that you don't work for the
FCC, nor are you a radio amateur.

> By Heil's reasoning, the
> FCC has "no experience" in regulating amateur radio. Obviously
> it does. Just as obviously, Heil's personal opinion is invalid
> in reality.

I've told you and told you, FCC staffers *are paid to regulate,
adminster and enforce* amateur radio. It is their job. No one at the
DMV is required to have a driving license either. Yet those folks are
paid to handle motor vehicles matters within a state. Go figure.

>
>> Sometimes his opinions are no good
>>because they are the rantings of a geezer with an ax to grind.
>
>
> "Geezer?" "Axe?" :-)

Yep. Geezer and ax.

> That from a former employee of the U.S. government supposedly
> involved in "diplomacy" who demands that all newcomers to
> amateur radio test for skill in a 161-year-old primitive
> communications code?

Yes, that. You, on the other hand, demand that morse testing be done
away with in an endeavor in which you play to role.

> "Geezer:" Dictionary definition is "Noun, slang, an eccentric
> olf man." Tsk, tsk, that applies to HEIL more than I. :-)

Not in any realistic sense, it doesn't. You're the "olf man" here.

> Heil is NO youth.

It is all relative, Leonard. When you entered the military, I was
several years from entering primary school. You're "olfer" than me by
at least a decade-and-a-half.

> His youth was left behind many years ago.

I can still remember it easily.

> Heil keeps defending the "necessity" to test for morse code
> skill for an amateur radio license.

Well, at least you've remembered that much. As I recall, you take the opposite view.

> The morse code test for
> an amateur radio license has NEVER left U.S. amateur radio
> regulations...a length of time longer than Heil has been
> alive (71 years).

That's about the same length of time you've been around, isn't it?

> Heil has shown NO valid reasons to retain
> the code test in U.S. regulations; his main comments on that
> is to act uncivilly to all who propose eliminating that code
> test. That fits "eccentric" far more than my wishes to
> eliminate the OLD, unnecessary morse code test.

There've been a number of good reasons advanced for retention of morse testing. Your out-of-hand dismissal of them does not invalidate them. You'd better be careful of advocating doing away with everything OLD and unnecessary in the interests of self-preservation.

> Heil fits the "geezer with a (blunt) axe" to grind far better
> than I. He refuses any change, will not give in to progress
> in regulations.

Change for change's sake does not define progress. Your claim that I refuse to accept any change is another of your factual errors. I quickly accepted the internet. I quickly made the move to digital cameras. I embraced CD and DVD technology. Some change is good. Some change is bad.

>
>> Often,
>>he makes factual errors and there have been numerous times when he

Am I given to understand that you believe that the only thing you have
been doing here is discussing 05-235?

> Discussion, debate, argument about a test for GETTING INTO U.S.
> amateur radio is "ranting?" When it comes to specious, invalid,
> illogical, emotional, subjective "reasons" for its retention IS
> "ranting." By the PCTA.

No, your diatribe above is ranting.

> The NCTA want to OPEN UP U.S. amateur radio, to all who care to
> get into it, NOT restrict entry by some old, outmoded, dictatorial
> and arbitrary barriers which the FCC themselves have said is
> unneccessary.

To all who care to get into it, regardless of qualification to do so?
Please define "old, outmoded, dictatorial and arbitrary barriers", old
timer. You used the plural but go on to say "which the FCC...have said
*is*...

> Heil keeps on RANTING that those old, outmoded,
> dictatorial, arbitrary reasons are "valid" yet has presented NO
> proof to qualify them.

You're still using "them". Beside morse testing, what are the others?

> All Heil has presented are a number of
> personal insults directed to those who oppose him, as below:

If I present a list of your past personal insults directed to other and
if I include the diminuitive forms of names and the insulting names, do
you think you'd have time to read them all before your time on the
planet is done?

>
>>You, of course, are Len's little electrolytic acolyte.
>
>

> I do not know Brian Burke personally. We live 2000+ miles apart.
> By all his words in here, Brian Burke has demonstrated that he is
> HIS OWN MAN, not some "acolyte" or "little electrolyte."

Not really, Leonard. Brian, under a variety of names is a one-liner kind of yes man to you. You, as Hans pointed out, are the organ grinder. Brian is the little red-hatted monkey.

> You
> insult him and myself in saying he is some kind of "acolyte" to

> creation and continuation of the United States of America.

Break out the martial music and the bunting. Here he goes again!

> That Brian and I SHARE THE SAME VIEWPOINT of yourself is due to
> YOUR words.

"Viewpoint of yourself"? Weren't you supposed to be a PROFESSIONAL writer?

> You do not regulate U.S. amateur radio, have never
> been in any position to do so. All you have done is to keep an
> amateur radio license grant for four decades. Many others have
> done so for longer.

That's nice, but I'm not finished yet. If you start now, do you think you could keep an amateur radio license for better than four decades? I mean, you've told me several times that you were involved in radio before I was born (or some such thing). Do you think it'll even out in the end?

> I repeat once again: The FCC does NOT require any staffer or
> Commissioner to hold an amateur radio license grant in order to
> REGULATE and ENFORCE U.S. amateur radio. YOU are NOT a regulator
> or enforcer of U.S. amateur radio; only a wannabee dictator who
> has no more power than any other U.S. citizen, licensed or
> unlicensed. Try to adjust to that very real FACT.

I've responded to it countless times. No, I don't regulate. Then again, you don't regulate. I participate in amateur radio. You do not. FCC staffers are paid to regulate. They may or may not participate in amateur radio. Got it?

> simply allow all authorized modes anywhere in the
> ham bands, by any licensed radio amateur.

Now that's a STRETCH!

I do believe that the FCC over-manages our allocations on most bands with their arbitrary slicing/dicing by mode/license class, without any obvious regard to "market forces". I'd like to see that cumbersome system replaced with a bandplanning model similar to many UHF/VHF bands where the users (that'd be guys like you and me) work out band plans which can be dynamically adjusted to meet our changing needs.

The current US plan which allocates virtually 100% of our spectrum (less some minor slices near 5MHz and 219MHz) to narrowband CW, yet restricts every other mode regardless of popularity to smaller segments, is so backwards as to be spherical in its backwardness (backward from every possible viewing angle).

> It would serve the useful purpose of making
> sure drivers had the basic skills required to
> drive a manual transmission car.

There currently is no such test, but drivers who decide to use manual transmissions seem to learn that skill without a government test.

Similarly if there is no Morse skill test, hams who decide to use that mode will take it upon themselves to learn that skill without the need for government testing.

> That complexity would benefit from some rules changes.
> Like a protected space for good old Morse Code.

Morse code currently enjoys free access to essentially every Hz of amateur spectrum. Since CW is your (and my) favorite mode, that's what Martha Stewart might call "a good thing&#65533;" Would you support removal of that free access in exchange for "protected space" pro-rated by bandwidth relative to "protected space" for other popular modes?

For example, a good fast CW signal might require "protection" for 150Hz and a properly operated SSB station might require "protection" for 2400Hz. Based on that ratio and your notion of "protected space" for each mode, for each 10KHz protected segment of CW spectrum, SSB operators should have a protected segment of 160KHz.

Be careful what you wish for.

Since there was no universe, there was no time. If there was no time, there
obviously was no "before".

Too many words in the English language that are pronounced the same but
spelled differently for speech-to-text to work very well.

Know-no, new-knew, see-sea, I-eye, nose-knows, sail-sale, to-two-too-tu
tu, seem-seam, Sue-sue (name vs litigation), cheep-cheap, but-butt,
ect., ect., ect.

A speech-to-text probgram would have to be able to put the words into
context. Probably doable to some level.

Shellback.... Turtleback..... same difference, but my bad. Still, you
know what I meant. I didn't get that far South.

So where did all the matter in the universe orginially come from? If it
had no beginning, the it just "was". If it did indeed have a beginning,
the what was before that?

Well, I don't care if there are aliens tourists on this planet or not,
just as long as they don't take our jobs, rape our women, or try to
masquerade as retired Marine Corps Gunnery Sergeants.

Your communication deficit is acting up again, Dudly; If you are
referring to form DD-216MC, it begins with, "To all who shall see
these presents, greeting:"

Just for kicks I googled your misquotation; very interesting.....

> Guess Frankie of Silliland wasn't listening when the repeated the

> And Frankie couldn't hack it...

Just like everything else you know about the Marine Corps, you
couldn't even get a promotion certificate right..... and you claim to
have six of them? I don't think so, Dudly.

Come to think of it, if you had several different specialties (as you
claim) then you would have have a LIST in box 11 of -your- DD-214; and
you would have also known that those times listed were for time served
in the MOS indicated.

You bungled again, Dudly.

If that's true then you must have skated right through boot camp.....
especially the gas chamber.

>Corporal on the second round of cutting scores
>(and that was in the rank-tight Avionics MOS of 6616)

Very impressive, especially when enlisted in the only branch of the
military that doesn't use cutting scores for promotions.

>...Sergeant in
>less three years of my arrival in boot camp...

Which means you were promoted only twice in the 15 years that
followed. A record to be proud of, I'm sure.

> Some resource on USMC policy Frank of Silliland turned out to be!

Your ignorance about the Marine Corps is exceeded only by your
third-grade rhetoric -- hopefully that Pee-Wee Herman seminar you
attended didn't include tips on public masterbation.

Of course it hasn't been "paid."
You don't PAY an "apparent" liability.
You pay it IF and WHEN when it becomes a fine.

Digital modes involve a certain skill level at typing.
No one is tested to be sure they can operate at
X wpm minimum speed. Additionally, what's wrong with
a ham starting out at even 1 wpm on the air. Why
must there be a minimum skill level. Two no-code
techs can do that now on VHF. What's so special
about HF vs VHF. Clearly the international community
no longer sees the need for a morse skill test.

You assume ALL unknown questions would be answered wrong.
Test taking 101 sez for ALL questions you don't know the answer to
pick C. Doing so for 10 questions the test taker has no clue on
is bound to net at least 2 or 3 correct answers.

But let's say you get 50% of those. Then you may end up
passing the test if all the other stuff (rules/regs) is answered

correctly. That isn't the case for the stand-alone morse
test.

> The fact of the matter is that the current written tests involve a lot

And the IARU plus the WRC have stated it isn't required. They have
left the choice to each individual administration...and that's where we
are today in USA regs. The FCC has said it will end all morse
testing (NPRM 05-235). Commentors are now and have been
submitting their views for a month or more already. I haven't
seen even ONE persuasive new argument to save code testing.
All the procode test support argumennts are the same ones
as before which the FCC has already reviewed and dismissed.

I've said before that I have no problem with doing so.
Within the USA, we could do so via ARRL voluntary
bandplans without ever involving the FCC.
Doing so might actually serve as a good incentive for some
folks to learn and use morse. Makes far more sense to
me than trying to keep the test itself.

And they appear to do so with no threat to anyone else.
When my kids got their licenses they first learned and passed
their test using an automatic transmission. They later then
took on the task of learning manual transmissions at a point
where they alraedy were comfortable with the basic driving
skills and could then focus more on the additional skills
needed to drive a manual gearbox vehicle.

There's nothing "bull####", Frankie, except YOUR suggestion that
you're some sort of valid point of reference as to what constitutes
having "served" in the Marines or not.

> Back in early '85 I injured my knee on a forced march....(SNIP)

What happened to YOU happened to YOU, and is not indicative of how
EVERY Marine's case is handled, Frankie...Mine included.

Big snip of sob story.

> Now a medical discharge is also a "general under honorable" discharge.

My original says "HONORABLE."

No qualifiers.

Sorry yours was otherwise.

> So all those claims of yours about your discharge are completely
> bogus, Dudly. They have absolutely no foundation in reality.

What has "no foundation in reality" is any suggestion that you are
a competent, reliable source of "corporate knowledge" on the Marine
Corps other than being a one-tour, sick-bay-commando discipline
problem.

> > Loser. Hoser. Poser.
> >
>
> Coming from a retired Marine Corps gunny, that's pathetic.

Sorry, Frankie.

I "call's em as I see's em"...

You come in here whipping up a storm making claims of who is a
"valid" Marine and who isn't, and you turn out to be the aforementioned
one-tour, sick-bay-commando discipline problem.

> If you are
> going to continue this "truth-by-repitition" charade then at least get
> someone to ghost-write your posts so you don't sound like a 3rd grade
> dropout.

"repetition"

And if you'e going to come at me with assertions of what is and
isn't "The Real Marine Corps", at least have the decency of having
Honorably served that same Marine Corps. YOU DIDN'T. You made a
PROMISE when you enlisted and you FAILED to keep up your end of the
bargain. Not once, but twice, by your own admission.

Loser.

Here you have a true picture of the sorry state of amateur radio. A bunch of ancient, silly old men lying about military service, and arguing about such... all which has nothing to do with the amateur hobby in this century, in this millennium...

These subjects, which the vast majority of amateurs have no interest in, do nothing to assist amateur radio, indeed, they only further aids its' decay.

CW is as important to the future as the model A, the steam engine, the the horse and buggy, etc... and yet you have the greatest expenditure of energy revolving around it. There are no men with the vision, courage and skills to be able to step in and move focus on points which would move amateur radio ahead...

Only old gossipers using ancient technology to further their own self-serving interests are the problem, sane men have fled for other frontiers...

It is ridiculous to watch...

John

> Repeaters, satellites and beacons are robots of a sort.
> Should we ban those too?

Of course, the repeater is supposed to have an active control OP. The frequencies are also agreed upon. IOW, anyone operating simplex on say the portions of 2 meters designated as repeater frequencies might expect some problems. Sats are also pretty well defined too.

The nature of PSK31 is to use what is essentially the BW that 1 SSB signal would use. We pack a lot of signals in that small space. Due to the nature of the signal and modulation, we tend to congregate in just that one area.

When the pactor station opens up beside us, we can't tell each other to QSY, we are done for the day. Turn off the rig, or maybe change the band.

I suppose that we could agree on a predefined frequency to change to in the event of interference, since there is no way to let the robot station know that it is interfering with us.

But it seems to me that we are allowing unattended operation to interfere with what is a popular, BW conserving mode, populated by Amateurs who are at least (moreso IMHO) as gentlemanly and ladylike as CW to be QRM'ed in the interest of getting the spam through.

Yeah - progress.....

First, let me state my position:

I do not believe that one way transmissions should be legal on the
amateur bands.

Period.

All of the "qualifications as to published schedules, frequencies,
interests, and controls is bafflegab, designed to justify the ARRL
transmissions.

There are people like K1MAN in the world, ready to rub peoples noses in
the mud any chance they get. and this is a big fat chance here!

Now those are all things that can be worked on.

Did you hear about the proposed PSK31 text/voice mode? It actually
would probably work better as BPSK64, but it is both interesting and
goofy at the same time.

don't forget, you have to call cq until someone answers you, otherwise it would be a one-way transmission! so you better be darn sure there is someone that is going to answer you before you call cq.

Not unless it is part of an emergency net, and therefore inherently
part of two way conversations. If it is just a broadcast, turn on Fox
News or CNN.

> No code practice sessions?

No. With the dropping of Element 1, code testing can now be self
taught. Get on the air, and find someone who will QSO wit ya. And no anyhow.

> No remote control of satellites?

That is part of establishing (or cutting off) two way communications

That is part of establishing (or cutting off) two way communications.

> No propagation beacons?

No. Try calling CQ! ;^)

> No APRS? (Not even in balloons?)

That is part of a two way system. (balloons)

I must confess that I don't know enough about ground based APRS to make
an informed judgment.

> No auxiliary links between remote elements of a repeater system?

Still part of two way comms.

> No.....
>
> "Period"

There is a big difference between what happens when a repeater or satellite is used, and when someone starts yappin or beepin with no intention of getting a reply.

The determination is made by the litmus test of whether or not the signals are used in two way transmissions or not.

Negative.

Unless a person is some kind of nut case where they just sit and call CQ without any intention of establishing a QSO, they are trying to engage in a two-way conversation.

Is K1MAN trying to engage in a QSO?

Is ARRL trying to engage in a QSO?

Is someone calling CQ trying to engage in a QSO?

Someone using a repeater?

Presumably, the answers are no, no, yes, yes.

See, it isn't to hard to have my opinion on this. It is at least as consistent as the Byzantine qualifications that people try to use to justify W1AW broadcasts versus K1MAN bulletins!

Some of us think perhaps a little more consistent.....

- Mike KB3EIA -

## 3330. What is the difference between control signals and broadcasts?

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-29 18:40:23 UTC
From: Michael Coslo <mjc5@enoughalready.psu.edu>
Message-ID: <devkqn$eh8$1@f04n12.cac.psu.edu>
Source record: 117681

Since it seems that I am hopelessly confused between control signals and broadcasts, could some of the more knowledgeable hams give me a little primer on how K1MAN broadcasts are the same thing as sending a control signal to a repeater?

# 3331. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-29 18:46:02 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1125341162.164775.298570@g43g2000cwa.googlegroups.com>
Source record: 117682

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

26 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1923

Indeterminate/duplicates (note 1) 94

Unambiguously Against NPRM (note 2) 524 28.65%
Unambiguously For NPRM (note 3) 1040 56.86%
Code test ONLY for Extras (note 4) 265 14.49%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and six who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 26 Aug 05 that would be 1829.

As of 29 Aug 05, there still hasn't been any notice in the
Federal Register under Federal Communications Commission on
the NPRM FCC 05-143 or WT Docket 05-235. I wonder why not?

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

<snip of analogies into far-different activities>

>>> > Morse Code accounts for a lot more than 5% of amateur radio
>>> > HF/MF operation.

The U.S. amateur radio frequency allocations show that
MF-HF accounts for only 1 percent (rounding to integers)
of total bandspace. Manual radiotelegraphy ("CW") is
optional for ANY amateur class (except the old Novice)
on ANY amateur band above 30 MHz...yet, without taking
any "official poll" on it, it is obvious that "CW" is
LESS than 1 percent of all amateur operation above 30 MHz.
One percent of one percent gets to be a tiny value.

>>> The point still reverts to the exclusivity (i.e. stand-alone)

>no longer sees the need for a morse skill test.

Anyone with a communications receiver or scanner can find
out that FEW "average hams" speak or enunciate well. :-)
There has NEVER been a speaking test for ANY U.S. amateur
radio license examination.

FEW "average persons" can operate TV modes, slow or fast
scan, without the automatic easy-to-use features found on
all consumer grade motion-picture cameras on the market

now. I've not only used an RCA studio TV camera WITHOUT
those features but checked alignment/scanning and the
electronics of same. NO SUCH TV mode MANUAL TEST is done
in U.S. amateur radio licensing.

NO Manual Data mode TEST has ever been required in U.S.
amateur radio licensing EVER, yet the FCC allocates Data
modes coexisting with "CW" on almost all amateur bands.

Manual radiotelegraphy "proficiency" testing has ALWAYS
been in U.S. amateur radio licensing, through the three
predecessor radio regulating agencies before the FCC was
created. It is an "artifact" of testing that has never
been removed due to opposition from just enough lobbying
efforts to keep it in place. That it has "always been
there" is absolutely NO valid reason to keep it.

The international community, as represented by the IARU,
came out over a year before WRC-03 on eliminating the code
test for any license...at the option of each
administration. The ARRL was opposed to elimination on
through the last day of WRC-03 and now are ambivilent on
that. We have yet to see the ARRL's comments on NPRM
05-143 in WT Docket 05-235.

The ARRL's "compromise" plan is to retain the code test
for Amateur Extra only. That is clearly a sop to their
core membership who favor radiotelegraphy. However, at
only 145 thousand members, the total ARRL membership is
only about 20% of all individual licensed radio amateurs
in the USA (721,481 as of 26 August 2005).

>> How many hams would have to learn to talk in order to use voice
>> modes?

More than you would believe to listen to them on the air. :-)

>> How many would have to learn to read and type to use keyboard
>> modes?

"Data" modes are not restricted to just keyboard input.

>> What's different about Morse Code is that most new hams today have to
>> learn it just for amateur radio. And that, IMHO, is what bugs some
>> folks so much.
>
>Probably so.

Not "probably." MOST CERTAINLY.

52 years ago when I operated my first big HF transmitter, "CW"
skills were NOT required to send TTY and Voice on HF over "DX"
paths. Of course that was in the military and the morsemen's
argument is "that isn't amateur radio!" :-) Well, neither is

broadcasting (called "Mass Media" radio services now), private
land mobile radio service, aircraft radio service, or personal
radio services...but all those services operate by the very
same physical laws as does amateur radio service. Broadcasting,
PLMRS, aircraft, personal radio services do NOT use "CW" mode
nor do they test for that.

Probably what REALLY "bugs" the NCTA is the terrible arrogance
of the PCTA that morse code is the heart and soul of amateur
radio, or words to that effect...plus, "only 'real' amateurs
know code," a terribly elitist, exclusionary bit of bigotry
that grew stronger with the so-called "incentive plan" licensing
(lobbied for by the ARRL).

<snip>

>> But if you define "subject area" as "questions about voice modes", it's

>Test taking 101 sez for ALL questions you don't know the answer to
>pick C. Doing so for 10 questions the test taker has no clue on
>is bound to net at least 2 or 3 correct answers.

Miccolis is trying to tap-dance around the plain, simple fact:
Fail the code test on a General or Extra exam and one FAILS
to get the General or Extra upgrade. NOT a question of
"so many 'other' questions right/wrong," a matter of singular
FAILURE.

<snip>

>> But you can't miss all of them.
>
>But let's say you get 50% of those. Then you may end up
>passing the test if all the other stuff (rules/regs) is answered
>correctly. That isn't the case for the stand-alone morse
>test.

You said that before, I've said that before, lots of others have
said that before, and the FCC says so in the regulations.
Miccolis is trying to smokescreen the plain, simple fact that
the manual radiotelegraphy test is stand-alone and NOT a part
of the written test elements.

>> The fact of the matter is that the current written tests involve a lot
>> of subject areas, but not in a lot of depth. Morse Code testing
>> involves one subject area, in somewhat more depth (although at 5 wpm,

>seen even ONE persuasive new argument to save code testing.

Excuse me? Morse code will be extremely valuable in coordinating
communications to counter-attacking alien invaders; the will
never understand morse code so they will be caught be surprise.
That has been amply documented in the film "Independence Day."

:-)

>All the procode test support argumennts are the same ones
>as before which the FCC has already reviewed and dismissed.

Deja vu all over again. <yawn>

>> So would you support a reasonable set of Morse Code only subbands,
>> Bill? Say, the bottom 10-15% of each HF ham band?
>
>I've said before that I have no problem with doing so.
>Within the USA, we could do so via ARRL voluntary
>bandplans without ever involving the FCC.
>Doing so might actually serve as a good incentive for some
>folks to learn and use morse. Makes far more sense to
>me than trying to keep the test itself.

NPRM 05-143 is NOT about "bandplans." It is SOLEY
concerned with elimination or retention of Test Element 1,
the manual radiotelegraphy skill test.

<snip>

>> One thing I notice about FCC R&Os for the amateur service is that
>> they almost never put changes into effect on the first of a month -
>> always midmonth or something like that.
>
>We'll see.

Hello? WHEN was R&O 99-412 issued? [it was on "restructuring"]

Good grief, all these "insiders" haven't been making notes...

What does the one way transmission to the repeater do? Is it just something that is done for fun, or "information" or is it something else? What about a signal to say, turn on a stray elimination filter? Is that just for sending out a signal, or is that signal made in order to improve the communications that the repeater handles? Are the signal tones that I send to activate the autopatch one way transmissions?

We seem to be very close to arguing that the subaudible tones, which are used to get me into some repeaters in the first place, are one way transmissions.

Or like the cute post about how if no one answers my CQ, I am making a broadcast.

Seems like people are doing a bit of stretch on what I am talking about here. Slippery slopin' it the whole way down. Slippery slope arguments are so tedious. Kinda like the old dudes at the mall getting upset because teenage girls are wearing shirts that expose their bellybuttons, and that means that soon we'll all be forced to worship Satan or sumpthin'..... yeah I suppose so. ;^)

> broadcast.
>
no, a cq may be a one way transmission, but it is not a broadcast... a
review of the basics is in order i think.

```
definition in 97.3(a)
(10) Broadcasting. Transmissions intended for reception by the general
public, either direct or relayed.

from operating standards in 97.111

(b) In addition to one-way transmissions specifically authorized elsewhere
in this Part, an amateur station may transmit the following types of one-way
communications:
```

(1) Brief transmissions necessary to make adjustments to the station;
(2) Brief transmissions necessary to establishing two-way communications with other stations;

(3) Telecommand;

(4) Transmissions necessary to providing emergency communications;

(5) Transmissions necessary to assisting persons learning, or improving proficiency in, the international Morse code;

(6) Transmissions necessary to disseminate information bulletins;

(7) Transmissions of telemetry.

so, to totally ban one-way transmissions you would have to stop all these specifically permitted types of one-way transmissions. it is interesting to note the definition of broadcasting specifically aims the transmission at the general public... and the paragraphs that talk about transmitting information bulletins or code practice do not use the word broadcasting, they call it transmissions or transmitting.

True, but all that really means is that there needs to be somebody who
can shut the repeater down in case of trouble.

If a repeater is operating normally and the hams using it
follow the rules, its operation can be completely
automatic.

> The
> frequencies are also agreed upon. IOW, anyone operating simplex > on say

And that's the whole point - let there be a place for the robots, not a
ban on them.
>
> The nature of PSK31 is to use what is essentially the BW
> that 1 SSB
> signal would use.

Not really. That's just current practice. It was driven in part by rigs
like the Warbler, and in part by the desire to avoid manually tuning
your rig.

> We pack a lot of signals in that small space. Due to
> the nature of the signal and modulation, we tend to congregate > in just that one area.

I think the congregating is due more to the nature of the
hardware/software implementations.

The Warbler is/was the ultimate example of that implementation - no
tuning at all! It takes in a couple-of-kHz slice of the band
and lets the soundcard and audio do the heavy demodulation and
modulation. Makes for a simple but highly inflexible radio.

> When the pactor station opens up beside us, we can't tell
> each other to
> QSY, we are done for the day. Turn off the rig,
> or maybe change the band.

Or switch modes to tell the others the new QRG. Gee, what mode
could do that job......?
>

Perhaps the robot's design should be such to detect what is going on..

But you raise a question - does the robot open up on top of the PSK31
watering hole, or adjacent to it?
>

Which is why coordination is needed. The robots need their place
and the PSKers *their* place.

You might be interested to research what used to go on around 3579
before PSK31 made that QRG popular for the mode...

As has been demonstrated in other posts, that's not a very
tenable position. Banning "one way" transmissions of all
types from amateur radio would seriously impede many
important aspects of the Amateur Radio Service, without
much in the way of benefits.
>
> All of the "qualifications as to published schedules,

Not bafflegab at all, but rules designed to permit
important activities while still banning out-and-out
broadcasting.

> There are people like K1MAN in the world, ready to
> rub peoples noses in
> the mud any chance they get. and this is a big fat chance here!

IIRC, 'MAN violated several of the above requirements. For example,
there were times when there was no control operator
apparent.

Only if the rules change.

> Did you hear about the proposed PSK31 text/voice mode?

Not yet. As I understand the present rules, it's not allowed
on amateur HF in the USA. If you use it in the 'phone/image
subbands it's not allowed because of the text part, and if
you use it in the Morse Code/data subbands it's not allowed because of
the voice part.

Which shows the real problem: Short-circuit between the head-phones.

The robot problem has nothing to do with one-way transmissions.
It's a completely different situation.

YES. Are you running for anything now, Hans? :-)

>Present company excepted, how about these representative examples just for
>starters....
>
>...W1RFI
>...KE4ZV
>...KA9Q
>...WB9IVR(SK)
>...KE3Z

Have those listed individuals been here in the last year? Last two
years?

Ed Hare (W1RFI) and Jon Bloom (KE3Z) are both EMPLOEES of the ARRL.
[Jon makes more than Ed]

I suppose either or both could run for some League office, but, to
avoid obvious conflict of interest charges and finger-pointing, they
would have to quit.

Gary Coffman (KE4ZV) USED to post in here on a fairly regular basis.
If he is running for some kind of post, I don't know it and will
civilly accept a correction. He hasn't been here lately.

Phil Karn (KA9Q) is vice-president for technology of Qualcomm. I
remember only one posting from him in THIS newsgroup.

Remember that "cell phones 'always' fail in an emergency" and can't
ever be used for emergency communications according to some amateur
mythologists. :-) [Qualcomm makes cell phone stuff for those too
iggorant to keep up with raddio things]

Hiram Percy Maxim (W1AW) is reputed to have "done a lot for amateur
radio" but he passed on before the electronic computer became
reality, well before the PC and the Internet existed.

Don Stoner did a lot for advancing the state of the (HF) amateur radio art and he and Pierre Goral formed a company in WA state called SGC (the Stoner-Goral Company). I don't think either one has been here, much less lately. They are both SK now.

All sorts of names come to mind. What else would you like to be corrected on? :-)

| > No remote control of model airplanes?
|
| Is that us?

Some of it is, yes.

The 72 mHz band is the `main' R/C plane band, and not ham radio, but there's frequencies in the six meter band allocated to R/C control.

Several of my R/C planes are on channel 5, 50.900 MHz. Ham band. According to the FCC regulations, I don't have to ID myself for model control like this, but I do have to put my call sign on the transmitter. And so there's a little sticker on the module that says AD5RH and has my name and number.

I'm not sure how anybody could claim that model control is not a one way transmission -- the plane doesn't have any sort of transmitter at all.

> not government mandated "indian reservations".

Coordination can take many forms.

At one extreme is the pure
"gentleman's agreement", which is not even formally codified
but is widely observed. For example, you don't hear routine
Morse Code operation in the 'phone/image subbands, even though
it's perfectly legal there. You may occasionally hear some
Morse Code used when conditions go bad enough to make SSB or AM
voice unusable, (such as KT4ST's experiences in a hurricane situation)
but not so bad as to keep Morse Code from getting
through. But that's the exception which proves the rule.

At the other extreme is absolute FCC regulation, like the
prohibition of "data" modes from the 'phone/image subbands.

In between are what is considered "good amateur practice" which,
while not formally part of FCC rules, needs to be followed to
avoid FCC enforcement action. For example, Part 97 does not
formally spell out repeater input and output frequencies nor
coordination rules. But if someone sets up an uncoordinated
repeater, and causes harmful interference to a coordinated
repeater, FCC can force the uncoordinated machine to move or
leave the air.
air.

Fox News and CNN don't seem to cover the situation in the detail
needed by those in the affected area.

> > No code practice sessions?
>
> No. With the dropping of Element 1, code testing can

??

It's always been possible for code to be self-taught.
That's how I learned - listening to hams on 80 meters.
With a homebrew two-tube regenerative receiver and a wire
out to the crab apple tree.

>Get on the air, and find someone who will QSO wit ya. And no
>anyhow.

If someone wants to learn Morse Code in order to actually
*use* the mode, rather than just to pass the test, being
able to listen to real live ham stations is the best way
to learn. Code practice like W1AW is predictable, dependable,
high quality and of known speed.

Is there no room on the bands for a few hours of Morse Code
practice?

> > No remote control of satellites?

> That is part of establishing (or cutting off) two way
> communications

The first amateur radio satellite, launched more than 40
years ago, only carried a transmitter. It sent some basic
telemetry. Under your rules it would not have been allowed.

> > No remote control of model airplanes?
>
> Is that us?

Yes.

> > No remote control of repeaters?
>
> That is part of establishing (or cutting off) two way
> communications.

Sounds like bafflegab to me. If the repeater sticks on and I
send a shutdown command, and the repeater goes dead, that's
one way.
>
> > No telemetry from satellites?
>
> That is part of establishing (or cutting off) two way
> communications.

Only if the satellite is capable of two way. See Oscar 1,
above.
>
> > No propagation beacons?
>
> No. Try calling CQ! ;^)

The beacons are useful because they are a known quantity.

> > No APRS? (Not even in balloons?)
>
> That is part of a two way system. (balloons)

Not necessarily.

So it's really all about *intent*, not about two-way
or one-way communications.

That much I can agree with!
>
> The determination is made by the litmus test of whether or not > the signals are used in two way transmissions or not.

Why?

What's wrong with beacons? Radio control? Code practice?
Telecommand and telemetry?

Seems the "no one way" stuff would really cut out a lot
of good things from the ARS, for no good reason.

btw, the pactor robots are not one-way devices - they are trying to
carry out two-way comms, right?

It wouldn't matter.

Frankie took a spill over one of his own "trip ups".

A Marine has the RIGHT to Request Mast to HIGHER headquarters
irrespective of the consent or advice of the lower level command.

That his "chain of command" was "in the field" was irrelevent.

He had recource. He didn't pursue it.

Obviously the OIC of the Court Martial wasn't impressed with
Frankie's story, either. USMC Court Martials don't like having
judgements overturned on appeal anymore than civilian courts do, and
had Frankie had VALID reason for refusing an order, they would have,
at the very least, returned the issue back to his commander for Article
15 (Office Hours). Seemingly he HAD that reason. There's more to the
"big story" than Frankie's telling of it...

Actually John the boys on 75 meters will have much to talk about
over the comming days with Hurrican Katrina and it's effects on
New Orleans. Last night I was listening up on 3.9-- and heard
conversations going on like.....

"..hey Clem, did you just see the bigassed black woman complaining
on MS-NBC because shes been waiting for 3 hours to get into the
Superdome with her 4 nigglets and how that it ain't right keeping
needy families out in the rain.... HAHAHAHAHAHA!!!"

(to which Clem -name changed- replies:)

"naw I'm watchin CNN ain't interested, those ni-gers can all drown for what
I care"

It's great to see that Ham Radio still has it's monopoly on
racist 4-land rednecks like it had back in 1950. Then I went
to tuning across the band and the hurricane was the topic

of conversation with comments like tihis:

"I saw a pix of the bros packing in there a few min ago..
can U imagine the stench when the toilets back up from
the flooding??? Ughhhh.... Think about the smell of the
food wrappers and food leftovers in the trash cans, the
dregs of New Orleans without showers. Unless they
let people cycle through the dressing room showers.
It will be funky enough with the sewers working.
The really sad part is the foreigners who were caught in
all this. They will be stuck in the Superdome with the
very worst America has to offer."

Yeah Hans, You are right. I really meant any transmission that does not
elicit a return transmission. This means no control signals, no polling
receivers and transmitters, nothing other than humans talking or beeping
to each other. No sub-audible tones, nothing to make a machine on which
you want to talk to another do something that aids in that talking.
Yeah, that is what I meant. I don't consider those one way transmissions
because they aren't IMO.

Have fun!

Tsk, tsk. Dudly takes a spill just about every time he posts
here. :-)

> A Marine has the RIGHT to Request Mast to HIGHER headquarters
>irrespective of the consent or advice of the lower level command.

UCMJ doesn't apply to USMC anymore? :-)

Not so!

> That his "chain of command" was "in the field" was irrelevent.
>
> He had recource. He didn't pursue it.

Dudly yanks our chains with nearly every posting also... :-)

Dudly ought to pay attention to his words. "Recourse" or
"resource," which is it?

> Obviously the OIC of the Court Martial wasn't impressed with
>Frankie's story, either.

Those are called "President of the Court," Dudly. It's spelled
out in the UCMJ.

> USMC Court Martials don't like having
>judgements overturned on appeal anymore than civilian courts do, and

>had Frankie had VALID reason for refusing an order, they would have,
>at the very least, returned the issue back to his commander for Article
>15 (Office Hours). Seemingly he HAD that reason. There's more to the
>"big story" than Frankie's telling of it...

What's the "big story" with Dudly? So far he's said dink on
his "medical-turned-honorable discharge due to an accident."

Dudly no spell out specifics, just make vague generalities.

Dudly also FORGET that UCMJ applies to ALL branches, including
USMC. "It's the LAW."

Dudly do a BAD imitation of David James Elliott in here. This
is NOT the "JAG" show production office. :-)

Dudly need better writers. He no pay scale. He may have scales.

This forum be about AMATEUR RADIO POLICY, not blood-pinning of
USMC wannabes like Dud.

Temper fry, wannabe.

With the dropping of the code testing, it will be even more important to
have the code practice transmissions. There will be fewer Elmers available
to teach those wish to learn.

It is currently allowed under the FCC rules. And some people do use it for
that. I forget the details since I don't get into remote control models.

I've heard both the K1MAN transmissions and the W1AW transmissions. They
are so far apart that it doesn't take "Byzantine qualifications" to separate
the two.

Yes, by my own admission. Yes, I could have walked right up to the
commanding General, but I didn't. I chose a different course of action
based on the circumstances. If you had ever been in a grunt unit you
would understand those circumstances, but you weren't so don't try.

But this discussion isn't about me, Dudly -- it's about YOU and the
bogus claims you have made about your service (if you even served at
all).

>at the very least, returned the issue back to his commander for Article
>15 (Office Hours). Seemingly he HAD that reason. There's more to the
>"big story" than Frankie's telling of it...

Nothing that you couldn't figure out from what I told you already. The
presiding officer ("OIC of the Court Martial"? LOL!) made his decision
based on the evidence and testimony presented, which -didn't- include
the medical evaluation from mainside hospital because that had not yet
occured. You also missed the part about the shop chief getting a
reprimand for lifting my light-duty chit and giving me an illegal
order. It's clear that you can't comprehend anything that doesn't fit

into your twisted little fantasies.

And as far as "trip ups" are concerned, let's take a closer look at your postings lately..... Since I started confronting your lies with facts your entire personality has changed. You used to be relatively calm and controlled, but now your posts are filled with nothing but repititious 'Hermanesque' catch-phrases and buzzwords that only -you- think are effective at bolstering your credibility. You used to try and exert control over your challengers by starting new threads with almost every reply, yet for the past week you can't seem to break out of -this- thread. You used to be the spelling cop, but now almost every post by you has several spelling errors because of the frantic rage that comes over you when replying to my posts. All your defensive tag-team parters have abandoned you. In your frenzy of hatred you don't even realize that you frequently contradict your previous claims, sometimes even in the same sentence; e.g, "My original says 'HONORABLE.'" Yes it does, Dudly, but you left out a few words, like "General under 'Honorable' conditions". And if your "original" was honorable then there's no need to get it changed. Just one more bogus excuse after another. Rarely do you reply to any post that confronts you with hard facts -- instead you seek posts that you think you can spin and maybe bluff yourself into a positive light. Even when you -do- address hard facts you are always wrong; e.g, the USMC didn't use cutting scores for promotions in the '70's, either. I tell the truth about my service, good or bad; but while all you do is try to crush my credibility by dwelling on my mistakes, you don't even realize that openly admitting my mistakes gives me more credibility than you will -ever- achieve. And then there's the biggie: You put -so much- effort into protecting your story when it would be so much easier to just scan your DD-214, or discharge certificate, or dog-tag, etc, block out the important info just like I did, and post it. The issue would be resolved and you wouldn't be challenged any more. But you don't because your claims are nothing but lies and you -love- the attention.

And you accuse -ME- of making "trip ups"? You're a fraud, Dudly. Your stories are a fraud, your USMC career is a fraud, your personality is a fraud, and your life is a fraud.

Now I'm going to give you a suggestion: Take a couple weeks off from the newsgroups. Go camping, get some fresh air, a fresh perspective, and get laid if you can. Then come back here, come clean about your lies, and be yourself. You will catch some flack to be sure, but that will eventually die down after a few months. Maybe you don't realize this but people -will- respect you for who you are even if you haven't accomplished much with your life -- heck, I should know! But if you keep up with this ridiculous facade then don't expect things to improve because they won't. Of course if you really -like- all this negative attention then..... well, just know that it's people like you who keep state-funded mental health agencies in business.

So what'll it be, Dudly?

Two promotions in 15 years as a staff NCO, selected by cutting scores
that were never used, and granted with promotion certificates you
can't read. Yeah, you sure made your case, Dudly.

The balance between the universe (as we know it) existing and not existing is very delicate. Take the gravitional constant (the force of gravity). If the gravitional constant were larger, stars would form no bigger than the earth and would burn up in a very short time (less than a year). If the gravitional constant were smaller, expansion of matter would proceed at such a fast pace that gravity could not keep stars together and ignite nuclear burning of their cores.

So how did this force of gravity come to be just the right amount of force to allow creation of stars and planets? By accident or by design?

A question not likely to be answered anytime soon, if ever, but curious minds want to know.

Sorry, Frankie of Silliland..it IS about you.

You "served" 1/4th as long as I did and got court martialed twice.
Then you want to come in here throwing your "reputation" around to try
and diminish MY service.

Sorry, putz...You don't add up to the top of my jump boots.

Steve, K4YZ

I see you made your choice.

> You "served" 1/4th as long as I did

You still haven't proven that you served -at all-!

> and got court martialed twice.

"Court martialed" isn't even a word, Dudly.

> Then you want to come in here throwing your "reputation" around

Wrong. I challenged you with facts. Once again, Dudly, it's not about
me -or- my "reputation" whether be it good -or- bad.

> to try
>and diminish MY service.

You haven't provided -any- proof that you served -at all-! Nor have
you described anything about your service that could be "diminished",

except for your few claims that resulted in you "diminishing" yourself
because they were contradicted by facts. It was YOU that lied about
your "service" -- don't blame me for the consequences of your lies.

> Sorry, putz...You don't add up to the top of my jump boots.

"Jump boots"? LOL!

I understand them fine.

You violated a lawful order and took your chances for it.

And if there was mitigating evidence as to your culpability in
your court martials, they could have been overturned on appeal.

Obviously they weren't.

> And as far as "trip ups" are concerned, let's take a closer look at
> your postings lately..... Since I started confronting your lies with
> facts your entire personality has changed. You used to be relatively
> calm and controlled, but now your posts are filled with nothing but

> think are effective at bolstering your credibility.

My "credibility" doesn't hinge on one tour in the USMC that was
pock-marked with not one but two court martials.

You're the one in the credibility deficit, Frankie.

Nor does my "credibility" in this NG count on ANY of my service in
the Corps...This is an Amatuer Radio forum, and I am an Amateur Radio
operator.

You're not. Nor is Lennie. And it shows. (And that's NOT a
"positive" thing...)

> You used to try
> and exert control over your challengers by starting new threads with
> almost every reply, yet for the past week you can't seem to break out
> of -this- thread.

If you were paying attention, Frankie, the threads were in
response to MARKIE'S frequent changes.

And it seems to me that "Laying Waste To Frank of Silliland's
Silliness" is pretty appropriate.

> You used to be the spelling cop, but now almost
> every post by you has several spelling errors because of the frantic
> rage that comes over you when replying to my posts.

No more than any other, Frankie.

Nice try.

And you ahve tried to make some "points" about typing mistakes I
ahve made, yet have had a few of your own..Big deal.

> All your defensive tag-team parters have abandoned you.

So someone doesn't post for 24 hours and they've "abandoned" the
thread?

Or maybe they just realize that you're the loser you've turned out
to be...

> In your frenzy of hatred you
> don't even realize that you frequently contradict your previous
> claims, sometimes even in the same sentence; e.g, "My original says
> 'HONORABLE.'" Yes it does, Dudly, but you left out a few words, like
> "General under 'Honorable' conditions". And if your "original" was
> honorable then there's no need to get it changed.

Mine just says "HONORABLE", Your Busted-to-Nonratedness. JUST
"Honorable". No qualifiers.

And again you try to base what happened to YOU as the one-and-only
truthfulness of the Marine Corps.

You're a disgraced loser, Frankie. There's nothing I can do to
fix that.

And now it appears that "liar" is appropriate for you, too.

> Just one more bogus
> excuse after another. Rarely do you reply to any post that confronts
> you with hard facts -- instead you seek posts that you think you can
> spin and maybe bluff yourself into a positive light. Even when you
> -do- address hard facts you are always wrong; e.g, the USMC didn't use
> cutting scores for promotions in the '70's, either.

Lie, lie and more lie, Frankie.

Stop it. You're embarrassing yourself. You're embarrassing me.

> I tell the truth
> about my service, good or bad; but while all you do is try to crush my
> credibility by dwelling on my mistakes, you don't even realize that
> openly admitting my mistakes gives me more credibility than you will
> -ever- achieve.

Congratulations on being able to look yourself in the mirror and
convince yourself that having been court martialed twice is a prideful
thing, Frankie.

Maybe you can teach that technique to some of the folks who appear
on "America's Most Wanted".

> And then there's the biggie: You put -so much- effort
> into protecting your story when it would be so much easier to just
> scan your DD-214, or discharge certificate, or dog-tag, etc, block out
> the important info just like I did, and post it. The issue would be
> resolved and you wouldn't be challenged any more. But you don't
> because your claims are nothing but lies and you -love- the attention.

And you...?!?!

You need to learn how to use effective paragraphs, Frankie.

As for the rest, I've provided more than a few public resources to validate my "claims", as you call them through...

YOUR answer was to claim that they were, most likely, just someone with a similar name claiming someone else's "service".

Even if I do provide a copy of my -214, I expect no less than the same claims of "it's a forgery" or other such silliness.

> And you accuse -ME- of making "trip ups"? You're a fraud, Dudly. Your
> stories are a fraud, your USMC career is a fraud, your personality is
> a fraud, and your life is a fraud.

Nope.

But your stories about it are.

Frank Gilliland is a liar.

> Now I'm going to give you a suggestion: Take a couple weeks off from
> the newsgroups. Go camping, get some fresh air, a fresh perspective,
> and get laid if you can. Then come back here, come clean about your
> lies, and be yourself.

What lies?

The only one's being told here are by you and The Feeble Five Bretheren.

> You will catch some flack to be sure, but that
> will eventually die down after a few months. Maybe you don't realize
> this but people -will- respect you for who you are even if you haven't
> accomplished much with your life -- heck, I should know!

People already respect me for who I am, what I have accomplished in my life, even my REAL failures...Not the one's you've tried to manufacture here.

> But if you
> keep up with this ridiculous facade then don't expect things to
> improve because they won't. Of course if you really -like- all this
> negative attention then..... well, just know that it's people like you
> who keep state-funded mental health agencies in business.

And it's people like you that keep me from WANTING to discuss my service in public.

You're a humiliation to yourself and the Marine Corps, Gilliland...

You're that drunk at the end of the bar I was talking about.

> So what'll it be, Dudly?

I'll just keep making fun of your lying and deceit, Frankie.

You've not "proved" a thing other than you are a disgraced non-rate and a newsgroup scoufflaw.

A loser.

Steve, K4YZ

You've got is bass ackwards. Anyone offered Article 15 has the right
to refuse it and go to court instead. Once it goes to court you will
be judged there.

Oooops! Gulp! RE4YZ missed that part.

> You also missed the part about the shop chief getting a
> reprimand for lifting my light-duty chit and giving me an illegal
> order.

The shop chief could have refused the Article 15 and goen to court.
Wonder why he didn't?

> It's clear that you can't comprehend anything that doesn't fit

> You violated a lawful order and took your chances for it.
>
> And if there was mitigating evidence as to your culpability in
>your court martials, they could have been overturned on appeal.
>
> Obviously they weren't.

Because they weren't appealed, or couldn't you figure that out by
yourself? You can appeal a summary court martial on an issue of law or
an issue of procedure, but not based on evidence that wasn't available
or not presented at the hearing. Hence, no appeal. 18 alleged years in
the USMC and you don't know squat about the UCMJ......

>> And as far as "trip ups" are concerned, let's take a closer look at
>> your postings lately...... Since I started confronting your lies with
>> facts your entire personality has changed. You used to be relatively
>> calm and controlled, but now your posts are filled with nothing but

>> think are effective at bolstering your credibility.
>
> My "credibility" doesn't hinge on one tour in the USMC that was
>pock-marked with not one but two court martials.

No, it's dependent upon the ability to independently verify the claims
you have presented as facts; but alas, your claims CONTRADICT the
facts while mine don't. Ergo, -you- have no credibility and I -do-.

> You're the one in the credibility deficit, Frankie.

Only in -your- eyes, Dudly, because you deny the facts.

> Nor does my "credibility" in this NG count on ANY of my service in
>the Corps...This is an Amatuer Radio forum, and I am an Amateur Radio
>operator.

So? It's not like there haven't ever been any off-topic threads in

> You're not. Nor is Lennie. And it shows. (And that's NOT a
>"positive" thing...)

Where, in the charter, does it require that anyone who posts here be a ham?

>> You used to try
>> and exert control over your challengers by starting new threads with
>> almost every reply, yet for the past week you can't seem to break out
>> of -this- thread.
>
> If you were paying attention, Frankie, the threads were in
>response to MARKIE'S frequent changes.

So you have the mentality of a lemming -- as if -that's- a suprise....

> And it seems to me that "Laying Waste To Frank of Silliland's
>Silliness" is pretty appropriate.

Especially considering the source of the phrase -- someone that would rather call me schoolyard names instead of addressing the facts. But I really am suprised that you haven't started with the Gilligan jokes; like, "Hey Frank, where's the professor?", or "How come you haven't bopped Mary Ann?" After all, that type of rhetoric certainly isn't beneath you, as you have proven in the past few days. Were you saving those quips for later? Naw, you probably aren't smart enough to think of stuff like that -- I didn't start to hear the Gilligan jokes until 5th or 6th grade, and you seem to be limited to a 3rd grade education.

>> You used to be the spelling cop, but now almost
>> every post by you has several spelling errors because of the frantic
>> rage that comes over you when replying to my posts.
>
> No more than any other, Frankie.
>
> Nice try.

Nice try yourself; just a couple weeks ago you prided yourself on your ability to correct others on -their- spelling, putting yourself on an intellectual pedestal above everyone else. But all of a sudden you can't even find the spell-check button. Now you excuse yourself from bad spelling by claiming that you are just as faulty as everyone else. You fell off your pedestal, Dudly.

> And you ahve tried to make some "points" about typing mistakes I
>ahve made, yet have had a few of your own..Big deal.

The difference is that I never tried to be the spelling cop. You did. Once again, it's not about me, Dudly. It's about you and your lies (or hypocrisy, as the case may be).

>> All your defensive tag-team parters have abandoned you.
>
> So someone doesn't post for 24 hours and they've "abandoned" the
>thread?

Dave Heil was quite passionate about your defense, yet even -he-
hasn't posted for quite a while. Maybe he started looking at the
situation objectively and saw that you -are- a fraud. Who knows. I'm
sure he will speak for himself on the subject..... eventually.

> Or maybe they just realize that you're the loser you've turned out
>to be...

Well, if -they- realized that much, why haven't you? You could have
simply put me in your killfile and be done with me, just like you
could have done with Len and others. Nope, you need to keep tabs on me
and others so as to make sure that you can counter any bit of proof
that exposes you as a liar. Your "friends" have abandoned you because
they have no interest in defending your lies.

>> In your frenzy of hatred you
>> don't even realize that you frequently contradict your previous
>> claims, sometimes even in the same sentence; e.g, "My original says
>> 'HONORABLE.'" Yes it does, Dudly, but you left out a few words, like
>> "General under 'Honorable' conditions". And if your "original" was
>> honorable then there's no need to get it changed.
>
> Mine just says "HONORABLE", Your Busted-to-Nonratedness. JUST
>"Honorable". No qualifiers.

That's all it says, huh? An 8-1/2" x 11" sheet of paper that has only
one word printed on it: "HONORABLE". No qualifiers that would indicate
to whom or what the word is referring, who printed it, who authorized
it, or even why it exists? Whatever you say, Dudly.

> And again you try to base what happened to YOU as the one-and-only
>truthfulness of the Marine Corps.
>
> You're a disgraced loser, Frankie. There's nothing I can do to
>fix that.
>
> And now it appears that "liar" is appropriate for you, too.

And even after your tirade about me snipping your posts you just
snipped my point about your "HONORABLE" discharge being "original"
while claiming to have had it later upgraded. That's evasive, Dudly.
So what does your -REVISED- discharge certificate say?

>> Just one more bogus
>> excuse after another. Rarely do you reply to any post that confronts
>> you with hard facts -- instead you seek posts that you think you can
>> spin and maybe bluff yourself into a positive light. Even when you
>> -do- address hard facts you are always wrong; e.g, the USMC didn't use
>> cutting scores for promotions in the '70's, either.
>
> Lie, lie and more lie, Frankie.

Prove it. Prove me wrong, Dudly. Post any sort of convincing proof
that you are who you claim. Anything that I have posted to prove my

-own- service will be just fine (except for the telephone token, of course).

> Stop it. You're embarrassing yourself. You're embarrassing me.

You're embarrassing yourself but you are too embellished in your lies to admit it -- probably even to yourself.

>> I tell the truth
>> about my service, good or bad; but while all you do is try to crush my
>> credibility by dwelling on my mistakes, you don't even realize that
>> openly admitting my mistakes gives me more credibility than you will
>> -ever- achieve.
>
> Congratulations on being able to look yourself in the mirror and
>convince yourself that having been court martialed twice is a prideful
>thing, Frankie.

So you are trying once again to misrepresent my statements -- I said nothing of the sort. I -am- proud of what I have accomplished in life, and I -am- proud to have the integrity to be honest about who I am. Apparently these simple concepts elude your understanding. That's something for which you can blame your mommy and daddy -- clearly they didn't teach you about such virtues as honesty and integrity.

> Maybe you can teach that technique to some of the folks who appear
>on "America's Most Wanted".

Why would I do that? The criminals that are profiled may have the same anti-social characteristics as you, but as far as I know you haven't done anything so bad as to get your mug-shot shown on national TV..... or have you?

>> And then there's the biggie: You put -so much- effort
>> into protecting your story when it would be so much easier to just
>> scan your DD-214, or discharge certificate, or dog-tag, etc, block out
>> the important info just like I did, and post it. The issue would be
>> resolved and you wouldn't be challenged any more. But you don't
>> because your claims are nothing but lies and you -love- the attention.
>
> And you...?!?!

I have already posted more than enough info to prove my service -beyond- the scope of public records, yet short of disclosing my SSN. I showed you that it -can- be done, and -how- it can be done. What's your excuse -NOW-?

> You need to learn how to use effective paragraphs, Frankie.

What does that have to do with your failure to provide proof of your USMC service?

> As for the rest, I've provided more than a few public resources to
>validate my "claims", as you call them through...

What does it mean to "call them through..."? Is that how to use
"effective paragraphs"?

> YOUR answer was to claim that they were, most likely, just someone
>with a similar name claiming someone else's "service".

It's just another type of "identity theft" and it happens all the
time. Don't you watch the news?

> Even if I do provide a copy of my -214, I expect no less than the
>same claims of "it's a forgery" or other such silliness.

Of course you expect such criticism -- you have already rationalized
that as an excuse to -not- provide such information. But you are
ignoring the fact that I provided my DD-214 in high resolution just to
pre-empt such a claim. And because it was high resolution I didn't
scan the whole document -- it would have been a -huge- file. Besides,
the whole document isn't needed. Just the important parts, such as
what I included in mine. So what's your excuse -=NOW=-, Dudly?

>> And you accuse -ME- of making "trip ups"? You're a fraud, Dudly. Your
>> stories are a fraud, your USMC career is a fraud, your personality is
>> a fraud, and your life is a fraud.
>
> Nope.

Well, that's proof for sure. I guess all the facts are moot and you
must be telling the truth about everything because you replied with a
definitive "Nope". Thanks for clarifying that for me, Dudly.

> But your stories about it are.

Feel free to prove me wrong.

> Frank Gilliland is a liar.

More "truth-by-repitition". One would think by now that you could come
up with a more effective argument..... or maybe even some proof!

>> Now I'm going to give you a suggestion: Take a couple weeks off from
>> the newsgroups. Go camping, get some fresh air, a fresh perspective,
>> and get laid if you can. Then come back here, come clean about your
>> lies, and be yourself.
>
> What lies?
>
> The only one's being told here are by you and The Feeble Five
>Bretheren.

Apparently you haven't been reading my posts..... oh, that's right,
your reading comprehension extends only so far as to absorb whatever
fits into your fantasy world. Well, that's your problem, Dudly.
Everyone else here can read them with an objective frame of mind. And
don't forget that your lies are now in the archives for however long
the archives exist. IOW, they might be read by your great-great-

grandkids (god forbid you should ever reproduce). I can only imagine how disillusioned they will be to find out who and what you really are. Well, don't be discouraged because you probably won't have to face them, even though they will be the victims of your public dysfunction. Maybe even the subject of public ridicule. And all because you get your kicks by impersonating someone you aren't. Even if you -are- who you claim, they sure as hell aren't going to be proud of your behavior in this newsgroup over the past several years.

But that's not your problem.

>> You will catch some flack to be sure, but that
>> will eventually die down after a few months. Maybe you don't realize
>> this but people -will- respect you for who you are even if you haven't
>> accomplished much with your life -- heck, I should know!
>
> People already respect me for who I am, what I have accomplished
>in my life, even my REAL failures...Not the one's you've tried to
>manufacture here.

Who?

>> But if you
>> keep up with this ridiculous facade then don't expect things to
>> improve because they won't. Of course if you really -like- all this
>> negative attention then..... well, just know that it's people like you
>> who keep state-funded mental health agencies in business.
>
> And it's people like you that keep me from WANTING to discuss my
>service in public.

Then don't discuss your service. Just prove that you served. For the past couple weeks you have had the opportunity to make an absolute fool out of me -- what's preventing you from doing so? I'll tell you: because your claims are nothing but lies.

> You're a humiliation to yourself and the Marine Corps,
>Gilliland...

...yawn.

> You're that drunk at the end of the bar I was talking about.

Actually, I'm the bartender.

>> So what'll it be, Dudly?
>
> I'll just keep making fun of your lying and deceit, Frankie.

Of course you will -- you can't face the reality of your mental illness so you need someone else to blame (it's always someone else's fault, isn't it, Dudly?).

> You've not "proved" a thing other than you are a disgraced
>non-rate and a newsgroup scoufflaw.
>
> A loser.

If you believe it, it must be true. Facts? FACTS? We don't need no
stinking FACTS!!! LOL!!!

Give up on the argument for time. We measure time by the spinning of the earth. Our most accurate way of measuring time is an atomic clock, it measures how many atomic particles are given of by a decaying sample of radioactive material, when so many particles have been lost--we say a certain amount of time has passed--rather crude really.

We have even developed convoluted methods to use light as a clock, however, under different conditions (gravity for one) or though different materials not even light always travels at the same speed, and theoretical physicists already know light may move at, at least slightly different speeds in different parts of the universe.

Anyway, what all these methods have in common are movement, even the atomic particles moving away from the radioactive sample. If you attempt to capture time in a bottle you only end up with a moving object in that bottle...

... there is absolutely no such thing as time, it is a figment of our imagination which allows you to get to work on "time"--time is very useful--but time is not real ...

... yep, no matter how you slice or dice it, at some place in the past,
something "... was and always will be ...

The only argument left is if that "something" has an intelligence, I think
it is more than obvious it does, it made all this ...

The real argument is posed by people who do NOT want you to be endowed by
rights given to you by a creator. They wish to own you and be able to
either allow you some rights, or deny you those rights--usually based on
their appraisal of how much you are worth to them--it has always been the
story of all peoples and civilizations--"God" is very dangerous to those
who wish to control, use and own other individuals, groups and areas--as
they can only do so if those in question do not have rights which are
endowed them by a supreme creator...

... be careful to argue against "God" too quickly, the forefathers placed
him in our constitution--they had a real purpose in doing so ...

Actually history is replete with evidence that the most heinous "controllers" tend to be members (often the leaders) of the dominant religious cult in their era/region. Almost without exception they invoke the name and power of their god as they march out to smite His enemies.

> ... be careful to argue against "God" too quickly, the forefathers placed

Invoking the name of a god is a good way to control the ignorant masses.

RG Stair is actually taking calls live and appears to be doing
a happy gravedance on 9.320 right now, saying Katrina was "G-d's judgement"
on the "sin and homosexual filled city of New Orleans"

I CANNOT BELIEVE WHAT THE F-CK I AM HEARING
COME OUT OF MY RADIO SPEAKER !! (right now as I type)
Profit stair LIVE and ON THE AIR NOW on 9.320 or 9.330

What a shitstain this bastard in SC is! What a HATEFULL old bastard!!!
I thought Fred Phelps in Topeka was bad.....this guy is FAR WORSE.
Listen yourself on shortwave and see.

All,

I am a somewhat younger person (43 yrs) and I still see a use for CW.

1) Since it has the narrowest bandwidth of any mode, you can squeeze it in between massive amounts of QRM on the 40 meter band and still manage to get heard.

2) Again, since it has the narrowest bandwidth of any mode, you can get more kilometers per watt out of the signal... basically you get reach the furtherest across the world with it.

3) It is the only digital mode that does not require computer machinery to interpret.

4) It the mode that requiring the simplest of equipment to implement. Worst case, one could use crystal oscillator and a crystal receiver to make a contact one state away. Try that with SSB or packet!

To me, CW is to communication as a lightsaber is to combat: both are archaic, elegant, and extremely effective ways of getting your point made. There might not be Jedi in this galaxy, but in my mind CW operation is the next best thing.

The Eternal Squire

No your comparison is not valid. In the case of W1AW & K1MAN, the point is that one adheres to the rules as they exist at this time and the other does not. If you study the "history" of amateur radio, those rules were crafted to allow W1AW to do exactly what it was doing at the time and they adhere to those same requirements today. If K1MAN adhered to those rules, it would not be possible to stop him. But he chose not too. If you think W1AW ought to go too, then work to change the rules.

RE-4YZ is looooooong on demands, short on answers. Everyone owes Steve
proof. Steve owes nothing.

## 3389. Stonewalling WT Docket 05-235?

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-30 23:01:05 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1125442865.318580.85940@z14g2000cwz.googlegroups.com>
Source record: 117740

NPRM 05-143, the Notice of Proposed Rulemaking that would eliminate morse code test element 1 from all amateur radio license examinations was supposedly released on 15 July 2005. It is marked "approved" as of 19 July 2005. A scanned copy of that NPRM was marked "received" by date stamp as 20 July 2005 and introduced to WT Docket 05-235 supposedly on 15 July 2005...but did not appear to anyone accessing the ECFS until 21 July 2005.

NPRM 05-143 is clearly marked as to the Comment Perior being "60 Days after published in the Federal Register." That's on the first page and page 25 of that 30-page NPRM document.

One problem: NPRM 05-143 HAS NOT BEEN PUBLISHED IN THE FEDERAL REGISTER AS OF THE MORNING OF 30 AUGUST 2005! A month and a half has elapsed since the middle of July, 1962 Comments have been filed on WT Docket 05-235 as of 29 August 2005.

Access the Federal Register Contents page through GPO at:

http://www.access.gpo.gov/su_docs/fedreg/frcont05.html

Noticeably missing is ANY filed Comment from the ARRL. In fact, NO organization except for one local 23-member "DX club" has filed anything under WT Docket 05-235. No Code International Executive Director Carl Stevenson has stated that NCI will not make any Comment for NCI until after the NPRM has been published in the Federal Register. The ARRL has been very noticeably present at every other amateur radio docket proceding before the FCC...but not yet on NPRM 05-143.

The ARRL was opposed to revision of ITU-R Recommendation S25, in particular S25.5 making it mandatory for all administrations to test for morse code proficiency for any license having below-30-MHz operating privileges. The IARU was for the revision, being its principal author of change which was voted in at WRC-03. In the two years since WRC-03 (July of 2003), the ARRL has generally appeared ambivalent on morse code testing with the exception of their Petition RM-10867 of 18 March 2004. RM-10867 called for a retention of morse code testing for Amateur Extra class licensees. RM-10867 was DENIED in NPRM 05-143.

From there on, it is speculation. The Comment period on NPRM 05-143 in WT Docket 05-235 has NOT OFFICIALLY STARTED. No notice has yet been made in the Federal Register. There have been 1920 Comments already filed with the FCC on that Docket. Are these to be rendered "useless" for consideration because of no Federal

Register notice given before they were filed? [see the Title Block of NPRM 05-143 as well as page 25, item 54, for the period of Comments and Replies to Comments]

Further speculation - fueled by suspicion - is that some sort of behind-the-scenes "stonewalling" is going on...perhaps by lobbyists urging the FCC to delay the Federal Register notice. Of all the possible organizations having sufficient "clout" to lobby the FCC, the ARRL is pre-eminent, retaining the services of both a communications-law firm and a professional lobbying firm in the District of Columbia area.

Yes, speculation is only speculation, no proof. However, time is elapsing and a month and a half has gone by since the release of NPRM 05-143 and NO notice in the Federal Register. That is out of the ordinary procedure of the FCC. The legality of such delay is not known. We taxpayers can't peer far enough into the inner workings of the FCC (or its lobbyists) to know for sure.

It may be that the failure to make notice in the Federal Register is a human error, a lapse of duty performance. If so, it could be corrected easily...but we ordinary citizens don't know. If so, there still remains a question on whether or not 1920 filed documents will be considered by the FCC on issuing a final Report and Order in regards to that NPRM. Will those be a useless effort by over 1700 citizens commenting?

LenAnderson@ieee.org

# 3390. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-30 23:04:00 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1125443040.714104.129950@g43g2000cwa.googlegroups.com>
Source record: 117741

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

29 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1962

Indeterminate/duplicates (note 1) 96

Unambiguously Against NPRM (note 2) 540 28.94%
Unambiguously For NPRM (note 3) 1052 56.38%
Code test ONLY for Extras (note 4) 274 14.68%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and six who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 29 Aug 05 that would be 1866.

As of 30 Aug 05, there still hasn't been any notice in the
Federal Register under Federal Communications Commission on
the NPRM FCC 05-143 or WT Docket 05-235. I wonder why not?

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

pie sky

>If you think W1AW ought
>to go too, then work to change the rules.

The problem with this is many have tried to change the rules regarding information bulletins and the FCC has dismissed them all. The FCC last time someone purposal to change the rules regarding Information Bulletins (Which was W5YI) back in the 90's said they would not hear any rule changes regarding information bulletin again.

The solution is simple. There are three controls that you can use. You can change frequency (and find more interesting topics, perhaps), you can turn the volume down (or off), or you can shut off the power to the receiver.

You can thank George Bush for most of this with his "family values", with which he has done nothing. It was a ploy to get re-elected. I've noticed that one preacher is blaming the deaths of our soldiers on the fact that America "protects" gays and g*d's wrath is upon us. Bush's agenda to get re-elected has caused much hate and discontent. Our federal deficit is unbelievable and getting worse. Finally, he is coming off vacation to make a big show of how he is going to help the states that have been devistated by the hurricane. Perhaps he can go back to an elementary school and twiddle his thumbs and toes and bounce his eyes around if and when we get attacked again.

After Bush pushing for (and obtaining) big tax breaks for SUVs, how's the price of gasoline in your area? Ever wonder why after the big tobacco settlement and all the information as to how bad tobacco is for you, the tobacco farmers get big subsidies? Think, man, think for a change. Follow the money trail.

>not be possible to stop him. But he chose not too. If you think W1AW ought
>to go too, then work to change the rules.

The problem is the rules are very vague. There is a thin line between
broadcasting and information bulletins but here is a list of things
K1MAN SHOULD of done.

1. Make sure the frequency wasn't in uses. If the frequency was in use
then he should of moved to a different fequency.
2. Stay at the control point while the transmission was going on
3. Don't avertise or talk about his website.

If he would of done this he would not be in the trouble he's in now.

It isn't over yet, there is a long process that the FCC and K1MAN has to go through. including a hearing before an administrative law judge and the US Court of Appeal.

Len,

It is not at all uncommon for items to take this length of time and more to
appear in the Federal Register.

I know they (the FCC) are as frustrated as anyone else with the "lead time"
they sometimes face for the Fed Reg (produced by the GPO).

>
> Access the Federal Register Contents page through GPO at:
>

> every other amateur radio docket proceding before the FCC...but
> not yet on NPRM 05-143.

Perhaps ARRL is waiting until the Fed Reg publication, too, so that their
comments will not "technically" be "premature."

> The ARRL was opposed to revision of ITU-R Recommendation S25, in
> particular S25.5 making it mandatory for all administrations to

> test for morse code proficiency for any license having below-30-
> MHz operating privileges. The IARU was for the revision, being
> its principal author of change which was voted in at WRC-03.

That is misinformation ... the ARRL "got with the program" on the revision of S25.5 and was represented on the US Delegation. They also pushed the improvement of S25.6 by adding a reference to a recommendation that gives administrations guidance on the (technical) things that applicants for amateur licenses should be tested for (which NCI also supported).

> From there on, it is speculation. The Comment period on NPRM
> 05-143 in WT Docket 05-235 has NOT OFFICIALLY STARTED. No notice
> has yet been made in the Federal Register. There have been 1920

> Register notice given before they were filed? [see the Title
> Block of NPRM 05-143 as well as page 25, item 54, for the period
> of Comments and Replies to Comments]

As a practical matter, while comments file before the Fed Reg publication are "technically" "premature," they will never the less be read and considered by the FCC.

> Further speculation - fueled by suspicion - is that some sort of
> behind-the-scenes "stonewalling" is going on...perhaps by
> lobbyists urging the FCC to delay the Federal Register notice.
> Of all the possible organizations having sufficient "clout" to
> lobby the FCC, the ARRL is pre-eminent, retaining the services of
> both a communications-law firm and a professional lobbying firm
> in the District of Columbia area.

As I said, the publication in the Fed Reg is beyond the FCC's control and I know that they are just as frustrated as anyone else when this sort of delay occurs.
Trying to "nail" the ARRL on some sort of half-baked "conspiracy theory" is simply bogus. If the FCC doesn't have control over when the item gets published, which they don't, how can you rationally assert that the ARRL is "behind the delay???"

BTW, I *do* appreciate all the effort you've been putting into reading all of the comments filed and giving us the stats ...

ONLY if the ionosphere is "kind" to you and you stay BELOW
VHF. Get below MF and them lil QRP things will go dead.

>3) It is the only digital mode that does not require computer
>machinery to interpret.

The "digital" label is incorrect. Since OOK CW morse has
only two states, carrier-on or carrier-off, it is BINARY.

The Morse-Vail "code" is so simple in technology that it can
be done with wires and a battery, NO radio required.

Why are you doing the ex deus machina thing? What are you
using to get your posting out to the rest of the Internet?

>4) It the mode that requiring the simplest of equipment to implement.
>Worst case, one could use crystal oscillator and a crystal receiver to
>make a contact one state away. Try that with SSB or packet!

In 1844 the Morse-Vail Telegraph successfully demonstrated
wired communications between Baltimore, MD, and Washington,
DC. WITHOUT any radio whatsoever! That should "qualify" as
"contact one state away."

If "contacting another state" is so important, I need only
drive a day or two to another state...where I can stand in
that state and TALK to three other states! No radio of any
kind needed! :-)

>To me, CW is to communication as a lightsaber is to combat: both are

Obi-wannabe, a "lightsaber" is a FICTIONAL thing out of the imaginary world of George Lucas' creativity. It does NOT exist. Neither do "Jedi Knights." Such is FICTION.

Don't tell me you are going to drag out the 1996 movie "Independence Day" as a "documentary?!?" :-)

Hello, Len

I personally am not concerned about code/no code. My problem is how easy do they wish to make the multiple guess test. Frankly, folks that don't have to work for something seldom appreciate it. Didn't they find that out with welfare?

Then again, I might be wrong.

If you gave away the licenses with no test at all (no test international?), a lot of folks might well say "no" and a lot of the rest wouldn't appreciate it anyways.

Just my humble opinion.

>Obviously he's not professional.

He's a "was-pro" in that the U.S. government paid him for his
services. At the same time he's been an amateur (one who is NOT

paid for his services) for 40 years, presumably "working" at least
8 hours a day, 5 days a week at his ham radio hobby. :-)

CW is not the narrowest bandwidth mode; currently, psk-31 is. With
something like a 32 Hz bandwidth, cw pales in comparison with its' 100 to
200 Hz bandwidth.

That said, it is easy to grab a key (or keyer) and have an intelligent
conversation (yes, the cw gang can and does rag-chew) with simple equipment.
It should be noted that PSK takes its' cue from CW in that it is a
variable-length encoded mode. Like CW, the most common characters are the
shortest (and CW is worthless? Folks learned and built upon the earlier
mode).

PSK-31 can send/receiver far faster than the best cw operator can
send/receive. However, there are some folks that argue that keyboards are
obsolete. I suspect they simply want no tests LOL.

CW can be a most effective way of communicating your message. One guy on a local repeater was screaming "cw forever". Fortunately, the repeater owner was in the group so ..... int f2? And .... 40 words per minute mcw was sent over the repeater. The owner had no problem. I had no problem. Yes, I can stir the pot a bit LOL

The guy pushing for cw only? My point was made :)))

However CW is the lowest power consumption mode. All the other digital
modes require a computer and monitor. The latter two combined can require
250watts to 350 watts even before adding in the transmitter requirements.

An excellent point, Dee

Of course, if your computer is a Cray .....
Just plug into your nearest substation LOL.

A good point and well taken. Then again, RTTY does not necessarily require
a computer. Anyone have a model 28 ASR? :)))

Jim,

Nothing that might happen as aresult of this NPRM will
involve changing the written tests.

This NPRM as currently put forth ONLY ends Element 1,
the code test.

Cheers,
Bill K2UNK

The current rules chnange does NOT prohibit you or anyone else
from USING morse code. The rules, if changed as per NPRM 05-235,
only ends the code test. Anyone now or in the future will still
be able to learn and use morse code to their heart's content.

Cheers,
Bill K2UNK

><LenAnder...@ieee.org> wrote in message

>It is not at all uncommon for items to take this length of time and more to
>appear in the Federal Register.

Is a Notice of Proposed Rulemaking a legal document or not?

Does it not say on NPRM 05-143 that a stated Comment period
exists on both the title block on page 1 and in item 54 on
page 25? It says that the Comment period BEGINS when the
notice is published in the Federal Register. Both pages.

>I know they (the FCC) are as frustrated as anyone else with the "lead time"
>they sometimes face for the Fed Reg (produced by the GPO).

I don't "know" that. I'm just a citizen living roughly
3000 miles from Washington, DC, and depend on the Internet
for "quick" news out of my government. I have NO law firm
to "represent me" and can't afford a Lobbyist firm to push
for anything.

The only "problem" observed with the Federal Register TOC
page was a four-day gap two weeks ago...when they failed to
update the links to appropriate days for Volume 70 (all of
2005). Without a link to the Day TOC, NO ONE can see what
is in them unless they get the paper version.

>Perhaps ARRL is waiting until the Fed Reg publication, too, so that their
>comments will not "technically" be "premature."

...and perhaps the ARRL is NOT so all-fired "pure" as you say.

Then again, I am not running for any office at the ARRL.

Neither am I running for any office at NCI.

>> The ARRL was opposed to revision of ITU-R Recommendation S25, in
>> particular S25.5 making it mandatory for all administrations to
>> test for morse code proficiency for any license having below-30-
>> MHz operating privileges. The IARU was for the revision, being

>improvement of S25.6 by adding a reference to a recommendation that gives
>administrations guidance on the (technical) things that applicants for

>amateur licenses should be tested for (which NCI also supported).

I wasn't IN Geneva, Switzerland, for WRC-03. All I read are the
U.S. Delegation's Report on WRC-03, comments from the IARU on
their web page, comments on several other web pages, and a few
items that have made it into print so far.

I read what everyone else reads...and that INCLUDES Dave
Sumnner's infrequent postings from Geneva during WRC-03.

>> From there on, it is speculation. The Comment period on NPRM

>> in the District of Columbia area.
>
>As I said, the publication in the Fed Reg is beyond the FCC's control and I
>know that they are just as frustrated as anyone else when this sort of delay
>occurs.

Gratuitous corporate doublespeak phrase.

The FCC is simply NOT THAT CONCERNED about amateur radio matters.
Want evidence of that? Go to the FCC home page, click on Wireless
Communications Bureau. When you get to the Bureau, click on
"Amateur." What do you see in "news" of procedings there?

Hello, the LATEST date is 8 October 2002 on DA 02-2475, Antenna
siting and support structure revision to Part 97. Damn near
THREE YEARS OLD. Not one single thing about the 18 Petitions that
went through from 2003 to 2004. Not one notice that NPRM 05-143
was ever released. Not one notice in the separate page of "open"
procedings from all Bureaus and Offices.

"Delay" is like a few days, maybe two weeks. The NOTICE for 05-143
hasn't been there for SIX WEEKS.

>Trying to "nail" the ARRL on some sort of half-baked "conspiracy theory" is
>simply bogus.

Bullsnit. Hello? I'm SPECULATING. Understand the word?

Don't get your legal briefs in a knot. A legal beagle you ain't
and this is NOT "moot court."

> If the FCC doesn't have control over when the item gets
>published, which they don't, how can you rationally assert that the ARRL is
>"behind the delay???"

RATIONALLY, one only has to look over the past half-century or so
and see that, in the beginning, the ARRL used to get all that it
asked for, lobbied for, etc. All the way up to creation of the
much-beloved (by some) "incentive plan."

Since I don't work for the ARRL and am NOT running for office, I
simply observe what everyone else can observe and RATIONALLY put
together all the available information...and "connect the dots."
It's not difficult for anyone with a RATIONAL mind. Note I
emphasize RATIONAL. Those whose minds are "conditioned" or easily
swayed by nice-nice words that cater to what they want to believe
won't connect all the "dots"...those minds are NOT rational, just
conditioned (or "brainwashed" in the indelicate common phrase).

I'm just a citizen of the USA without a fancy title, can't put
words down on nice letterhead paper sounding like they are oh, so
important(!). Not being an "insider" or having opportunity to
hobnob with the rich and famous, all I or any other citizen can
so is SPECULATE...based on what has happened in years past.

>BTW, I *do* appreciate all the effort you've been putting into reading all
>of the comments filed and giving us the stats ...

Here's some "charm school" advice, Carl. If you want to SOUND
appreciative, put such phrases FIRST in the body of text. Putting
them at the last makes them look like the phony-baloney they
probably are.

I don't work for NCI. In fact, NCI REFUSED my no-dues membership
for over a year. I don't work for ANY big money or big
organizations and am NOT running to do so. Got that so far?
I've been doing small-scale arguing on this code-test issue since
three decades ago. And received the usual boilerplated form-
letter "replies" in surface mail, like a truly wonderful "answer"
from the late Vic Clark (?) once the elected president of the
older ARRL...which said if I "wanted to know more about radio,
buy the new book out "Now You're Talking!" Judas H. Cottonpicker,
after my beginning in HF radio communications, I was supposed to
read a "radio for dummies" book? Yeah, like thanks a lot, big

League. And the same to you.

I do some bookkeeping on numbers and percentages which are a bit of extra effort. I read EVERY SINGLE COMMENT...for ME, not for anyone else. I post the stats in here because I CAN...for ANYONE's information-input. If those stats show code-test retention, then that is what I would show. But, the stats favor code-test elimination. Push aside the gratuitous corporate-speak phrases and understand that. NPRM 05-143 is going to have as large, possibly larger, effect on U.S. amateur radio in the near future than the "restructuring" of R&O 99-412 did. Had you read all of those Comments on WT Docket 05-235 and done an honest synopsis of them, you would see the same. But, you are running for office now, and that may not be in the center of your vision.

Oh, did you want nice-nice phrases down here? :-) Sorry, I don't HAVE to work for anybody or run for office, I can speak my mind. I've done the "charm school" thing (manager's classes) and passed just fine. :-) Don't have to use those "lessons learned" now. Difficult to take a RATIONAL, independent mind, ain't it? :-)

>However CW is the lowest power consumption mode. All the other digital
>modes require a computer and monitor.

Tsk, tsk, BAD engineer! Go sit in the corner cubicle with Wally.

No, "all the other digital modes" do NOT need a full-on PC.

It is COMMON to use a full-on PC because that is the SIMPLEST
solution to implementing such mode...and because so few
manufacturers have designed and made stand-alone equipment
for some digital modes.

One example that was withdrawn from kit production was the
DZ Engineering "PSKube," a stand-alone PSK31 transceiver. Full
manual and details, photos, are available at the DZ website.

> The latter two combined can require
>250watts to 350 watts even before adding in the transmitter requirements.

Tsk, tsk, tsk! Why not figure in the entire HOUSE that holds
the radio? :-)

Back in 1947 or so, ENIAC was crunching numbers using around 50
thousand tubes (give or take) and gulping KWe like a small
housing project. In 2000, my little HP 32S II pocket programmable
calculator was loaded with three small Lithium-ion battery cells
and allowed me to crunch numbers FASTER than ENIAC, with MORE
PRECISION than ENIAC, with FAR MORE RELIABILITY than ENIAC, and
had MORE BUILT-IN FUNCTIONS for calculation than was even dreamed
of for ENIAC. Ya know what? It still has those SAME BATTERIES!
Even after seeing a lot of use, it still has the juice.

Go take apart an AMTOR peripheral coupler, analyze its innards,
and report back on power consumption. A modern one, not one of
the first using discrete transistors. Ain't no 100 Watt power
consumption or even close to it. My ancient HP 722 inkjet printer
takes only a few Watts on standby, hardly more than that to print
text at a reasonable rate; it has an in-line-cord 'wall wart' style

power supply unit that doesn't get warm in-use.

I grant you that an electronic display takes some Watts. I don't immediately recall the power demand on my Samsung 712n flat-panel display but just from feeling the top vents, it can't be more than 50 Watts. It's a year old and as bright as ever, fine distortionless detail, a "17-inch" size flat-panel. That display COULD simultaneously show all the details of an operating HF transceiver as well as the text into and out of an AMTOR box (or any of the 'TORs). Of course that needs the computer box itself which DOES take some Watts...but the box power demand has dropped considerably since 1981 in addition to increasing its functioning waayyyyyy above the original 4 MHz clock first Boca Raton boxes. The HP box I've got now is lazily doing all this word processing, running SETI@home data unit in the background, running diagnostics on itself, all seemingly simultaneous. It can do much more, and does with AVIs or MPEGs and other things.

Might I suggest an even ittier-bittier power demand "CW" unit, doesn't even need a hardware receiver, just the optical wetware and perhaps a telescope (zero power demand). Connect a manual code key in place of a white-LED flashlight switch and "blip" away as fast as you can in morse code. No problem, the LED light can follow all amateur Data on-off switching. Excellent efficiency in Lumens/Watt, better than a transistorized Class C amplifier. Of course, the frequency is ABOVE the maximum ITU frequency allocation of 300 GHz and therefore doesn't need any license of any kind! Of course, daylight operation isn't too swift for "DX." :-)

bit bit

>A little escapism is good for the human soul.

Metaphors be with you Obi-wannabe.

"Escapism" is wonderful for the movies. In radio-electronics
things ain't fantasy. I learned that long, long ago, on Terra
not far away.

Electrons, fields, and waves behave by THEIR rules, not human ones.
You learn THEIR rules and work with those, then you've got a chance
to make them do your bidding. Believe in THAT, not magic or the
moom-pitchas.

Have you memorized the rectangular-form complex number arithmetic
yet?

>I personally am not concerned about code/no code. My problem is how easy do
>they wish to make the multiple guess test.

NPRM 05-143 is concerned about elimination/retention of the
morse code test for amateur radio licensing.

If you have a bitch, moan, cuss-word, or whatever about the
written test questions, you just contact the VEC Question Pool
Committee. The VEC QPC make up ALL the written test questions
and answers. FCC no longer has a hand in that, they only approve
(or disapprove) the Pool.

> Frankly, folks that don't have
>to work for something seldom appreciate it.

I personally am not concerned about some "work ethic" or "moral
virtue" bullsnit or its holier-than-thou sounding phrases.

I've WORKED for my living since graduating high school. Spare
me some of that folksy filosophizing floobydust, okay?

> Didn't they find that out with welfare?

You mean the WELFARE system that rewarded the high-rate morsemen
with fancier titles and better privileges, such as in the
"incentive plan" licensing system? Yes. It worked very well,
didn't it?

>Then again, I might be wrong.

No, the "incentive plan" worked very well for the welfare of
the morsemen. They got real big and important, looked down
their noses at the "mundane" and felt good. Made the "class
distinction" thing into a fine art.

But, it kind of went sour with R&O 99-412, didn't it? FCC made
code test rates 5 WPM maximum and cut the number of license
classes in half! My, my, what a calamity to the super-special
ultra-extra-morsemen!

>If you gave away the licenses with no test at all (no test international?),
>a lot of folks might well say "no" and a lot of the rest wouldn't appreciate
>it anyways.

Gosh, REALLY? Wow, gee-whilikers, Captain Code, is that true?

>Just my humble opinion.

Hardly. Hardly "unbiased" either. :-)

If you don't like what I publish in this "scorecard," then you
welcome to go read all 1967 comments on WT Docket 05-235 that have
arrived by midnight EDT on 30 August 2005. Do your own stats.
It's easy. Anyone can do it. Just takes a little work. :-)

Get off it. Bother Stair has been around a long time before Bush was
president. Try not to look stupid while doing your Bush bashing.

You were doing OK with the first paragraph you wrote and should have
stopped there.

I doubt if the League have that much pull, although they probably would if
they could. Someone certainly got s25 kept off the ITU docket for years,
otherwise the international code test requirement would have gone in 1993
or thereabouts, so sandbagging has certainly been a part of this.

Jim Hampton wrote:

> I personally am not concerned about code/no code.

Hello Jim, (from another Jim who used to live in
Wayne County).

Concerned or not, it seems FCC *really* wants to
dump Element 1. That's no surprise at all, given
the past 25-30 years or so.

> My problem is how easy do
> they wish to make the multiple guess test.

A key factor is which "they" you mean.

Several of the proposals asked for a new beginner
license. The scariest of those was the NCVEC idea,
which was derived from a paper titled "Amateur
Radio in the 21st Century". I wrote a rebuttal to
that paper which I sent to the authors, and also
posted here. Kinda long but it's detailed. You can
skip through the code test discussion and focus on
the written-test stuff, which says they think the
Tech is too hard for newcomers!

Other proposals (like the FISTS proposal) detail
how the written tests could be improved.

But FCC specifically denied all proposed changes
to the written exam structure and methods, and the
number of license classes in the NPRM. So the
writtens won't change much one way or the other.

> Frankly, folks that don't have
> to work for something seldom appreciate it.

Yup. It's called "investment", in the general
sense, not just money.

> Didn't they find that out with welfare?

"Welfare" takes a lot of forms - corporate,
lifestyle, geographic, etc.

Of course if a behavior is rewarded, you tend to
get more of it.

> Then again, I might be wrong.

Not really.

> If you gave away the licenses with no test at all (no test
> international?),
> a lot of folks might well say "no" and a lot of the rest
> wouldn't appreciate
> it anyways.

FCC did that with a service called 'cb'. Look what happened.

Of course some folks will say that cb became a mess because
of overcrowding and/or lack of enforcement. IOW, they blame
everyone other than those actually breaking the rules.

--

But you are correct to be concerned. Back in 2000, when FCC
dropped all code testing except Element 1, they also reduced
the number and size of the written tests. The written test
reduction was dramatic, particularly for Technician and Extra.

Just watch. FCC will probably dump Element 1 regardless of
what the comment total works out to be in the end. They ignored
majority opinion in 2000 on how many code test speeds there should be,
and there's no requirement that FCC follow majority opinion on
anything.

I've predicted before that when Element 1 goes you'll see a flurry of
upgrades and some short-term growth - but no big
technological changes, nor sustained increases in the number
of hams.

Once all that settles down, you'll see renewed attacks on the *written*
tests from some folks, claiming the written tests
are obsolete, outmoded, too hard, unfair to handicapped people, etc.

Practically all of the objections to the code tests can be
modified for use against the writtens. In fact they have been -
read the "21st Century" paper.

Same old tired analogy. PLEASE...if you want electronics taken
off the written test, then say so. Failing that, your wasting your
time and effort dragging up this tired argument.

> I also question the real need to memeroize band edges and even pieces
> of the band plan in general pool I am reading now

I actually agree that memorizing band edges is a waste. Far
better to have a schart of the bands, beand edges and
permitted uses and then ask questions which have the
test taker use the chart as a resourse to answer questions.
Band edges are dynamic and change over time.

> but neither of these issues is anoything but a smoke screen

What? is there a part of the NPRM I missed like carting off the Code
users to some kind of death camp?

The ending of code testing will not reduce the number of code using
hams.

Time may do that though the actions of the grim reaper and the failure
of Code users to recruit others to replace them, but I doubt that will
kill CW USE or learning of the mode

Further with computers and programs in existance today any one that
wishes to make the attempt to learn Morse Code has the tools to do so

It's a valid question, Bill. And I'm not the only
one asking it.

> PLEASE...if you want electronics taken
> off the written test, then say so.

I don't. In fact I think there should be *more* in-depth
electronics testing on the exams. And I'll take the new
exams myself if needed.

> Failing that, your wasting your
> time and effort dragging up this tired argument.

It's not me who is bringing it up.

Look at NCVEC's second proposal. They wanted an entry-level
exam with even less technical content. They were dead-serious.

Even better, look at the "Amateur Radio In The 21st Century"
paper, which was in CQ and also on the 'net. That one says
the future of amateur radio depends on an easier-to-get
entrylevel license. Says there's too much math and theory
in the current Tech (!).

Worse, it proposed to remove *all* regulations questions from
the test for the new entry-level license, and instead just
require a signed statement that the licensee had read and
understood the rules.

Is that acceptable to you, Bill? It's not acceptable to me,
with or without code test!

Fortunately, FCC denied NCVEC's idea. This time. But I'll bet we
haven't heard the end of it.

> > I also question the real need to memeroize band edges and

> Band edges are dynamic and change over time.

Better yet, a chart that shows the regs *and* a chart that
shows the current bandplan. ('Bandplan' meaning current
recommendations, not regulations). It's done for RF exposure
already.

> > but neither of these issues is anoything but a smoke screen
> > cut

> Yup, Jim's smoke screen anyway... :-) :-)

Not a smoke screen - a valid analogy. Ask the Gang of Four at
NCVEC...

Hey screwball...

WHERE did >>I<< say SNCO ranks were selected by cutting scores...?!?!

SNCO's never were...

But LPCL through Sergeant were! PFC was almost automatic unless you picked your nose in morning formation.

You're such an idiot.

Based on what?

A less than Honorable discharge?

Yeeeah...Right.

> > You're the one in the credibility deficit, Frankie.
>
> Only in -your- eyes, Dudly, because you deny the facts.

What facts?

That you were incompetent as a Marine and twice court martialed?

I accept that. You have certainly proven your worthiness of the
discharge you received here, that's for sure.

> > Nor does my "credibility" in this NG count on ANY of my service in

> 5th or 6th grade, and you seem to be limited to a 3rd grade education.

As a matter of fact, no, I hadn't thought of any "Gilligan" jokes,
nor would I have...

But YOU did, which leads me to wonder from what scarred psyche you
draw that from.

As for the "last few days", I point out that YOU have done nothing
but simply go from being marginally plausible in your arguments to
being absolutely comical.

> >> You used to be the spelling cop, but now almost

Ahhhhhhhhhhhhh! I see...Someone doesn't tow your line for more
than a post or two and they have "abandoned" something...

Most of what "goes on" in this forum HAS been going one for YEARS,
Frankie...The "last few days" is irrelevent in the over all scheme of
things.

> > Or maybe they just realize that you're the loser you've turned out

> they have no interest in defending your lies.

What lies?

Neither you nor any of the other Feeble Five have proven a single
one, Frankie.

No, I am not predisposed to copying and posting my military
records, but I HAVE provided more than a few PUBLIC reference to
records that verify my having served.

YOUR lie disposed of.

> >> In your frenzy of hatred you

> So what does your -REVISED- discharge certificate say?

What you quote as "upgraded" was nothing of the sort.

But it seems YOU are all about fighting other people's fights, all
the while trying to "diss" others who speak up in support of me.

I am not misrepresenting your statements in the least.

You present yourself here as some sort of "authority" on
all-things-Marine, but have been proven to have been an incompetent
Marine...Yet you wear your failure like some badge of honor...

That you put your failed USMC service up front is nothing to be
proud of other than to admit to yourself that you did indeed fail to do
what you promised you'd do.

I was never a "poster" Marine, nor was I guest of honor at any of
the presentations at 8th and I, but I DID manage to serve without a
single black mark in my SRB.

What "excuse" do I need?

I HAVE provided reference to public records, and those records are
as irrefuteable as the Privacy Act protected ones.

> > You need to learn how to use effective paragraphs, Frankie.
>
> What does that have to do with your failure to provide proof of your
> USMC service?

I haven't failed.

You simply refuse to accept that it's the truth. That's YOUR
problem, frankie, not mine.

> > As for the rest, I've provided more than a few public resources to

Sure I do.

And it's not applicable here.

It's just a Feeble Five attempt to avoid the truth.

> > Even if I do provide a copy of my -214, I expect no less than the

> scan the whole document -- it would have been a -huge- file.

Now THERE is an excuse!

Thirty years ago that WOULD have been a "-huge-" file to a TRS-80
that loaded data on music cassette tapes.

> Besides,
> the whole document isn't needed. Just the important parts, such as
> what I included in mine. So what's your excuse -=NOW=-, Dudly?

There's no "excuse", Frankie...

References to publically available resources have been made. You
refuse to follow them up. Oh well.

> >> And you accuse -ME- of making "trip ups"? You're a fraud, Dudly. Your
> >> stories are a fraud, your USMC career is a fraud, your personality is
> >> a fraud, and your life is a fraud.

> must be telling the truth about everything because you replied with a
> definitive "Nope". Thanks for clarifying that for me, Dudly.

Unlike you and Lennie, I don't need to re-write "War and Peace" to
effective respond.

"Nope" was adequate.

> > But your stories about it are.
>
> Feel free to prove me wrong.

Already done.

You're too much the coward to follow the trail yourself, Frankie.

> > Frank Gilliland is a liar.
>
>
> More "truth-by-repitition". One would think by now that you could come
> up with a more effective argument..... or maybe even some proof!

"repetition".

It's already been proven...In each and every line where you call
me a "fraud" or other such adjective over my USMC service.

Refrences to public records have been provided.

They prove that Frank Gilliland is a liar.

> >> Now I'm going to give you a suggestion: Take a couple weeks off from

Obvioulsy you've not been reading MINE, or you'd know whatever
fantasies I hold have nothing to do with you or the Feeble Five.

> Well, that's your problem, Dudly.

Nope. It's yours.

> Everyone else here can read them with an objective frame of mind. And
> don't forget that your lies are now in the archives for however long
> the archives exist. IOW, they might be read by your great-great-
> grandkids (god forbid you should ever reproduce). I can only imagine
> how disillusioned they will be to find out who and what you really
> are.

Actually, Frank, it will be YOUR offspring who are disillusioned.

Disillusioned that grandpa got into a "fight" with a man he didn't
know over issues that were easily disporven in the public domain.

Silly Frankie...

> Well, don't be discouraged because you probably won't have to
> face them, even though they will be the victims of your public
> dysfunction. Maybe even the subject of public ridicule. And all
> because you get your kicks by impersonating someone you aren't.

And there we have it again...

Frank Gilliland making an untrue assertion in a public forum.

> Even if you -are- who you claim, they sure as hell aren't going to be proud
> of your behavior in this newsgroup over the past several years.
>
> But that's not your problem.

And I seriously doubt it will be thiers...

>
> Then don't discuss your service. Just prove that you served.

I already have.

> For the
> past couple weeks you have had the opportunity to make an absolute
> fool out of me -- what's preventing you from doing so? I'll tell you:
> because your claims are nothing but lies.

No...

Frank Gilliland has been making an absolute fool out of Frank
Gilliland...What more could I possibly do?

Frank has proven that he's a disgraced, court martialed (twice)
ex-Marine.

Now, just because he "says so", wants anyone/everyone to "trust"
him when "dissing" >>MY<< service...

Yeeeeeeeeeeah. Right.

> > You're a humiliation to yourself and the Marine Corps,
> >Gilliland...
>
> ...yawn.

And that is, no doubt, why you're an EX Marine.

> > You're that drunk at the end of the bar I was talking about.
>
> Actually, I'm the bartender.

No wonder the drinks are watered down.

> >> So what'll it be, Dudly?
> >

>
> Of course you will -- you can't face the reality of your mental
> illness so you need someone else to blame (it's always someone else's
> fault, isn't it, Dudly?).

Ah, yes!

Just like the REST of the Feeble Five...

Can't carry the day with assinine arguments that are easily
disproven with PUBLIC records, so start in on claims of "mental
illness"...

> > You've not "proved" a thing other than you are a disgraced
> >non-rate and a newsgroup scoufflaw.
> >
> > A loser.
>
> If you believe it, it must be true. Facts? FACTS? We don't need no
> stinking FACTS!!! LOL!!!

There are TWO facts here...

I did Honorably serve in the United States Marine Corps and you're still a loser.

To quote you...."yawn"...

> No I was tying to sare your feeling of dispointment when I returned

"sare"...?!?!

"disappointment"

> Indeed I am shocked not to find you boasting that Michigan had not
> droped a net on me

"dropped"

I never said it would. And according to correspondence I have
received since, it is not IMMEDIATELY liklely.

> > > Two, seriously consider treatment for your Delsional nature, and your
> > > paranoia
> >
> > I have neither
>
> you suffer from both

Please do tell, Dr Morgan.

"noticed" "comments" "you duck" "several"

What you NOTICED is that I don't do what you insist that I do.

In other words, we have even MORE evidence that you do not tell
the truth.

> cut

> > > Four try to learn the difference between mental illness and being
> > > different from YOURSELF

Sure I do.

> > Unfortunately the ISSUE here is YOU knowing the difference between
> > mental illness and wellness.
>
> But I do unlike you

No, you do not.

You keep insisting that mental health and physical health are the
same.

They are not.

You also continue to insist that my Nursing license is a "medical"
license, and I ahve clearly shown you to be wrong there, too.

> > Enjoy your trip. Looking for goats, are you?
>
> more of bashing stevie

I am not bashing Stevie...That's YOUR schtick.

> grow up learn resprect for those who aredifferent

"respect"

I respect "difference"

I do NOT "respect" liars.

YOU are a liar.

Steve, K4YZ

It wasn't about "spelling" you jerk...

It was about learning the meaning of the term "quoted"

> > > You admitted to a disablity discharge in one post...(SNIP)
> > >
> > No, I've not admitted to a "disability discharge".
> >

Nope.

See, Markie, this is yet another of those instances where you say
you have "quoted" me, yet have not provided the quote.

> > > denied it was
> > > physical in another therefore you have admitted to a Mental discharged
> > > obviously granted for mental illness

such a inspired response by Stevie well done truely well done

the rules are vauge even you have admitted that
>
> > An Information Bulletin is a message directed to amateur

It's no fraud.

I choose to not perpetuate a profanity in a public forum.

> cuting rant

There was no "rant".

Yet the point remains...Frankie himself had no respect for
himself, his Honor, or the United States Marine Corps.

This is truth, Markie. Frankie himslef has admitted his failure
as a Marine.

> > > cuting Stvie paranoia

> cut

Uncut.

"cutting" "Stevie"

And you're STILL an idiot.

Steve, K4YZ

Prove it.

BTW, I HAVE provided references IN THIS FORUM to the appropriate
Board's of Nursing that demonstrate otherwise.

> > > > Enjoy your trip. Looking for goats, are you?

Nope.

Steve, K4YZ

# 3448. day 21 of Stevvvvvviesss Bullshit about michigan and mental health

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-31 18:04:55 UTC
From: an_old_friend <konstans@hotmail.com>
Message-ID: <1125511495.402809.288890@z14g2000cwz.googlegroups.com>
Source record: 117797

for 21 days now we have been regaled by Stvie refusaul to accept the basic fact he does not carry much wieght at least here in Michigan

Now he adds the "assurance" that becuase someone sent a letter saying something like the "matter will recieve the attention it deserves (which it will receive that being almost none)" that we can still look forward to Stevie somehow forcing me to into Thrapy for for my typing and lying

Give us all a brake stevie admitt your failure

## 3450. Brief blurb in Fox News on ham emergency comms for New orleans

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-31 18:11:52 UTC
From: Bob <wa2ise@ix.netcom.com>
Message-ID: <1125511912.012870.113600@g14g2000cwa.googlegroups.com>
Source record: 117799

Saw this morning a brief mention on Fox News about hams doing health and welfare emergency traffic for New Orleans. "Only reliable communications in the area". They showed a few ham transcievers, one displaying a 70cm band frequency, another HF rig on 20 meters in the phone subband.

This is the sort of disaster that ham radio handles well. Cell phones are mostly out, as well as most any other comm system that needs physical infrastructure to function.

indeed this the sort of thing that the ARS does well

I notice no mention of CW simply in passing

there you have

confessing to disablity of some kind and he denies it was physcial so
it must be mental

No other logical choice except of course that Stvei isn't the marrine
in question or other such lie

I guess that means CB radios aren't working either, huh?

It is only valid if the point is made with the FCC. So far
I don't see that being a valid question to the FCC.

The future I can't be responsible for. As you properly point out...it is
NOT an issue now because the FCC has dismissed the ide.

Gang of Four??? But in any case, your analogy hasn't had any effect on the FCC and they are the only ones that count.

Cheers,
Bill K2UNK

# 3456. Re: N9OGL comments on K1MAN taken from QRZ

Source record: 117805

>K4YZ said...
>There's no "thin line".
>It's either an "information bulletin" or it's broadcasting.

There's a BIG difference between an information bulletin and a broadcast. A broadcast is directed to the general public as a whole while an information Bulletin is directed to a small group.

>Once it's "opinonated" it stops being an "information bulletin"
>and becomes an editorial. Editorials are broadcasting.

Not necessary, You can get information out of an opinion, it's up to the person hearing the opinion to determine if he go's along with that train of thought.A good example is look at court cases, a ruling by a court is not called a ruling but an opinion. At any rate Society is based on two input General information and Opinions you can't just have one.

>But an information bulletin has to have INFORMATION in it.
>Once tainted by editorialization, it's no longer objective

There is nothing in the FCC rules that stated that, Nor does the FCC rules state that an Information Bulletin has to be a pure piece of facts.
The Definition that YOU have given is the Genreral definition of the word Information bulletin, However, It is NOT defined in the FCC rules. The FCC has the power to define what a definition is in the rules, for example the FCC can stated that an informational bulletin may only be a bono fide newscast, but that is not what we see here. In other words the FCC can limit what something is provided it the lease restrictive means necessary to promote govenment interest.

> "97.1369 When in doubt about what constitutes an "information
>bulletin" as opposed to a "broadcast", anything Todd McDaugherty says
>is wrong."

Your going to have to quote that rule for me steve, I looked in the rules and couldn't find it. here's what I found

97.3(a)(10)

"(10) Broadcasting. Transmissions intended for reception by the general public, either direct or relayed. "

97.3(a)(25)

"(25) Information bulletin. A message directed only to amateur operators consisting solely of subject matter of direct interest to the

amateur service."

97.111(b)(6)

"(b) In addition to one-way transmissions specifically authorized elsewhere in this Part, an amateur station may transmit the following types of one-way communications:

(6) Transmissions necessary to disseminate information bulletins; "

97.113(b)

"(b) An amateur station shall not engage in any form of broadcasting, nor may an amateur station transmit one-way communications EXCEPT as specifically provided in these rules; nor shall an amateur station engage in any activity related to program production or news gathering for broadcasting purposes, except that communications directly related to the immediate safety of human life or the protection of property may be provided by amateur stations to broadcasters for dissemination to the public where no other means of communication is reasonably available before or at the time of the event. " [EMP. ADDED]

But I didn't see the rule you stated.

And one has to be relatively objective in what constitutes "amateur interest".

> Toiddie, the opinions of a foul mouthed, immature, basement
>dwelling domestic parasite such as your self are of zero-point-squat
>interest to the Amateur Radio service.
> Set up 1000 blogs if you want to...Internet bandwidth is almost
>limitless...Once your tripe hits the airwaves it's QRM.

That's YOUR opinion, and who said I use profanity on the air??? I very civil on the radio. As for as QRM, as long as I'm using a unused frequency it's legal.

>Which in this case does not apply.
>The only "content" issues were Baxter's pecuniary use of Amateur
>Radio. Those are clearly within the FCC's purview to limit

K1MAN would of been legal if he would of these things

1. pick an Unused frequency
2. didn't discuss or promote his website
3. remained at the control point.

appart from that his INFORMATION BULLETINS were legal.

>Again...You keep avoiding the fact that the FCC C L E A R L Y is
>allowed to prohibit commerical use of the Amateur Service.
>This isn't about Baxter discussing religious preferences or the
>color of his wallpaper

First the FCC over the last 10 to 15 years has allowed more commerical use of the amateur radio service. The point of arguement isn't really about "commercial use" but the other subject matter which the FCC has over the last 15 to 20 years has question regarding general content of the person transmitting the information. K1MAN is not only one the FCC has gone after, they have gone after others not because of commercial use but of use they felt could be used by other forums and media. Back in the 90's the FCC went after BBS operators because of certain content as well as other people. Commercial use isn't the issue I'm trying to raise. Secondly there seems to be two different definitions regarding non-commercial, non-commercial normal means a station can't make a profit off of it's transmission, but can raise money to support itself. As a matter of fact a club station running CW practice or an Information bulletin 40 hours per week can compensate the operator. So some "commercial" operations are allowed.

Hello Alun, did I call it or what? <smirk> :->

The day after I posted that, Cross and company got the Federal
Register NOTICE in...six weeks after the NPRM was released. Six
weeks and 1968 filed Comments later...

I don't believe in coincidences that "justify" some rather obvious
hanky-panky going on behind the scenes that us ordinary folks can't
see. Us ordinary folk don't have communications-law firms on
retainer nor can we generally afford Lobbyist firms to "represent"
us in DC.

One thing important in the Federal Register notice that is NOT in
the body of text of NPRM 05-143: SPECIFIC DATES for the end of
the Comment period and for the end of Reply to Comments period.
31 October 2005 for end of Comments, 14 November 2005 for end of
Reply to Comments.

Had the FR notice been timely, the end of Comments would have been 15th or 16th September 2005, end of Reply to Comments about 30 September for the "60/75 day" normal sequencing. It was SIX WEEKS LATE. "Human error?" Highly unlikely. Specific scheduling, quite likely. A rather small group of staff is going to be stuck with sorting through the "old" Comments (over 1800 unambiguous ones) and whatever comes in from 31 August 2005 until the end of October. The poor schlumphs who have to wade through all the documents will have at least until year-end Holidays to complete their task.

Will we get a "reading" on what the FCC is going to do with those 1800+ unambiguous filings that came in prior to 31 August? We don't know yet. The Supreme Amateur Court of Newington hasn't issued a Ruling as of this morning of the 31st of August. We must await their Final Disposition or whatever. ["oyez, oyez"]

---

As to what went on in DC and with the IARU and WARCs/WRCs prior to WRC-03 and revision of S25, all we have is PARTIAL INFORMATION. The U.S. government wasn't fully on-line with archives in 1993 (Internet went public in 1991). It's difficult for us in farther states to get to the big Reading Room at 445 12th St., SW, and see all the various correspondence that went on in regards to U.S. amateur radio regulations from two decades ago. We get second-hand "information" from "insiders" (such as Miccolis, and now Stevenson) who "know" what went on. The only REAL insider is Phil Kane who actually worked IN the FCC...but he hasn't been talking much lately. Kane left the FCC some time ago. Our easiest-to-get sources of old information are the periodicals of the 1980s (ink on real paper isn't ephemeral, is hard to change all after the many press runs of 50 thousand+ copies each done years ago).

The "movement" to end code testing began to be more earnest about the mid-1980s, just barely moving then...but enough to come to the attention of the FCC. Witness the wordings in the NPRM and final R&O of 1990 that created the no-code Technician class license in 1991. In 1990 the FCC stated publicly that it did not consider the morse code test as an indicator of the qualifications of any amateur to be granted a license. The FCC did not make a sudden decision on that; it already had some documentation on hand from citizens by then (that is in their Reading Room archives).

Gleanings from paper periodicals internationally show to me that the IARU was split several ways on code testing until about 2000. [others' take on that will vary no doubt] From about then the no-code-test movement gathered speed, pushed first by New Zealanders and then spreading with the speed and efficiency of the Internet. By 2001 it was unmistably for changing and revising S25 of the international regulations, not just for code testing but to modernize them entire. That

was done in 2003. Since then up to 23 administrations have either eliminated the code test or made the code test an alternate qualifier (not an absolute) for below-30-MHz privileges. Up to June 2003 the ARRL had NOT budged on its adamant stand in favor of code testing.

Since the FCC denied the ARRL's Petition (RM-10867 of 18 Mar 04) the League hasn't said much. Their in-house seer and editorializer, executive president Dave Sumner, seems to have lost his pen somewhere on that. They seem to be building a case of invading something to find those WMDs though (Weapons of Morse Destruction), perhaps laying in body bags and such? This is building to be a Fight To The Death over Ham Radio As The League Knows It. A Jihad in the making... :-)

Hello? Who ya gonna call? Test Busters?

The VEC Question Pool Committee, all licensed radio amateurs,
make up ALL the questions and answers.

Nasty evil FCC doesn't make them up, they only approve the
Pools.

>> Failing that, your wasting your
>> time and effort dragging up this tired argument.
>
>It's not me who is bringing it up.

Paranoia NEEDS company?

Thank you, Mark - you've just proved my point!

For some folks (like Mark) it's not about the code test
in isolation. It's about "hard" tests in general - written,
code, practical, whatever.

Did you read the "21st Century" paper? I wrote a detailed
rebuttal.

> > > > I also question the real need to memeroize band edges and

That's what they called themselves in the "21st Century" thing...

There was a time, not so long ago, when if someone had suggested
a nocodetest amateur license, they would have been told it was a
"red herring" and "something FCC would never consider".

Now look where we are.

The trend isn't just towards less code testing, but to less
testing overall.

>users to some kind of death camp?

Mark, it is The End Of Amateur Radio as the morsemen know it.

Their Krystalnacht was sounded with FCC 90-53 of 15 years ago.
Their Burning of The Reichstag was FCC 99-412, the R&O for
Restructuring...5 WPM morse maximum and cutting classes in half.

>The ending of code testing will not reduce the number of code using
>hams.

Rumor has it that Black and Decker, Makita, and other tool makers
have begun development of a device to remove code keys from cold,
dead fingers, to be sold to morticians.

>Time may do that though the actions of the grim reaper and the failure
>of Code users to recruit others to replace them, but I doubt that will
>kill CW USE or learning of the mode

Morse will never die as long as there are space-faring aliens
who will invade Terra but counter-attacks will be coordinated
by Mighty Macho Morsemen working secret (from aliens) morse code!

>Further with computers and programs in existance today any one that
>wishes to make the attempt to learn Morse Code has the tools to do so

Oh! The Ideological Conflict! Digital machinery of a very
complex nature to TEACH their "most simplest, effective, low-
power, basic communications skill!"

Woe to the Morsemen! Let their Tennysons to be exclaim in
memoriam, "Look upon my [code] works, ye mighty, and despair!"

LenAnderson@ieee.org

# 3463. Re: Docket 05-235 Scorecard

Newsgroup: rec.radio.amateur.policy
Date: 2005-08-31 21:01:20 UTC
From: "LenAnderson@ieee.org" <LenAnderson@ieee.org>
Message-ID: <1125522080.227752.291380@g49g2000cwa.googlegroups.com>
Source record: 117812

Today's Scorecard in the NCTA v. PCTA Amateur NPRM Opinions!

30 Aug 05, WT Docket 05-235 Comments on Test Element 1
Elimination/Retention are:

Total 1968

Indeterminate/duplicates (note 1) 97

Unambiguously Against NPRM (note 2) 542 28.97%
Unambiguously For NPRM (note 3) 1054 56.33%
Code test ONLY for Extras (note 4) 275 14.70%

Notes:

1. Includes duplicate postings from same individual, "joke"
or "test" entries which do not have a valid address, or
polemicizing a personal pet peeve which has nothing to
do with the NPRM, individuals not understanding the
scope and purpose of the NPRM, one foreign citizen
submission, and six who were commenting on another
matter having nothing to do with amateur radio regulations.

2. Includes only those who are whole-heartedly AGAINST
the NPRM and against dropping any code testing.

3. Includes only those who are whole-heartedly FOR the
NPRM and the abolition of the morse code test.

4. These are "in-betweeners" who wish to retain the code
test for the "highest" class (Extra) but will accept
eliminating the code test for other classes.

Percentage figures are calculated against the Total less
the number of Indeterminate entries. For all up to
being received by 30 Aug 05 that would be 1871.

This is the last daily posting IN THIS FORMAT. With the notice
of NPRM 05-143 finally appearing in the Federal Register and
the end of Comment period established as 31 October 2005, end
of Replies to Comments on 14 November 2005, and NO statement
on whether or not the previous 1968 Comments are effective for
Commission R&O decisions, the FORMAT will change. There will
be "total" Comments (and percentages) columns and "new"
Comments (and percentages) filed from 31 August onward.

Stay tuned...the future of U.S. amateur radio is being made,
like it or not.

NPRM was published today (8/31) in Federal Register. Says comments
accepted on or before 10/31 and reply comments on or before 11/14. That
on or before wording does not state a start date - only an end date for
the comments. I have no idea what that means in legalese.

I am sure they work fine where they are not otherwise mechanically
damaged.

It's not the tool...It's how you use it...

You know, I'd object to a ham trying to read charts and bandplans while they
are driving. It's just as bad as reading a newspaper or trying to shave.
So I say yes they should at least be required to know from memory where at
least the regulations allow them to be.

The read the chart/bandplan concept has the underlying assumption that one
will be operating from a fixed location with access to reference materials.

What? is there a part of the NPRM I missed like carting off the Code
users to some kind of death camp?

The ending of code testing will not reduce the number of code using
hams.

Time may do that though the actions of the grim reaper and the failure
of Code users to recruit others to replace them, but I doubt that will
kill CW USE or learning of the mode

Further with computers and programs in existance today any one that
wishes to make the attempt to learn Morse Code has the tools to do so
>
> Dee D. Flint, N8UZE
END QUOTE

We could easily become short of code elmers as I know a number of people who
taught it only out of a sense of duty to the incoming amateurs.

There will of course be people who continue to learn it and use it.

However what we will lose are those people who choose to never try it but
would like it if they did. Some will fall prey to the "obsolete" argument.
Others will think that it is "too hard" and so on.
